2

1. Which of the following is the goal when supervising tractor operation?
- a. Ensure operators are properly trained.
 - b. Ensure operators follow safety operating procedures.
 - c. Make sure operators know how to maintain the equipment.
 - ☒ d. All of the above
 - e. None of the above

2. Which among the key aspects is to be given emphasis when supervising tractor operation?
- a. Training and competency
 - b. Pre-operational check
 - c. Safe operating practices
 - d. Maintenance and safety
 - e. Emergency procedures
 - f. Communication
 - ☒ g. Record keeping
 - ☒ h. All of the above
 - i. Four of the above

3. What specific point needs to be taken note of when supervising tractor operation?
- a. Steep slopes
 - b. Turning
 - c. Obstructions
 - d. PTO and Guards
 - e. Traffic rules
 - ☒ f. Seatbelt and ROP's
 - ☒ g. All of the above
 - h. Two of the above

4. Which of the following responsibilities applies when supervising tractor operations?
- a. Observe and guide
 - b. Address operators concerns
 - c. Enforce safety – ensure that operators adhere to all safety procedures and regulation
 - ☒ d. Regular training.
 - ☒ e. All of the above
 - f. Three of the above

3

5. Pre-operational checklist to consider when supervising tractor operation.
- a. Operator's training and familiarization – Operator's familiarity with the operation and safety features of the tractor.
 - b. Machine inspection – Pre-start checkup, mechanical issues, fluid level, etc.
 - c. Surroundings – Check work area for obstruction, ditches, etc.
 - d. Safety of equipment – Emblem, safety light, power lines, bystanders, etc.
 - ☒ e. All of the above
 - f. Two of the above

6. Points to consider during the regular maintenance of tractor.
- a. Schedule servicing – Ensure that the tractor is serviced according to the manufacturer's schedule, including oil changes, filter replacement, and fluid level checks.

- b. Component inspection – Oversee regular inspection of critical components like brakes, steering, light, and safety devices.
- c. Cleanliness – Ensure the tractor is kept clean and free from debris, especially around moving parts to prevent hazard.
- d. Record keeping – Maintain accurate record of all maintenance and repair performed.
- ☒ e. All of the above
- f. Three of the above

7. What hazard and mitigation procedure to follow when operating tractors?
- a. Potential hazard – Identify potential hazard like entanglement with PTO shafts, overturning on slopes, and contact with power lines.
 - b. Risk assessment – Conduct regular risk assessment to identify and mitigate potential hazards associated with tractor operation.
 - c. Emergency procedure – Ensure operators are familiar with emergency procedure, including how to shut down tractor and disengage implement.
 - ☒ d. All of the above
 - e. Two of the above

4

8. What specific area should be given focus during tractor operation and maintenance?
- a. Rollover protection (ROPs) – Properly installed and maintained.
 - b. PTO shafts - Danger of uncovered PTO shafts.
 - c. Implement attachment –Train operators on the proper technique in attaching and detaching implement.
 - d. Load balance – Proper load balancing particularly when towing and/or carrying implement.
 - e. Hazard identification and control – Train operator to identify potential hazard in the work area and implement control measure to prevent accidents.
 - ☒ f. All of the above
 - g. Three of the above
