2

1. Engine that burns fuel inside the cylinder.

- a. External combustion engine
- b. Internal combustion engine
- c. Sterling engine
- d. None of the above

2. Part of an engine that slides up and down the cylinder and transmits power to the crankshaft.

- a. Connecting rod
- b. Cylinder block
- c. Piston
- d. Spark plug
- e. None of the above

3. Amount of power that the manufacturer specified for an engine.

- a. Indicated horsepower
- b. Brake horsepower
- c. Rated horsepower
- d. None of the above

4. A 100pferde-starke rated engine is equal to ____ hp rating.

- a. 96.8
- b. 98.6
- c. 101.4
- d. None of the above

5. Device that meters the fuel and the air in spark-ignition engines and mixes them into a harmonious mixture before the mixture enters the combustion chamber of an engine.

- a. Governor
- b. Air injector
- c. Carburetor
- d. All of the above

6. The usable power delivered by the engine.

- a. Indicated horsepower
- b. Brake horsepower
- c. Rated horsepower
- d. None of the above

3

7. Internal combustion engine that produces power in one revolution of the crankshaft.

- a. Four-stroke-cycle engine
- b. Two-stroke-cycle engine
- c. Rotary engine
- d. None of the above

8. Ratio of the total volume to the clearance volume.

- a. Compression ratio
- b. Air-fuel ratio
- c. Bore stroke ratio
- d. None of the above

9. Volume displaced by the piston in making an upward or a downward stroke.

- a. Piston displacement volume
- b. Clearance volume
- c. Total volume
- d. None of the above

10. An engine has a piston displacement of 38.4 in³. If the clearance volume of the cylinder is 2.5 in³, what is its compression ratio?

- a. 1:12
- b. 1:16
- c. 1:8
- d. None of the above

11. Suppose a 4-cylinder engine has 3.5in. bore and 4.0in. stroke, what is the engine displacement.

- a. 154 in³
- b. 175 in³
- c. 225 in³
- d. None of the above

12. Device that provides ignition to a gasoline engine.

- a. Fuel injector
- b. Carburetor
- c. Spark plug
- d. None of the above
- e. All of the above

4

13. Vehicle designed to pull, propel, and supply power to operate machinery used in agricultural operation.

- ☒ a. Agricultural tractor
- b. Automobile
- c. Payloader
- d. None of the above

14. The stirring wheel of a tractor is found ____.

- a. in front of the tractor
- b. at the rear of the tractor
- ☒ c. in front of the operator's seat
- d. None of the above

15. Attachment to the tractor for the purpose of changing traction and stability.

- ☒ a. Ballast
- b. Cage wheel
- c. Plow
- d. Hydraulic lift
- e. All of the above

16. Ratio of the drawbar power and the wheel axle power.

- ☒ a. Lugging efficiency
- b. Traction efficiency
- c. Mechanical efficiency
- d. None of the above

17. Sum of all the resistance acting on the tractor.

- a. Coefficient of traction
- ☒ b. Running resistance
- c. Rolling resistance
- d. None of the above

18. Running resistance of a tractor includes ____.

- a. rolling resistance
- b. air and acceleration resistance
- c. slope resistance
- ☒ d. All of the above

5

19. Power drive found at the rear of the tractor that propels power implements and stationary machines.

- ☒ a. Power-take-off drive
- b. Hydraulic system
- c. Differential gear
- d. None of the above

20. Standard rpm of a tractor's PTO drive.

- a. 600 rpm
- b. 200 rpm
- ☒ c. 540 rpm
- d. None of the above

21. Brand of diesel engines available for farming applications that requires more power as compared with gasoline engines.

- a. Yanmar
- b. Kubota
- ☒ c. Mitsubishi
- d. All of the above
- e. None of the above

22. Attachment to a tractor's rear wheel to increase traction.

- a. Ballast
- ☒ b. Cagewheel - *11KPa - increase traction*
- c. Stirring wheel
- d. None of the above

23. Tractor part that controls the travel direction of the machine.

- a. Rear wheel
- b. Front wheel
- ☒ c. Stirring wheel
- d. None of the above

24. Tractor device that automatically raises or lowers the implement in operation to maintain a given draft.

- ☒ a. Automatic draft control
- b. Automatic position control
- c. 3-point linkage
- d. None of the above

6

25. Key consideration when choosing a diesel engine for farming.

- a. Horsepower
- b. Fuel efficiency
- c. Durability and reliability
- d. Engine vibration and Noise
- e. Availability of parts
- ☒ f. All of the above
- g. None of the above

26. The use of direct injection system can ____ of the engine.

- a. improve the durability
- b. reduce of vibration and noise
- ☒ c. improve the fuel efficiency
- d. All of the above
- e. None of the above

27. Popular brand of tractors in the Philippines.

- a. Kubota
- b. FarmTrac
- c. Ford
- ☒ d. All of the above
- e. None of the above

Copyright 2025: Alexis T. Belonio

28. Brand of tractor which is known for reliability and fuel efficiency.

- ☒ a. Kubota
- b. Ford
- c. Yanmar
- d. YTO
- e. None of the above
- f. All of the above

29. Main thing to consider when selecting tractor.

- a. Size and horsepower
- b. Features
- c. Brand reputation and parts availability
- d. Financing options
- ☒ e. Registration
- f. All of the above
- g. None of the above
