TRACTOR POWER TRANSMISSION SYSTEM

Copyright 2025: Alexis T. Belonio

2

1. Speed-reducing mechanism of a tractor equipped with several sequence of gears and shafts through which the engine power is transmitted to the tractor wheel.

- a. Transmission system
- b. Power-train system
- c. Speed-reducer system
- d. None of the above

2. Complete path of power from the engine to the wheel of the tractor.

- a. Power train
- b. Power transmission
- c. Gear transmission
- d. None of the above

3. This connects and disconnects the engine to and from the power transmission of the tractor.

- a. Clutch
- b. Differential
- c. Final drive
- d. None of the above

4. This controls the rotation of the rear wheel of the tractor by allowing one wheel to rotate or to stop for the purpose of ease of pivoting the tractor during operation.

- a. Final drive
- b. Differential
- c. Transmission gears
- d. None of the above

5. This converts the high speed gear at the rear wheel of the tractor to low gear to obtain better torque.

- a. Differential
- b. Transmission gear
- c. Final drive
- d. None of the above

6. This delivers the power from the final drive to the rear wheel of the tractor.

- a. Final drive
- b. Rear axle
- c. Differential
- d. None of the above

3

7. Which of the following is not a type of clutch?

- a. Friction clutch
- b. Dog clutch
- c. Fluid coupling clutch
- d. None of the above

8. This transmits torque by using surface friction between two faces of the clutch.

- a. Dog clutch
- b. Fluid coupling clutch
- c. Friction clutch
- d. None of the above

9. This couples two rotating shafts or other rotating components not by friction but by interferences.

- a. Dog clutch
- b. Friction clutch
- c. Fluid coupling clutch
- d. None of the above

10. A hydrodynamic device that uses a rotating mechanical power transmission with the help of a fluid or oil.

- a. Dog clutch
- b. Friction clutch
- c. Fluid coupling clutch
- d. None of the above

11. The torque of tractor wheel in the power transmission gear basically can be increased for the same power by ____ the speed of the shaft.

- a. increasing
- b. decreasing
- c. retaining
- d. None of the above

12. Large bevel gear at the differential drive of the tractor.

- a. Crown wheel
- b. Pinion gear
- c. Differential pinion gear
- d. None of the above

4

13. Gear type used in power transmission of a tractor having different number of teeth that are mounted on a shaft and are liable to slide depending on the desired speed of the operator.

- a. Selective-sliding type
- b. Constant-mesh type
- c. All of the above
- d. None of the above

14. Gear type used in the final drive of the tractor.

- a. Bevel gear
- b. Spur gear
- c. Worm gear
- d. None of the above

15. The large gear that meshes with the small gear from the half shaft of a tractor.

- a. Bull gear
- b. Crown wheel
- c. Pinion gear
- d. None of the above

16. Mechanism of a tractor that raises, holds, or lowers the mounted and semi-mounted equipment

- a. Pneumatic
- b. Hydraulic
- c. Hydro-pneumatic
- d. None of the above

17. Component of hydraulic system that draws oil from oil tank and sends it to the control valve under high pressure.

- a. Hydraulic pump
- b. Hydraulic cylinder
- c. Hydraulic piston
- d. None of the above

18. Implement is attached to the tractor through it for safe and efficient operation.

- a. Tractor drive
- b. Tractor hitch
- c. Tractor connector
- d. None of the above

5

19. Part of tractor transmission system consisting of a shaft that transmits torsional power to other machine.

- a. Power take-off
- b. Final drive
- c. Differential
- d. None of the above

20. Belt pulley drive of a tractor used to drive stationary farm machines can be found at the ____ of the tractor.

- a. beneath
- b. front
- c. side
- d. None of the above

21. The three-point link hitch system of a tractor consists of ____.

- a. one lower link and two upper links
- b. one upper link and two lower links
- c. three lower links
- d. None of the above

20. ASAE standard power take off speed of a tractor.

- a. 100 +/- 10 rpm
- b. 250 +/- 10 rpm
- c. 540 +/- 10 rpm
- d. None of the above

21. Hitch system for trailing-type equipment.

- a. Drawbar hitch system
- b. Three-point hitch system
- c. All of the above
- d. None of the above

22. Hitch system for integral mounted implement.

- a. Drawbar hitch system
- b. Three-point hitch system
- c. All of the above
- d. None of the above
