PLANNING FOR MECHANIZATION

Copyright 2025: Alexis T. Belonio

2

1. Planning and managing agricultural and biosystems mechanization programs and projects requires a multi-faceted approach that involves ____.

- a. comprehensive planning
- b. resource allocation
- c. stakeholder collaboration
- d. effective monitoring and evaluation
- ☒ e. All of the above
- f. Some of the above

2. In assessing the need for agricultural mechanization of specific client which of the following are to be considered?

- a. Gap identification
- b. Assess available resources
- c. Understanding the local conditions
- ☒ d. All of the above
- e. Some of the above

3. Focal points in preparing the goals for agricultural mechanization.

- a. Improved productivity
- b. Reduced costs
- c. Enhanced efficiency
- ☒ d. All of the above
- e. Two of the above

4. In developing a detailed project design plan for agricultural mechanization, which of the following need to be considered in the outline?

- a. Scope
- b. Activities
- c. Timeline
- d. Budget
- ☒ e. All of the above
- f. Two of the above

3

5. Resource allocation in preparing agricultural mechanization plans will include ____.

- a. financial
- b. human
- c. technical
- ☒ d. All of the above
- e. Two of the above

6. Who are the key stakeholders to consider in planning process to ensure buy-in and support to agricultural mechanization plan?

- a. Farmers
- b. Industry experts
- c. Government agencies
- d. Funding bodies
- ☒ e. All of the above
- f. Two of the above

7. In implementing the agricultural mechanization project, which of the following need to be considered?

- a. Project execution – Timely delivery and adherence to quality standard.
- b. Training and capacity building –Farmers and stakeholders effectively use and maintain agricultural machines.
- c. Monitoring and evaluation - Tracking progress, identifying challenges, and making necessary adjustments.
- d. Communication and outreach – Stakeholders are informed about the program's progress and results,
- ☒ e. All of the above
- f. Two of the above

4

8. In executing agricultural mechanization project it must be carried out as planned as outlined in the project design ____.

- a. ensuring timely delivery ✓
- b. adherence to quality standards ✓
- c. using budgeted requirement
- d. All of the above
- e. Two of the above

9. Training and capacity building in agricultural mechanization plan and management are important for ____ of introduced machinery and equipment.

- a. effectively use
- b. proper maintenance
- c. ensuring safety
- d. Two of the above
- e. All of the above

10. Which of the following is a specific example of DA programs on agricultural mechanization?

- a. Farm to Market Roads
- b. Agri Machinery and Equipment Service Centers

Copyright 2025: Alexis T. Belonio

c. National Agri-Fisheries Mechanization Program

- d. All of the above
- e. Two of the above

11. Which management aspect needs to be considered in agricultural mechanization plan?

- a. Financial Management - Effectively, ensuring transparency and accountability in the use of allocated funds.
- b. Logistics Management - Ensure the timely delivery and efficient storage of machinery, equipment, and other necessary resources.
- c. Risk Management - Identify potential risks and develop strategies to mitigate them.
- d. Quality Management - Establish quality standards for all aspects of the program.
- e. Sustainability - Ensure the long-term sustainability of the program by fostering partnerships, promoting local ownership, and integrating the program into existing agricultural development strategies.

- f. All of the above
- g. Three of the above

5

12. Things to consider when preparing farm mechanization plan.

- a. Prepare detailed work plan including goals, objectives and plan of action.
- b. Analyze national situation and identify issues that may impact implementation.
- c. Consider rearranging small land into clusters of economic size to enhance mechanization.
- d. Ensure that farmers are trained on the use and maintenance of new machinery.
- e. Explore advance technologies like GPS guided tractors and precision farming practice.
- f. All of the above
- g. Three of the above

13. Which of the following is not included in the preparation of mechanization plan?

- a. Objective
- b. Target area
- c. Mechanization technologies
- d. Sustainable practice
- e. Implementation
- f. Expected outcomes
- g. All of the above
- h. Four of the above

14. An example of expected outcomes during the preparation of mechanization plan?

- a. Increased crop yields.
- b. Reduced labor costs.
- c. Improved timeliness of farming operations.
- d. Reduced post-harvest losses.
- e. Enhanced farmer livelihoods.
- f. Improved soil health and water conservation.
- g. All of the above
- h. Four of the above
