

AB MECHANIZATION

Engr. Alexis T. Belonio, MS, ABE, ASEAN Engineer
*Freelance Consultant and Technology Developer; Former
Senior Research Fellow (PhilRice) and
Associate Professor (Central Philippine University)
Member: PSABE, ASABE, ASME*

2

1. Machinery and equipment for the production, harvesting, processing, storage, manufacture, transportation and distribution of agricultural and fishery products.

- ☒ a. Agricultural and Fisheries Machinery
- b. Agricultural and Aquacultural Machinery
- c. Agricultural and food machinery
- d. Agricultural Machinery
- e. None of the above

2. Utilization of hand tools, implement for draft animals, and mechanically-powered machines for agricultural land development, production, harvesting and on-farm processing.

- a. Agricultural development
- b. Agricultural machinery and equipment
- ☒ c. Agricultural mechanization
- d. All of the above

Copyright 2025: Alexis T. Belonio

3. In order to strengthen the farm and the fishery groups of DA, the ____ was created to prepare, evaluate and recommend engineering plans for farm and fisheries machinery.

- a. Agricultural Fisheries Mechanization Committee
- b. National Agro-fishery Mechanization Program
- ☒ c. Bureau of Agricultural and Fisheries Engineering
- d. None of the above

4. Business enterprise under the AFMech Law aimed to provide farmers after-sales service and warranty, to provide custom farm mechanization services, and services on repair and trouble shooting, as well as to provide training on maintenance and on proper use of agricultural machinery and equipment.

- ☒ a. Agri-fisheries Machinery and Equipment Service Centers
- b. Farmer's Machines Service Centers
- c. Farm Machines Service Center
- d. None of the above

3

5. Monitoring body for the service warranty provided by the assemblers, manufacturers, importers, suppliers, distributors, and dealers of agri-fishery machines under AFMech Law.

- ☒ a. LGU and BAFE
- b. AMTEC and BAFE
- c. PSAE and MATEC
- d. None of the above

6. The Bureau Director and the Assistant Director of BAFE were appointed by the ____.

- a. DA Secretary
- ☒ b. President of the Philippines
- c. Board of Directors of BAFE
- d. None of the above

7. Present farm mechanization level based on latest survey of PHILMECH for rice farms (As of 2024).

- a. 2.31 horsepower per hectare
- b. 2.68 horsepower per hectare
- ☒ c. 2.77 horsepower per hectare
- d. None of the above

8. Area with high mechanization level.

- ☒ a. Nueva Ecija
- b. Pangasinan
- c. Iloilo
- d. None of the above

rice

9. Area with low mechanization level.

- ☒ a. Kalinga
- b. Nueva Viscaya
- c. Zambales
- d. None of the above

10. Arable land is a land that is ____.

- a. not capable of being tilled and planted
- ☒ b. capable of being plowed and used to grow crops.
- c. a dry land that needs irrigation.
- d. None of the above

4

11. While the Philippines is making progress in mechanization, it still faces challenges in fully mechanizing agriculture due to ____.

- a. Small landholdings
- b. Cost of machinery
- c. Availability of labor
- ☒ d. All of the above
- e. Some of the above

12. Which of the following is true?

- a. Large farms are more likely to adopt mechanization, as it can be cost-effective for larger operations.
- b. Abundant labor can make manual work more attractive, potentially hindering mechanization adoption.
- c. More developed countries tend to have higher levels of mechanization, as they can afford to invest in machinery and technology.
- ☒ d. All of the above
- e. Some of the above

13. Agricultural mechanization is measured in terms of ____.

- a. horsepower rating of agricultural machines being used
- ☒ b. horsepower per hectare (hp/ha) applied in farming operation
- c. the number of equipment used in farming operation.
- d. All of the above
- e. None of the above

14. Which of the following is a key aspect of farm mechanization?

- a. Automation - Replacing human labor with machines.
- b. Increased Efficiency - Reducing the time and effort required for agricultural operations, allowing for faster and more efficient production.
- c. Improved Productivity - Enhancing yields and output through the use of machinery and technology.
- d. Reduced Labor Costs - Lowering the need for human labor and associated costs, especially during the peak season.
- e. Use of various equipment - Involves a wide range of equipment from simple hand tools to sophisticated machinery.
- ☒ f. All of the above
- g. Three of the above

5

15. Which of the following are the benefits of mechanization?

- a. Increased Food Production - Enabling to produce more crops in less time,
- b. Reduced Labor Intensity - Less physically-demanding and relieving labor shortages.
- c. Timely Operations - Allowing to complete crucial tasks.
- d. Improved Crop Quality - Optimize input use and enhance crop quality.
- e. Economic Growth – Increases productivity and efficiency
- f. Sustainable Farming Practices - Can contribute to more sustainable farming practices, such as reducing water consumption and minimizing soil erosion.
- ☒ g. All of the above
- h. Three of the above

16. Which of the category among the levels of technology adopted mechanization?

- a. Hand-tool technology
- b. Draft-animal technology
- c. Mechanical-power technology
- ☒ d. All of the above

17. Arid land is a land with ____.

- ☒ a. scarce of water resources where crop is difficult to grow.
- b. sufficient supply of water for crop growth.
- c. water-logged condition where crops is difficult to grow.
- d. None of the above

18. Factors affecting the level of agricultural mechanization in the ASEAN countries.

- a. Size of land
- b. Labor availability
- c. Economic development
- ☒ d. All of the above
- e. None of the above
