

AB MECHANIZATION

Engr. Alexis T. Belonio, MS, ABE, ASEAN Engineer
*Freelance Consultant and Technology Developer; Former
Senior Research Fellow (PhilRice) and
Associate Professor (Central Philippine University)
Member: PSABE, ASABE, ASME*

TERMINOLOGIES IN AGRICULTURAL MECHANIZATION

Copyright 2025: Alexis T. Belonio

2

1. This uses human muscle power for tasks like weeding, planting, and harvesting.

- a. Hand-Tool Technology
- b. Draught-Animal-Power Technology
- c. Motorized Technology
- d. All of the above

2. This employs engine or electric motor for agricultural operations.

- a. Hand-Tool Technology
- b. Draught-Animal-Power Technology
- c. Motorized Technology
- d. All of the above

3. This utilizes carabao to power implement like plow and harrow.

- a. Hand-Tool Technology
- b. Draught-Animal-Power Technology
- c. Motorized Technology
- d. All of the above

4. Energy sources, like gasoline, diesel, and natural gas, used to power agricultural machinery.

- a. Renewable energy
- b. Fossil energy
- c. Biomass energy
- d. None of the above

5. This includes energy from sources like solar, wind, biomass for power farm equipment.

- a. Fossil energy
- b. Renewable energy
- c. Geothermal energy
- d. All of the above

6. Process of using machines to replace or supplement human labor.

- a. Automation
- b. Mechanization
- c. Computerization
- d. None of the above

3

7. The use of computerized and electromechanical systems to perform tasks with minimal or no human intervention.

- a. Automation
- b. Mechanization
- c. Modernization
- d. None of the above

8. Output or yield per unit of input, such as labor or land.

- a. Efficiency
- b. Productivity
- c. Efficacy
- d. None of the above

9. Ratio of output to input, often used to assess the performance of machinery.

- a. Efficiency
- b. Productivity
- c. Efficacy
- d. None of the above

10. Process of using machinery to perform agricultural tasks.

- a. Farm mechanization
- b. Agricultural mechanization
- c. Field mechanization
- d. None of the above

4

11. Term similar to agricultural mechanization emphasizing the use of machinery for the farm.

- a. Farm machinery operation
- b. Farm mechanization
- c. Farm equipment modernization
- d. All of the above

12. Additional equipment used with the main machine.

- a. Automated equipment
- b. Ancillary equipment
- c. Standby equipment
- d. None of the above

13. Machinery that performs tasks with minimal or no human intervention.

- a. Automated equipment
- b. Ancillary equipment
- c. Back-up equipment
- d. None of the above

14. Application of advance technologies like sensors, data, and automation to improve agricultural practices.

- a. Smart Agriculture
- b. Precision agriculture
- c. Mechanize agriculture
- d. None of the above

15. Agricultural machinery that can operate without direct human control, using technologies like GPS, sensors in performing tasks such as planting, harvesting, and field management.

- a. Self-propelled equipment
- b. Self-driven equipment
- c. Sensors-operated equipment
- d. All of the above

16. Digital tool used to track the impact of mechanized farming practices on factors like carbon emissions, soil health, and water usage.

- a. dMRV (Digital, Measuring, Reporting, and Verification)
- b. MRV (Measuring, Reporting, and Verification)
- c. Remote sensing
- d. All of the above

5

17. Digital tool used in analyzing satellite imagery to monitor crop growth, tillage patterns, and cover crop presence.

- a. dMRV (Digital, Measuring, Reporting, and Verification)
- b. MRV (Measuring, Reporting, and Verification)
- c. Remote sensing
- d. All of the above

18. Digital tool that uses sensors on agricultural machinery to track fuel consumption, soil moisture, and other relevant parameters in agricultural mechanization.

- a. Remote sensing
- b. Sensor-based Data Collection
- c. MRV
- d. All of the above
- e. None of the above

19. Purpose of using dMRV in agricultural mechanization.

- a. Measuring environmental impact
- b. Verifying sustainable practices
- c. Promoting transparency and accountability
- d. Facilitating carbon market
- e. Optimizing machinery use
- f. All of the above
- g. Three of the above
