HOW TO MECHANIZE A FARM

Copyright 2025: Alexis T. Belonio

2

1. Which is the starting point to begin when mechanizing a farm?

- a. Chose the right machine to be used for mechanization.
- ☒ b. Educate and train farmers with regard to mechanization.
- c. Purchase right away machines that are needed in mechanization.
- d. None of the above

2. In educating farmers with regard to mechanization, they need to _____ machinery.

- a. determine the cost of
- ☒ b. understand the benefits and practical aspect of using
- c. buy and undergo training on how to operate
- d. None of the above

3. In skill development, which of the following are included in the training?

- a. Maintenance of the machines
- b. Repair of the machines
- c. Best practices of using the machinery
- ☒ d. All of the above
- e. Two of the above

4. Strengthening _____ can benefit small farmers who may not be able to purchase their own machinery.

- a. farmers organization
- ☒ b. agricultural machinery service organizations
- c. government agencies
- d. None of the above

3

5. Ways to mechanize farming operation like plowing, planting, and harvesting.

- a. Farmers to buy their own machines
- b. Hire services of agricultural machinery service centers
- ☒ c. All of the above
- d. None of the above

6. In sustainable mechanization strategy where all stakeholders are involved in the planning and implementation.

- ☒ a. Participatory approach
- b. Flexibility and adaptability approach
- c. All of the above
- d. None of the above

7. A sustainable mechanization strategy that adapts in changing needs and opportunities.

- a. Participatory approach
- ☒ b. Flexibility and adaptability approach
- c. All of the above
- d. None of the above

8. Which of the following is ☒ not a benefits of mechanization?

- a. Increased in productivity
- b. Reduced labor
- c. Timeliness
- d. Improved resource use
- e. Enhanced food security
- f. Reduced drudgery
- ☒ g. None of the above
- h. All of the above

9. Mechanized farming can lead to _____ efficient use of water, fertilizers, and other resources.

- a. less
- ☒ b. more
- c. non-
- d. None of the above

4

7. Increased production and efficiency through mechanization can _____ food security.

- ☒ a. contribute to greater
- ☐ b. sustain
- ☐ c. hinder
- ☐ d. None of the above

8. Mechanization can make farming _____ physically demanding and more enjoyable.

- ☒ a. more
- ☐ b. less
- ☐ c. not
- ☐ d. None of the above

9. Mechanization can help _____ labor costs and make farming less physically demanding.

- ☒ a. reduce
- ☐ b. increase
- ☐ c. eliminate
- ☐ d. None of the above

10. For every _____ increase in the level of mechanization, the yields of all crops, grain crops and cash crops increase by 1.2151, 1.5941 and 0.4351%, respectively.

- ☒ a. 1%
- ☐ b. 5%
- ☐ c. 10%
- ☐ d. None of the above

11. One disadvantage of mechanized farming is it _____ maintenance of the machines in order to operate them at peak efficiency.

- ☒ a. requires regular
- ☐ b. always require
- ☐ c. does not require
- ☐ d. None of the above
