- d. RA 8559

RA 3927 - The *first republic act* promulgated for the **practice of agricultural engineering** in the Philippines. This Act shall be known as the "Philippine Agricultural Engineering Law."

RA 8559 - an act regulating the practice of agricultural engineering in the Philippines approved on February 13, 1998. This Act shall be known as the "Philippine Agricultural Engineering Act of 1998." It was enacted by the House of Representatives and the Senate. The law aims **to promote and upgrade the practice of the profession** by instituting measures that will result in relevant agricultural engineering education and better career prospects for professional agricultural engineers.

RA 10915 - This Act shall be known as the "Philippine Agricultural and Biosystems Engineering Act of 2016". An Act **Strengthening, Modernizing and Aligning the Practice of Agricultural Engineering in the Country into the Internationally Recognized Practice** of Agricultural and Biosystems Engineering, and for Other Purposes. Lapsed into law on July 21, 2016.

RA 3927

Agricultural engineer is a graduate of agricultural engineering course from a school, institution, college or diversity duly recognized by the government.

RA 8559

Agricultural engineer - An agricultural engineer is a natural person who has been issued a certificate of registration by the Board of Agricultural Engineering and has taken the oath of profession of agricultural engineers.

RA 10915

Agricultural and Biosystems Engineer refers to a person who is registered and licensed to practice agricultural and biosystems engineering in the country and who holds a valid certificate of registration and professional identification card from the Board of Agricultural and Biosystems Engineering and the PRC

PROFESSIONAL REGULATION COMMISSION

MEMORANDUM ORDER NO. 98

Series of 2023

December 28, 2023

TO : ALL CONCERNED OFFICIALS AND EMPLOYEES
Central and Regional Offices

SUBJECT : TRANSITION PERIOD FOR THE COMPLIANCE OF THE
CONTINUING PROFESSIONAL DEVELOPMENT (CPD)
REQUIREMENT

In the implementation of the Continuing Professional Development (CPD) Act of 2016 where CPD compliance is a requirement for the renewal of Professional Identification Card (PIC) and the non-acceptance of CPD Undertaking starting January 1, 2024 per PRC Resolution No. 1577 (s. 2022), there is a need to provide a transition period for the CPD compliance, as follows:

YEAR	REQUIRED CPD CREDIT UNITS (CUs) PER YEAR, NOTWITHSTANDING THE PREVIOUSLY EXECUTED CPD UNDERTAKING
2024	15
2025	20
2026	30
2027 and onwards	45

CPD Requirements

Who are not covered by the CPD Requirement?

During the transition period, the following are not covered by the CPD requirement:

- ☐ Professionals working overseas. However, they need to provide proof such as valid Certificate of Employment or Overseas Employment Certificate duly approved by POEA.
- ☐ Newly licensed professionals for the first renewal cycle (3 years) after obtaining their license.

Coverage of RA 10915

- (a) Examination, registration and licensure of agricultural and biosystems engineers;
- (b) Supervision, control and regulation of the practice of agricultural and biosystems engineering;
- (c) Development, upgrading and updating of the curriculum of the agricultural and biosystems engineering profession in coordination with the CHED and the concerned SUCs;
- (d) Development and improvement of the professional competence and practice of agricultural and biosystems engineers through, among others, CPD and career progression and specialization; and
- (e) Integration of all agricultural and biosystems engineers under one national AIPO of agricultural and biosystems engineers which shall be recognized by the Board of Agricultural and Biosystems Engineering and the PRC.

COMPANY REG. NO. A200102857

CERTIFICATE OF FILING OF AMENDED BY-LAWS

KNOW ALL PERSONS BY THESE PRESENTS:

THIS IS TO CERTIFY that the Amended By-Laws of

**PHILIPPINE SOCIETY OF AGRICULTURAL AND
BIOSYSTEMS ENGINEERS (PSABE), INC.**

(Formerly: PHILIPPINE SOCIETY OF AGRICULTURAL ENGINEERS (PSAE), INC.)

The name of the organization shall be the **Philippine Society of Agricultural and Biosystems Engineers (PSABE), Inc.** and shall be referred to as **PSABE**.
(As amended on April 27, 2017)

A member PSABE of good standing for at least 10 years with exemplary professional distinction or with outstanding and extraordinary qualifications and experiences in the field of ABE.

- a. Regular member
- b. Fellow
- c. Honorary member
- d. Institutional member

A member PSABE of good standing for at least 10 years with exemplary professional distinction or with outstanding and extraordinary qualifications and experiences in the field of ABE.

- a. Regular member
- b. Fellow**
- c. Honorary member
- d. Institutional member

PSABE

Classification of Membership

- a) **Regular Member** - An Agricultural Engineer or Agricultural and Biosystems Engineer duly registered with the Professional Regulation Commission (PRC) and is in good standing.
- b) **Fellow** - A Member of Good standing for at least 10 years with exemplary professional distinction or with outstanding and extraordinary qualifications and experiences in the field of agricultural and Biosystems engineering. Not more than (2) fellows shall be elected for each year.

PSABE

Classification of Membership

- c) **Honorary Member** - A person of acknowledged professional eminence and whose accomplishments have relevance to the agricultural and biosystems engineering profession and of exemplary significance to human well-being; a person supportive to the cause, ideals and undertakings of the PSABE. Only one person shall be elected as honorary member for each year. An honorary member shall enjoy the rights and privileges of a regular member of the PSABE except that he/she is neither allowed to vote nor eligible to run for election in the Board of Trustees.

PSABE

Classification of Membership

- d) **Institutional member** - A corporation, company, firm, government agency, school, college or university engaged in agricultural and biosystems engineering activities. The institution which has been accepted as member shall be represented by its chief executive officer or its duly authorized representative.

Definition of Terms

Agricultural and Biosystems Engineering

- refers to the application of engineering science and designs to the processes and systems involved in the sustainable production, post-production and processing of safe food, feed, fiber, timber and other agricultural and biological materials and the efficient utilization, conservation, and management of natural and renewable resources in order to enhance human health in harmony with the environment.

Agricultural and biosystems consist of crops, forestry and other plants, poultry, livestock, fisheries and aquaculture resources and other animals, wildlife and other living things;

Definition of Terms

Agricultural and Biosystems Engineer

- refers to a person who is registered and licensed to practice agricultural and biosystems engineering in the country and who holds a valid certificate of registration and professional identification card from the Board of Agricultural and Biosystems Engineering and the PRC;

Definition of Terms

Agricultural and Biosystems Power and Machinery

- refers to farm power and machinery for the production, harvesting, processing, storage, manufacture, preserving, transporting and distribution of agricultural and biological products/materials and includes, but is not limited to, tractors and their attachments, power tillers, seeders, transplanters, windmills, harvesting machines, crop protection and maintenance equipment, irrigation equipment and accessories, greenhouses and other thermal conditioning equipment, livestock, poultry, fishery and forest equipment, slaughtering equipment, meat/fishery and crop processing equipment, post harvest machines such as milling machines, dryers, threshers, grain and other strippers, agricultural transport machinery and storage;

Definition of Terms

Agricultural and Biosystems Buildings and Structures

- refer to buildings and structures for the production, harvesting, processing, storage, manufacture, preserving, transporting and distribution of agricultural and biological products/materials and includes, but is not limited to, silos and its components, agricultural and biosystems machinery and equipment sheds, farm houses, green/screen houses, poultry houses, piggery houses, slaughterhouses, farm-to-market roads, farm bridges, agricultural and biological products storage/warehouse, buildings and structures for poultry, livestock, fishery, and forestry production and processing, kiln drying and lumber treatment structure, farm equipment, farm supplies, and other structures such as self-feeders, and soil and water conservation structures:

Definition of Terms

Agricultural and Bio-Processing

- refers to local activity or series of activities to maintain or raise the quality or change the form or characteristics of agricultural, fishery, forestry and biological products/materials and includes, but is not limited to, cleaning, sorting, grading, treating, drying, dehydrating, grinding, mixing, milling, canning, dressing, slaughtering, freezing, pasteurizing, conditioning, packaging, repacking, transporting of agricultural, fishery, forestry and other biological products/materials;

Definition of Terms

Agricultural and Biological Waste Utilization and Management
- refers to the development of systems, processes, and equipment for agricultural waste disposal and utilization and environment-friendly technologies such as, but is not limited to, compost plants, biogas plants, biomass utilization technologies, systems and processes;

Definition of Terms

Agricultural and Bio-Information System

- refers to utilization of information systems, database, and other information management tools for agricultural use, biological systems modeling to understand the mutual response between life and the environment; and application of Geographic Information System (GIS) technology for inventory, analysis, and management of agricultural and biological resources, and remote sensing technology for observation and examination of the landscape and its local forms and agricultural activities;

Definition of Terms

Agricultural and Biosystems Automation and Instrumentation

- refers to the use and application of agricultural and biosystems sensors such as, but is not limited to, computer models for control and automation in the agricultural and fishery production industry and the biological systems and likewise, robotics for farm operation **when use of machines are difficult or impossible**, agricultural and biosystems machine design and automated controls, precision farming systems, agricultural safety and controlled-environment agriculture; and the development and application of metrology equipment such as moisture meters, weighing scale and other metrology equipment;

Definition of Terms

Agricultural and Biosystems Resource Conservation and Management

- refers to measures of conservation and proper management of agricultural and biological resources such as, but is not limited to, area development for agriculture, settlement and recreation; parks and plant nurseries; beneficial ecosystem of life and environment; study and analysis of agricultural system as an integrated component of landscape; monitoring and conservation of natural resources; rehabilitation of forest, lakes, rivers and idle lands; and the sustainable development, management, and exploitation of the agricultural ecosystem;

It is referred to as the "Commission" in RA 10915, the government agency described under Republic Act No. 8981

- a. Commission on Higher Education
- b. Securities Exchange Commission

Scope of Practice

1. Preparation of engineering designs, plans, specifications, project studies, feasibility studies and estimates of irrigation and drainage, soil and water conservation and management systems and facilities, agrometeorological systems, agricultural and biosystems power, and machinery, agricultural and biosystems buildings and structures, renewable/bio-energy systems and farm electrification, agricultural and bio-processing and post harvest facilities and system, agricultural and biological waste utilization and management, agricultural and bio-information system, agricultural and biosystems resource conservation and management, and agricultural and bio-automation and instrumentation system;

Scope of Practice

2. **Supervision or management** on the construction, operation, and maintenance of irrigation and drainage, soil and water conservation and management systems and facilities, agrometeorological systems, agricultural and biosystems power and machinery, agricultural and biosystems buildings and structures, renewable/bio-energy systems and farm electrification, agricultural and bio-processing and post harvest facilities and system, agricultural and biological waste utilization and management, agricultural and bio-information system, agricultural and biosystems resource conservation and management, and agricultural and bio-automation and instrumentation system;

Scope of Practice

3. Valuation, appraisal, investigation, inspection, monitoring, and technical audit on agricultural and biosystems machineries and equipment, structures and facilities, and agricultural and biosystems engineering projects;
4. Program/Project development and management, planning, evaluation, and consultancy services on agricultural and biosystems engineering undertakings;
5. Conduct of research and development, training and extension on agricultural and biosystems engineering;
6. Testing, evaluation, and inspection of agricultural and biosystems machinery, and other related agricultural and biosystems engineering facilities, equipment and projects;

Scope of Practice

7. **Manufacture, distribution, installation, and sale** of agricultural and biosystems machinery and other related agricultural and biosystems engineering facilities and equipment;
8. **Teaching and/or conduct** of lecture of agricultural and biosystems engineering subjects in institutions of learning in the Philippines;
9. **Preparation and evaluation** of farm development plans, farm suitability maps and land use maps/reports for agricultural, livestock and poultry, fishery, aquaculture and forest production and processing;
10. **Training and supervision** of agri-fishery machinery technicians and operators of agri-fishery machinery service centers/pools, and agricultural and biosystems engineering technicians and operators in agricultural and biosystems plants, establishments, facilities, and projects;

Scope of Practice

11. Employment with the government and private firms and establishments; Provided, That **such item or position requires the knowledge and expertise of an Agricultural and Biosystems Engineer**, or its **duties and responsibilities covers the scope of practice** in agricultural and biosystems engineering; and

12. Participation in the preparation of environmental studies for agricultural, fisheries, agro-industrial and biosystems projects and its monitoring under the Environmental Impact Assessment (EIA) system.

PRC/PRBABE

Professional Regulatory
Board of Agricultural and
Biosystems Engineering

- Created under the Article II of RA 10915

Board Composition

ARIODEAR C. RICO
Chairman

CAESAR JOVENTINO M. TADO
Member

SHERWIN O. VALDEZ
Member

Qualifications of Members of the Board

- Must be a Filipino citizen and resident of the Philippines;
- Must be at least thirty-five (35) years of age;
- Must be a holder of Bachelor's Degree in Agricultural and Biosystems Engineering, Agricultural Engineering or its equivalent, conferred by a school, academy, college or university in the Philippines or abroad which is accredited or recognized by the CHED;

Qualifications of Members of the Board

- A registered Agricultural and Biosystems Engineer with a valid professional license and an active practitioner for not less than ten (10) years prior to his/her appointment;
- Must not, for a period of three (3) consecutive years prior to the appointment, be a member of the faculty of, directly or indirectly, any school, academy, institute, college or university where a regular course in Agricultural Engineering or Agricultural and Biosystems Engineering is being taught; or have any pecuniary interest, directly or indirectly, in or administrative supervision over any such institutions of learning;

Qualifications of Members of the Board

- Must not, for a period of three (3) consecutive years prior to the appointment, be connected with a review center or any group or association where review classes or lectures in preparation for the licensure examination are offered or conducted at the time of appointment;
- Must be a member in good standing of the AIPO for at least five (5) years, but not an incumbent officer or trustee thereof; and
- Has never been convicted of any offense involving moral turpitude.

Powers and Duties of the Board

- Promulgate and adopt the rules and regulations necessary for carrying out the provisions of this Act;
- Supervise the registration, licensure and practice of agricultural and biosystems engineering in the Philippines;
- Administer oaths of successful examinees entering the practice of agricultural and biosystems engineering;

Powers and Duties of the Board

- Issue the certificate of registration to successful examinees;
- Issue, suspend or revoke the license for the practice of agricultural and biosystems engineering profession;
- Adopt an official seal of the Board;

PROFESSIONAL REGULATORY BOARD OF
AGRICULTURAL AND BIOSYSTEMS ENGINEERING

RESOLUTION NO. 04
Series of 2024

ISSUANCE, ADOPTION, AND PROMULGATION OF THE TABLE OF
SPECIFICATIONS FOR THE SUBJECTS IN THE LICENSURE EXAMINATION
FOR AGRICULTURAL AND BIOSYSTEMS ENGINEERS

Scope of Examination

- **Agricultural and Biosystems Power, Energy and Machinery Engineering** which include agricultural power and bio-energy, machine design and analysis, machinery management and mechanization of agricultural and bioproduction systems
- **Land and Water Resources Engineering** which include agrometeorology, irrigation and drainage engineering, soil and water conservation, and aquaculture engineering;
- **Agricultural and Biosystems Structures and Environment Engineering** which include agricultural structures engineering, forest engineering, design and management of agricultural and biosystem structures, and bio-environmental design;

Scope of Examination

- **Agricultural and Bioprocess Engineering** which include refrigeration and cold storage, agri-industrial and biosystems application of electrical energy and electronics, agricultural products process engineering, and food and bio-based products process engineering;
- **Project Management, Feasibility Study Preparation/Evaluation, Research, Development and Extension on Agricultural and Biosystems Engineering**
- **Fundamentals of Agricultural, Fishery, Ecological and Environmental Sciences;**
- **Mathematics and Basic Engineering Principles;**
- **Laws, Professional Standards and Ethics; and**
- **Other subjects** within the areas of competencies required for the practice of agricultural and biosystems engineering profession pursuant to Section 5 of this Act.

PRC/PRBABE

Professional Regulatory
Board of Agricultural and
Biosystems Engineering

Registered: Passed the Licensure Examination for ABEs and **whose name appeared on the list of passers** which later on, will be given the Certificate of Registration.

Licensed: A registered ABE with a valid license (for 3 years) to practice the profession.

Basically, **a registered engineer with a valid license.**

Issuance of COR and PIC

Certificate of Registration

Professional Regulatory
Board of Agricultural and
Biosystems Engineering

- payment of fees prescribed by the Commission
- bear the signatures of the Chairperson of the Commission and of the Chairperson and members of the Board
- stamped with the official seal of the Commission and of the Board

Issuance of COR and PIC

Professional Identifications Card (PIC)

Professional Regulatory
Board of Agricultural and
Biosystems Engineering

- payment of fees prescribed by the Commission
- bears the registration number and its validity and expiry dates
- duly signed by the Chairperson of the Commission
- submitted a certificate of membership in good standing from the AIPO
- proof of completion of the CPD requirements

Issuance of COR and PIC

License Renewal

The PIC card is only valid for 3 years
Upon renewal, the following are required;

Professional Regulatory
Board of Agricultural and
Biosystems Engineering

👉 PRC ID Renewal Requirements

To renew your PRC ID, you need to submit the following documents:

- Printed copy of the accomplished application form
- One passport-size photo on white background with your full name tag
- Continuing Professional Development (CPD) units earned
- For authorized representative filing the renewal and/or claiming the PRC ID:
 - Special Power of Attorney
 - Valid ID of the professional and representative
- For PRC-registered professionals standing as representative:
 - Authorization Letter
 - PRC ID
 - Updated certification of good standing from the Accredited Professional Organization (APO)

Seal of the Board

Professional Regulatory
Board of Agricultural and
Biosystems Engineering

Pursuant to PRBABE Resolution No. 06 (s 2018),

- The seal of the Board shall be dodecagon in shape with 48 mm diameter, drawn with inner circle measuring 32 mm in diameter.
- The upper part of the annular space with gold color bears the words PROFESSIONAL REGULATORY BOARD OF AGRICULTURAL AND BIOSYSTEMS ENGINEERING and the lower half the words PROFESSIONAL REGULATION COMMISSION.

Seal of the Board

Professional Regulatory
Board of Agricultural and
Biosystems Engineering

- Pursuant to PRBABE Resolution No. 06 (s 2018),
- The inner circle space in white color has the representation of a globe with a light blue droplet of water at its portion and display “1964” which is the year of enactment of RA No. 3927, the first Philippine Agricultural Engineering Law,
 - both sides each drawn a plant with seven (7) leaves in emerald green color.

Seal of the Board

Professional Regulatory
Board of Agricultural and
Biosystems Engineering

- Pursuant to PRBABE Resolution No. 06 (s 2018),
- The earth, droplet of water and plant leaves represent AGRICULTURAL AND BIOSYSTEMS ENGINEERING.
 - The twelve (12) sides of the dodecagon represent the 12 scopes of practice of Agricultural and Biosystems Engineering while the 14 leaves of the plant represent the specializations of Agricultural and Biosystems Engineering.

Signing and Sealing

Each registrant shall, upon registration, obtain a seal of such design as the Board may adopt and prescribe.

Plans and specifications prepared by, or under the direct supervision of a registered agricultural and biosystems engineer, shall be stamped with said seal during the validity of the professional license.

No person shall stamp or seal any document with the seal of a registrant after his/her professional license has expired or lost its validity unless he/she has been reinstated to the practice and/or unless his/her license has been renewed.

Signing and Sealing

No officer or employee of the government, chartered cities, provinces and municipalities now or hereinafter charged with the enforcement of laws, ordinances or regulations relating to the implementation, construction, repair, operation and maintenance, testing and evaluation of agricultural and biosystems buildings, structures, machineries and equipment, irrigation, soil and water conservation structures and other agricultural and biosystems engineering facilities, shall accept or endorse any plans, designs, specifications or project studies which have not been prepared and submitted in full accord with the provisions of this Act, nor shall any payment be approved by any such Officer for any work, the plans and specifications of which have not been so prepared, signed and sealed by a duly registered agricultural and biosystems engineer.

Signing and Sealing

This provision shall be implemented by the Department of Public Works and Highways (DPWH) and Local Building Officials in the issuance of building permits and certificate of occupancy under the National Building Code, and by all concerned national government entities and local government units (LGUs) in the procurement and in the discharge of their regulatory and auditing functions pertaining to agricultural and biosystems buildings, structures, machineries and equipment, irrigation, soil and water conservation structures, and other agricultural and biosystems engineering facilities/projects.

Signing and Sealing

No agricultural and biosystems engineer shall sign his/her name, affix his/her seal or use any other method of signature on plans, designs, specifications or other documents made by or under another agricultural and biosystems engineer's supervision unless the same is made in such manner as to clearly indicate the part of such work actually performed by him/her, and no person, except the agricultural and biosystems engineer-in-charge shall sign for any branch of the work or any function of agricultural and biosystems engineering practice not actually performed by him/her.

The agricultural and biosystems engineer-in-charge shall be fully responsible for all plans, designs, specifications and other documents issued under his/her seal or authorized signature.

Signing and Sealing

Drawings, plans, designs and specifications duly signed, stamped or sealed as instruments of service are the **property and documents of the agricultural and biosystems engineer**, whether the projects for which they were made is executed or not.

No person without the written consent of the agricultural and biosystems engineer or author of said documents, **shall duplicate or make copies** of said documents for use in the repetition of and for other projects, whether executed partly or in whole.

Signing and Sealing

All drawings, plans, specifications and other documents and reports to be used for the design, construction, test and evaluation, research and extension of agricultural and biosystems buildings, structures, machineries and equipment, irrigation, soil and water conservation structures and other agricultural and biosystems engineering facilities/projects **shall be signed and sealed by a licensed agricultural and biosystems engineer.**

Signing and Sealing

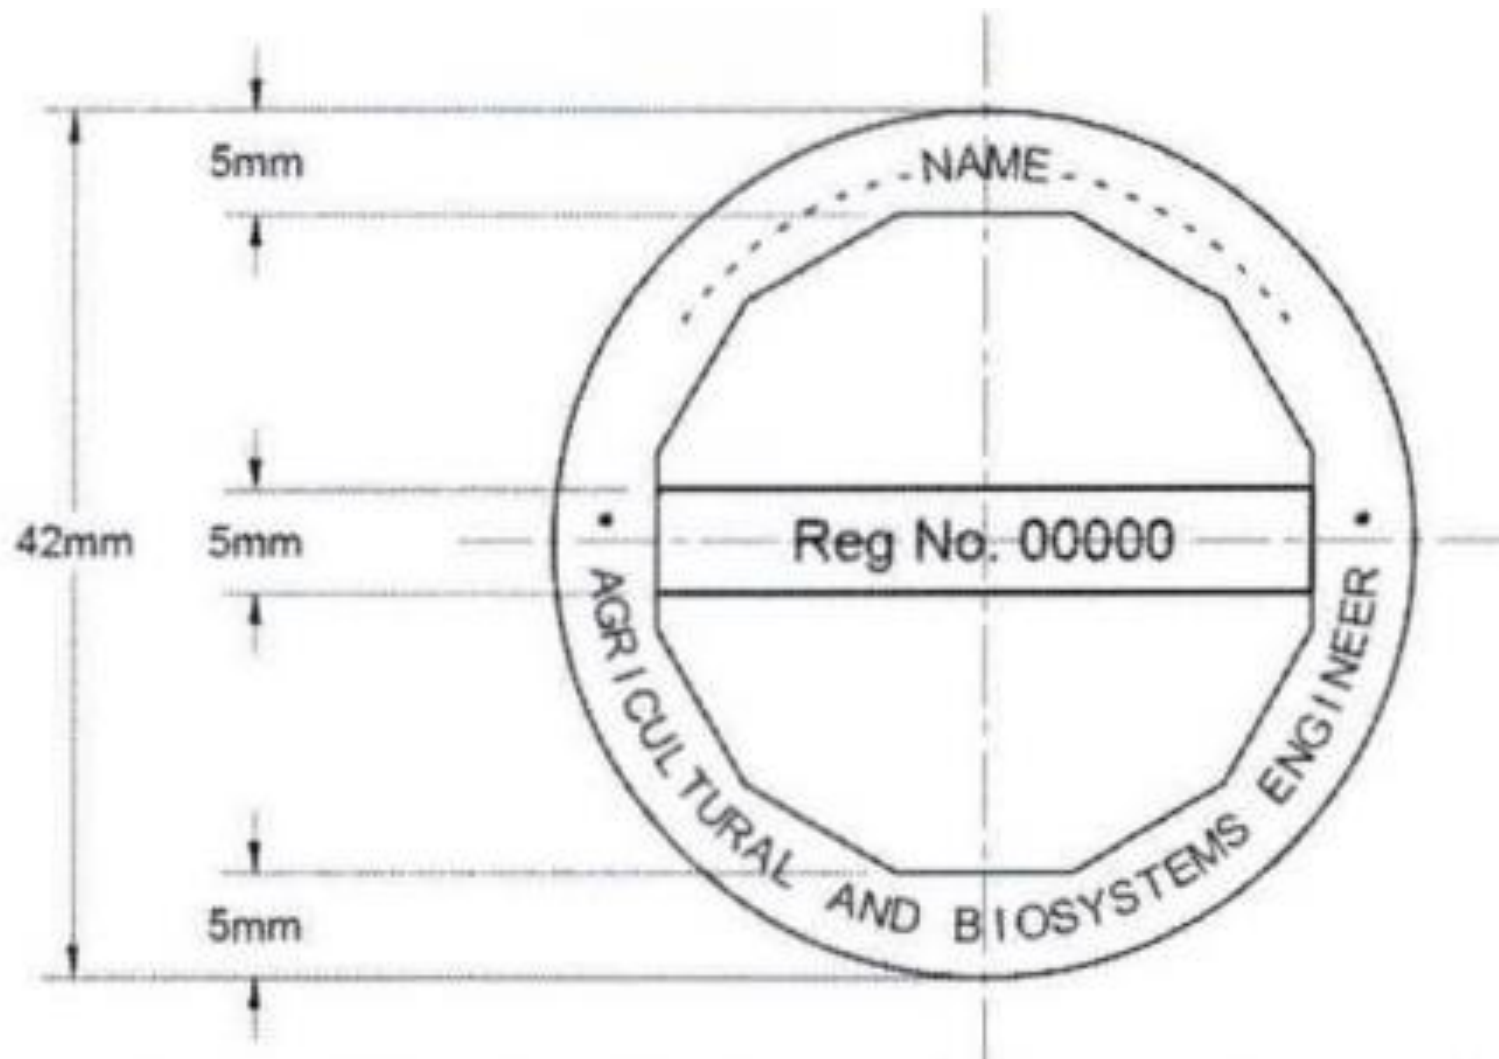

Indication of License Number and Professional Tax Receipt Number

The agricultural and biosystems engineer shall be required to indicate his/her

- professional license number,
- the duration of its validity,
- including the professional tax receipt number

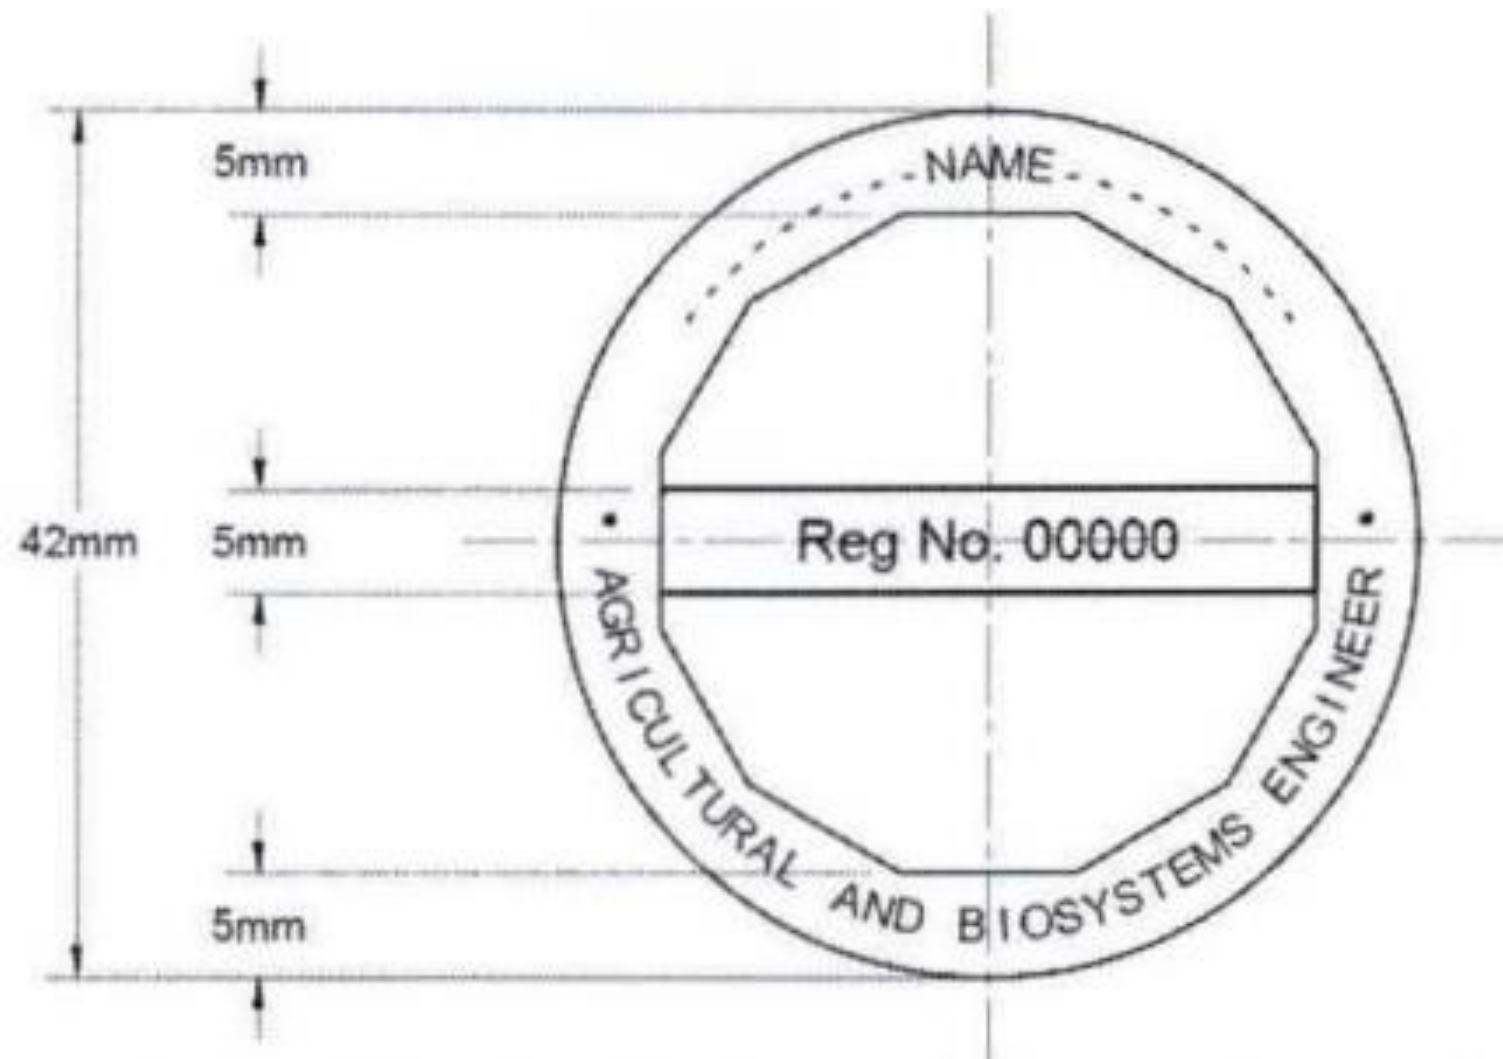

on the documents he/she signs, uses or issues in connection with the practice of his/her profession.

Seal of an Agricultural and Biosystems Engineer

- shall be circular in shape with 42mm diameter, drawn with dodecagon 5 mm inward measured from circumference to one of its sides. Top and bottom sides of the dodecagon shall rest horizontally straight.
- A 5 mm width rectangular band shall be drawn horizontally across the middle part of the seal with end points resting on the dodecagon.
- The name of the Agricultural and Biosystems Engineer shall be written, all in capital letters, at the upper part of the seal, middle center in between the circle and the dodecagon. Two dots shall be placed before and after the last name.

Seal of an Agricultural and Biosystems Engineer

- The words 'AGRICULTURAL AND BIOSYSTEMS ENGINEER" shall be written at the lower part of the seal middle center in between the circle and the polygon.
- The COR number shall be printed inside the rectangle at readable scale.
- The sides of the dodecagon represent the **twelve (12) functional scopes of practice** of Agricultural and Biosystems Engineer enumerated under Section 5 of RA No. 10915.

The IRR OF ABE Law

 - (3) Standards Regulation and Enforcement; and
 - (4) Administration and Finance.
- Mandate:
 - ✓ To oversee the overall planning, implementation, monitoring, and evaluation of the agriculture and fisheries mechanization and infrastructure development
 - ✓ Monitor the implementation of the National Agricultural and Fisheries Modernization Plan of the Department of

Bureau of Agricultural and Fisheries Engineering

Heads of the Bureau

Engr. ARIODEAR C. RICO

Director

Tel. No.: (02) 8351-8120 / (02) 8294-9741

E-mail: bafe.director@bafe.da.gov.ph

Engr. JUANA T. TAPEL

Assistant Director

Tel. No.: (02) 8351-8120 / (02) 8294-9741

E-mail: assistant.director@bafe.da.gov.ph

Engr. Jackielou L. Paches

Bureau of Agricultural and Fisheries Engineering

MISSION

To provide technical and regulatory engineering services that are innovative, safe, and responsive to the needs of the farmers and fisherfolks and other related industry players by engaging competent and dedicated professionals, ensuring, access to modern engineering technologies and design, and creating viable partnership with all stakeholders.

VISION

BAFE as the Department of Agriculture's central engineering arm ensures the effective and efficient implementation of mechanization and infrastructure interventions that will modernized the agriculture and fisheries sector, thus facilitating the sustainable increase in its productivity and competitiveness.

BAFE: Functions and Responsibilities

- (a) Coordinate, oversee and monitor the national planning and implementation of agri- fisheries engineering, farm-to-market road and other agri-fisheries infrastructure projects;
- (b) Assist in the national planning, coordination and implementation of the national agri- fisheries mechanization programs;
- (c) Prepare, evaluate, validate and recommend engineering plans, designs and technical specifications on agri-fisheries mechanization and infrastructure projects;
- (d) Oversee and provide technical assistance to the operations of the agricultural engineering divisions of the DA regional field units;

BAFE: Functions and Responsibilities

- (e) Coordinate and integrate all agricultural and fisheries engineering activities of the DA bureaus, attached agencies and corporations;
- (f) Coordinate and monitor the enforcement of standards and other regulatory policies on agricultural and fishery engineering;
- (g) Implement accreditation and registration scheme for agriculture and fishery machinery, tools and equipment, in coordination with technology generators:
- (h) Issue permits to operate to agriculture and fishery tools and equipment manufacturers, fabricators, assemblers and importers; and
- (i) Promulgate and implement accreditation guidelines for testing centers.

BAFE: Services

LIST OF ISSUED CERTIFICATE OF CONFORMITY FOR AGRICULTURAL AND FISHERIES MACHINERIES

Bureau of Agriculture and Fisheries Standards

- Created by virtue of RA 8435 known as AFMA Law
- Formerly as Bureau of Agriculture and Fisheries Product Standards (BAFPS) established on December 4, 1998 through AO No. 7 Series of 1998.

Bureau of Agriculture and Fisheries Standards

- Administrative Order No. 17 series of 1998 enumerates BAFPS' powers and functions as defined in Section 63 of RA 8435, which are:
 - ✓ Formulate and enforce standards of quality in the processing, preservation, packaging, labeling, importation, exportation, distribution, and advertising of agriculture, livestock, fisheries and aquaculture products;
 - ✓ Conduct research on product standardization, and alignment of the local standards with the international standards; and,
 - ✓ Conduct regular inspection of processing plants, storage facilities, abattoirs, as well as public and private markets in order to ensure freshness, safety and quality of products.

Bureau of Agriculture and Fisheries Standards

**WE HAVE DEVELOPED A TOTAL OF
379 PHILIPPINE NATIONAL STANDARD (PNS)
FROM 2003 TO 2024!**

Why we develop Standards?

The Bureau of Agriculture and Fisheries Standards (BAFS) of the Department of Agriculture is mandated to develop and promote standards to ensure food safety, quality, worker's health and welfare, environmental management, and global competitiveness of Philippine agriculture and fishery products.

Bureau of Agriculture and Fisheries Standards

Mission

- ✓ The BAFS commits to develop and promote agricultural and fishery standards, and enforce organic agriculture regulations ensuring customers' safety and product quality, contributing to environmental protection, worker's welfare and enhanced market access

Vision

- ✓ By 2025, the BAFS envisions to be the trusted agency for the development of agricultural and fishery standards within ASEAN, and in the enforcement of the agriculture regulations

Bureau of Agriculture and Fisheries Standards

Mandates

- ✓ Republic Act No. 8435 Agriculture & Fisheries Modernization Act (AFMA - 1997)
- ✓ Organic Agriculture Act of 2010 as amended by the Republic Act No. 11511
- ✓ Republic Act No. 10601. Agricultural & Fisheries Mechanization Law (AFMech - 2013)
- ✓ Republic Act No. 10611. Food Safety Act (FSA - 2013)
- ✓ Republic Act. No. 10817. Philippine Halal Export Development and Promotion Act (PHEDPA - 2016)

Bureau of Agriculture and Fisheries Standards

Mandates

- ✓ Republic Act No. 8435
- Formulate and enforce standards of quality in the processing, preservation, packaging, labelling, importation, exportation, distribution and advertising of Agricultural And Fisheries Products;
- Conduct research on product standardization, alignment of local standards with international standards; and
- Conduct regular inspection of processing plants, storage facilities, abattoirs, as well as public and private markets to ensure freshness, safety and quality of products.

Bureau of Agriculture and Fisheries Standards

Mandates

- ✓ Organic Agriculture Act of 2010 as amended by the Republic Act No. 11511
 - Issue accreditation to: (a) third-party organic certifying bodies, (b) PGS groups, (c) private group or organization actually engaged in organic agriculture as direct farm producer, promoter/advocate, or as marketer of organic agriculture produce—collectively called as “organic certifying bodies (OCBs)” to provide certification to organic management system (farms, etc.);
 - Certify five (5) individual farms as a core PGS Group;
 - Conduct inspections on compliance of PGS groups with the Philippine National Standards for Organic Agriculture;

Bureau of Agriculture and Fisheries Standards

Mandates

- ✓ Organic Agriculture Act of 2010 as amended by the Republic Act No. 11511
 - Issue registration on integrated organic farms, organic input producers, and organic inputs such as organic soil amendments (OSA) and organic biocontrol agents (OBICA);
 - Rule on the appeal of farm/farmowner/core PGS groups on decision made by organic certifying bodies;
 - Conduct monitoring and post-market surveillance of registered organic input producers, organic farms, and organic inputs to ensure enforcement of the labeling requirements of the law;

Bureau of Agriculture and Fisheries Standards

Mandates

- ✓ Organic Agriculture Act of 2010 as amended by the Republic Act No. 11511
- Conduct random inspections to ensure that PGS groups are all compliant with the Philippine National Standards on organic agriculture;
- Maintain national database of core PGS groups (from submitted registry of municipal/city PGS groups);
- Develop guidelines for certification of farms under PGS, guidelines for accreditation of PGS groups, guidelines for sanctions on non-compliances of certified PGS members; and

Bureau of Agriculture and Fisheries Standards

Mandates

- ✓ Republic Act No. 10601. Agricultural & Fisheries Mechanization Law
- Develop standards, specifications and test procedures of agricultural and fishery machinery and equipment, together with DTI, DOST, Board of Agricultural Engineering (BoAE) – PRC, and Agricultural Machinery Testing and Evaluation Center (AMTEC).

Bureau of Agriculture and Fisheries Standards

Mandates

- ✓ Republic Act No. 10611. Food Safety Act (FSA - 2013)
 - Develop food safety standards including those for organic agriculture; and
 - Establish Mechanisms for the development of science-based food safety standards for fresh plant, animal, fisheries and agriculture food.

Bureau of Agriculture and Fisheries Standards

Mandates

- ✓ Republic Act. No. 10817. Philippine Halal Export Development and Promotion Act (PHEDPA - 2016)
- Develop the Philippine National Standards for Halal for primary and post-harvest food.

Bureau of Agriculture and Fisheries Standards

Heads of the Bureau

Name	Position	Office
Dir. Karen Kristine A. Roscom, PhD	Director	Office of the Director
Ms. Mary Grace R. Mandigma	Assistant Director-Designate and concurrent Division Chief, TSD	Office of the Assistant Director
John Gregory V. Aquino	OIC, Division Chief	Standards Development Division
Ms. Mary Grace R. Mandigma	Division Chief	Technical Services Division
Mark F. Matubang	OIC, Division Chief	Organic Agriculture Division
Ms. Edna Lynn C. Floresca	Division Chief	Standards Research Division

Engr. Jackielou L. Paches

Agricultural Machinery Testing and Evaluation Center

- ✓ In 11 July 1977, the Agricultural Machinery Testing and Evaluation Center (AMTEC) was established by virtue of a Memorandum of Agreement between the Department of Agriculture (DA) and the University of the Philippines Los Banos (UPLB).
- ✓ Pursuant to the Agricultural and Fisheries Mechanization (AFMech) Law of 2013 (RA 10601) , AMTEC was designated as the **premiere and reference testing center of agricultural and fisheries machineries in the country.**

Agricultural Machinery Testing and Evaluation Center

Mandate

- To assist BAFS in establishing standard specifications, test procedures and performance indices for agricultural machinery;
- To conduct test and evaluation of agricultural machinery;
- To publish and disseminate test standards and tests results; and
- To provide technical assistance in the establishment and operation of the testing centers in the country.

Agricultural Machinery Testing and Evaluation Center

AGRICULTURAL MACHINERY TESTING AND EVALUATION CENTER

College of Engineering & Agro-Industrial Technology, University of the
Philippines Los Baños, College, Laguna, PH 4031

Email: amtec.uplb@up.edu.ph

Facebook: [Agricultural Machinery Testing and Evaluation Center](https://www.facebook.com/AgriculturalMachineryTestingandEvaluationCenter)

Contact Numbers: (049 253 4956/ +63 917 156 1059/ +63 921 400

Agricultural Machinery Testing and Evaluation Center

ORGANIZATIONAL STRUCTURE

The Agricultural Machinery Testing and Evaluation Center is composed of six (6) divisions:

1. Testing and Evaluation Division
2. Training, Extension, and Information Dissemination Division
3. Research and Standards Development Division
4. Institutional Development and Linkages Division
5. General Services Division
6. Administrative Services Division

BAFE/BAFS/AMTEC

Agencies like DA, DA-BAFE, DA-BAFS, AMTEC alongside other DA attached agencies works together to implement the mandates brought by the enactment of RA 10601, 10915, and other related laws

BAFE/BAFS/AMTEC

Other attached bureaus, agencies, and corporations of the Department of Agriculture

BUREAUS

- ▶ Agricultural Training Institute
- ▶ Bureau of Agricultural and Fisheries Engineering
- ▶ Bureau of Agriculture and Fisheries Standards
- ▶ Bureau of Animal Industry
- ▶ Bureau of Agricultural Research
- ▶ Bureau of Fisheries and Aquatic Resources
- ▶ Bureau of Plant Industry
- ▶ Bureau of Soils and Water Management
- ▶ Philippine Rubber Research Institute

ATTACHED AGENCIES

- ▶ Agricultural Credit Policy Council
- ▶ Fertilizer and Pesticide Authority
- ▶ National Fisheries Research and Development Institute
- ▶ National Meat Inspection Service
- ▶ Philippine Carabao Center
- ▶ Philippine Center for Postharvest Development and Mechanization
- ▶ Philippine Council for Agriculture and Fisheries
- ▶ Philippine Fiber Industry Development Authority

ATTACHED CORPORATIONS

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

Year AMTEC was established? 1977

Official AMTEC testing started? 1982

Year that DA required that all their machinery procurement shall pass AMTEC Test? 1993

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

Year AMTEC was fully administered by UPLB? 1996

Type of AF machinery testing conducted?

- Commercial
- Acceptance
- Confirmatory
- Prototype

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

Type of AF machinery testing conducted?

- **Commercial**

These are the tests conducted on the commercial machines available in the market. With the full implementation of the RA 10601 or AFMECH Law, all machines to be sold in the market should be tested.

- Acceptance
- Confirmatory
- Prototype

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

Type of AF machinery testing conducted?

- Commercial
- Acceptance

These are the tests conducted when a machine is to be accepted by the end users

- Confirmatory
- Prototype

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

Type of AF machinery testing conducted?

- Commercial
- Acceptance
- Confirmatory

These are the tests conducted after the machine were delivered and being used by the end-users. The objective of the tests is to determine if the machine delivered is the same machine tested.

- Prototype

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

Type of AF machinery testing conducted?

- Commercial
- Acceptance
- Confirmatory
- **Prototype**
 - machines still in developmental stage.
 - Series of test until all the initial design considerations are met.

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

The advisory committee for agricultural and fisheries machinery testing and evaluation in the Philippines?

Testing and Evaluation Accreditation Advisory Committee (TEAAC)

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

TEAAC Composition

Department Circular No. 05, s. 2017 (as amended by DC No. 10, Series of 2018)

- Bureau of Agriculture and Fisheries Standards (BAFS)
- Philippine Council for Agriculture and Fisheries (PCAF)
- Professional Regulatory Board of Agricultural and Biosystems Engineering
- Philippine Society of Agricultural and Biosystems Engineers (PSABE)
- UPLB-AMTEC
- Other concerned agencies may be invited when deemed necessary.

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

Reconstitution of the TEAAC

Department Circular No. 05, s. 2017 (as amended by DC No. 10, Series of 2018)

- UPLB-AMTEC acts as Chair
- Philippine Society of Agricultural and Biosystems Engineers(PSABE),
- Professional Regulatory Board of Agricultural and Biosystems Engineering, Philippine Center for Postharvest Development and Mechanization, Philippine Council for Agriculture and Fisheries, and
- UPLB-BIOMECH
- Other concerned agencies may be invited when deemed necessary.

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

What is the validity of an AMTEC Test Report?

5 Years

While preliminary test report has a validity of 1 year

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

Renewal Conditions and Validity of a Test Engineer Certification

- The Certification as Test Engineer is valid for three (3) years. If the PRC license expires before the end of the validity, the CTE shall not test any machines until the renewal of the license.
- The CTE shall conduct testing and evaluation of at least two (2) machines per year.
- If the CTE tested less than the required number of machines within the three-year duration, he/she shall retake the exam for quality management purposes

Machinery Testing and Evaluation of Agricultural and Fisheries Machinery

What is the validity of the Certification of Accreditation (CoA) of Machinery Testing Centers?

3 Years

What is the meaning of PTO in AF Machinery Testing? Permit to Operate

Is a privilege granted to any MFADDIEs (Manufacturers, Fabricators, Assemblers, Dealers, Distributors, Importers, and Exporters that have passed the review, inspection, and evaluation conducted by DA-BAFE and DA Regional Agricultural Engineering Division allowed to engage in particular line of activity related to AF Machineries.

The validity of PTO? 5 years (Provisional PTO is 3 months)

Code of Ethics

Ethics is a branch of philosophy that defines what is good for the individual and the society and establishes the nature of obligations, or duties, that people owe themselves and to one another.

The word ethics is derived from the Greek word *ethos*, which means "character," and from the Latin word *mores*, which means "customs."

Code of Ethics

In modern society, it defines how individuals, business professionals, and corporations choose to interact with one another.

The code of ethics is a written system of standards for ethical conduct.

It could express the principles which should govern the professional relations of an [agricultural and biosystems engineer](#) to his client or employer, to the other professionals, and to the public.

Engineering Contracts and Specifications

A contract is a binding agreement that the courts will enforce.

All contracts are agreements but not all agreements are contracts.

Agreements often impose merely a social or moral obligation hence they are not legally enforceable by law.

Engineering Contracts and Specifications

As to origin

Express contract - an agreement that is stated in words, either orally or in writing; (to protect the parties involved; prevent a later disagreement over the terms)

Implied contract - a contract in which the agreement of the parties is inferred from their conduct

Quasi contract – not strictly a contract but a legal obligation imposed to avoid injustice

Engineering Contracts and Specifications

As to obligation status

Bilateral contract - a contract in which both parties exchange promises
e.g. express contract

Unilateral contract – a contract in which only 1 party makes a promise,
e.g. implied contract

Engineering Contracts and Specifications

As to participants

Two-party contract- two parties are involved

Joint contract – two or more parties merge to enter into a contract with another party/ies; each party takes full responsibilities for the conduct and completion of the contract

Several contract - two or more persons enter into a contract as promisors or promises but keep their liability more or less separate

Joint and Several contract – same nature as the two abovementioned types

Third party beneficiary contract - two or more parties enter into a contract for the protection of a third party who is not part of the contract

Engineering Contracts and Specifications

As to legal status

Valid contract – one that meets all the requirements of a binding contract

Void contract – not a contract at all; without legal effect

Voidable contract – a contract capable of being void

Unenforceable contract – valid in all respect except that it is unenforceable through court action

Engineering Contracts and Specifications

As to completion status

Executory contract – the obligations are yet to be performed

Executed contract – all obligations are accomplished upon making the contract; no future obligations follow

Engineering Contracts and Specifications

Essential Elements in a Contract:

- Two parties or more
- Mutual Agreement must be understandable and achievable
- Valuable consideration equally treated
- Obligations must be of legal acts not contrary to the public
- Contract must be set forth based on form and manner of execution

Engineering Contracts and Specifications

Questionable capacity to enter into a contract:

- Infants
- Persons of unsound minds
- Drunken persons
- Persons under legal guardianship
- Corporations
- Convicts
- Enemy aliens
- Foreign countries and their Sovereigns
- Professional persons who are required by law to register and to be

licensed

Technical Specifications

Technical specifications are detailed, exact statement of particulars, especially a statement describing materials, dimensions, and quality of work for something to be built, installed, or manufactured.

It covers almost any phase of industrial activity hence; it must be comprehensive and well-prepared. It is also used to convey the nature of:

- 1) machinery/output
- 2) supplies of material to be furnished, and
- 3) work to be done in a contract.

Technical Specifications

The preparation of such specifications requires an extensive technical knowledge of:

- materials
- processes
- designs
- construction
- cost

Technical Specifications

The responsibility of Agricultural and Biosystems Engineer

- The more general the specifications, the greater responsibility of the engineer.
- As details defined by the specifications, moral & legal responsibility is decreased.
- Standard tests are undertaken to guarantee and lessen the responsibility of the engineer.

Agricultural Mechanization and Related Laws

Agricultural Mechanization is the development, adoption, manufacture and application of appropriate location-specific, and cost-effective agricultural technology using human, animal, mechanical electrical and other non-conventional sources of energy for agricultural production and post-harvest operations consistent with agronomic conditions and for efficient and economic farm management.

Challenges in AgMech in the Country

- Technical Challenges

Inappropriate Technologies; Low Research & Extension capability; High Acquisition Cost

- Socio-Economic Challenges

Low income; Small farm size; Cheap market price; Availability of labor

- Environment/Infrastructure Challenges

Lack of infrastructure; Weak Manufacturing Industry; Environmental Degradation

- Political/Institutional Challenges

Lack/Inconsistent political will

AFMA focuses on the following major concern
EXCEPT:

- a. poverty alleviation and social equity
- b. food security
- c. sustainable development
- d. farm mechanization

AFMA focuses on the following major concern
EXCEPT:

- a. poverty alleviation and social equity
- b. food security
- c. sustainable development
- d. farm mechanization

Agriculture and Fisheries Modernization Law of 1997

“An act prescribing urgent related measure to modernize the agriculture and fisheries sectors of the country in order to enhance their profitability and prepare said sectors for the challenges of globalization through an adequate, focused and rational delivery of necessary support services, appropriating funds therefore and for other purposes.”

- **Republic Act No. 8435**
- Date Approved: **December 22, 1997**
- Effectivity Date: **February 9, 1998**
- Implementing Rules and Regulations: **Department of Agriculture Administrative Order Number 6 Series of 1998** (July 10, 1998)

Agriculture and Fisheries Modernization Law of 1997

Principles of AFMA

Poverty Alleviation and Social Equity

- equitable access to resources, income opportunities, basic and support services and infrastructure

Food Security

- availability, adequacy, accessibility and affordability of food supplies to all at all times

Rational Use of Resources

- assure efficiency and effectiveness in the use of scarce resources

Global Competitiveness

- enhance the competitiveness of the agriculture and fisheries sectors in both domestic and foreign markets

Agriculture and Fisheries Modernization Law of 1997

Principles of AFMA

Sustainable Development

- compatible with the preservation of the ecosystem in areas

People Empowerment

- enabling all citizens to the opportunity to participate in policy formulation and decision-making

Protection from Unfair Competition

- promoting a policy environment that provides them priority access to credit and strengthened cooperative-based marketing system

Agriculture and Fisheries Modernization Law of 1997

Scope of AFMA <https://ap.fttc.org.tw/article/514>

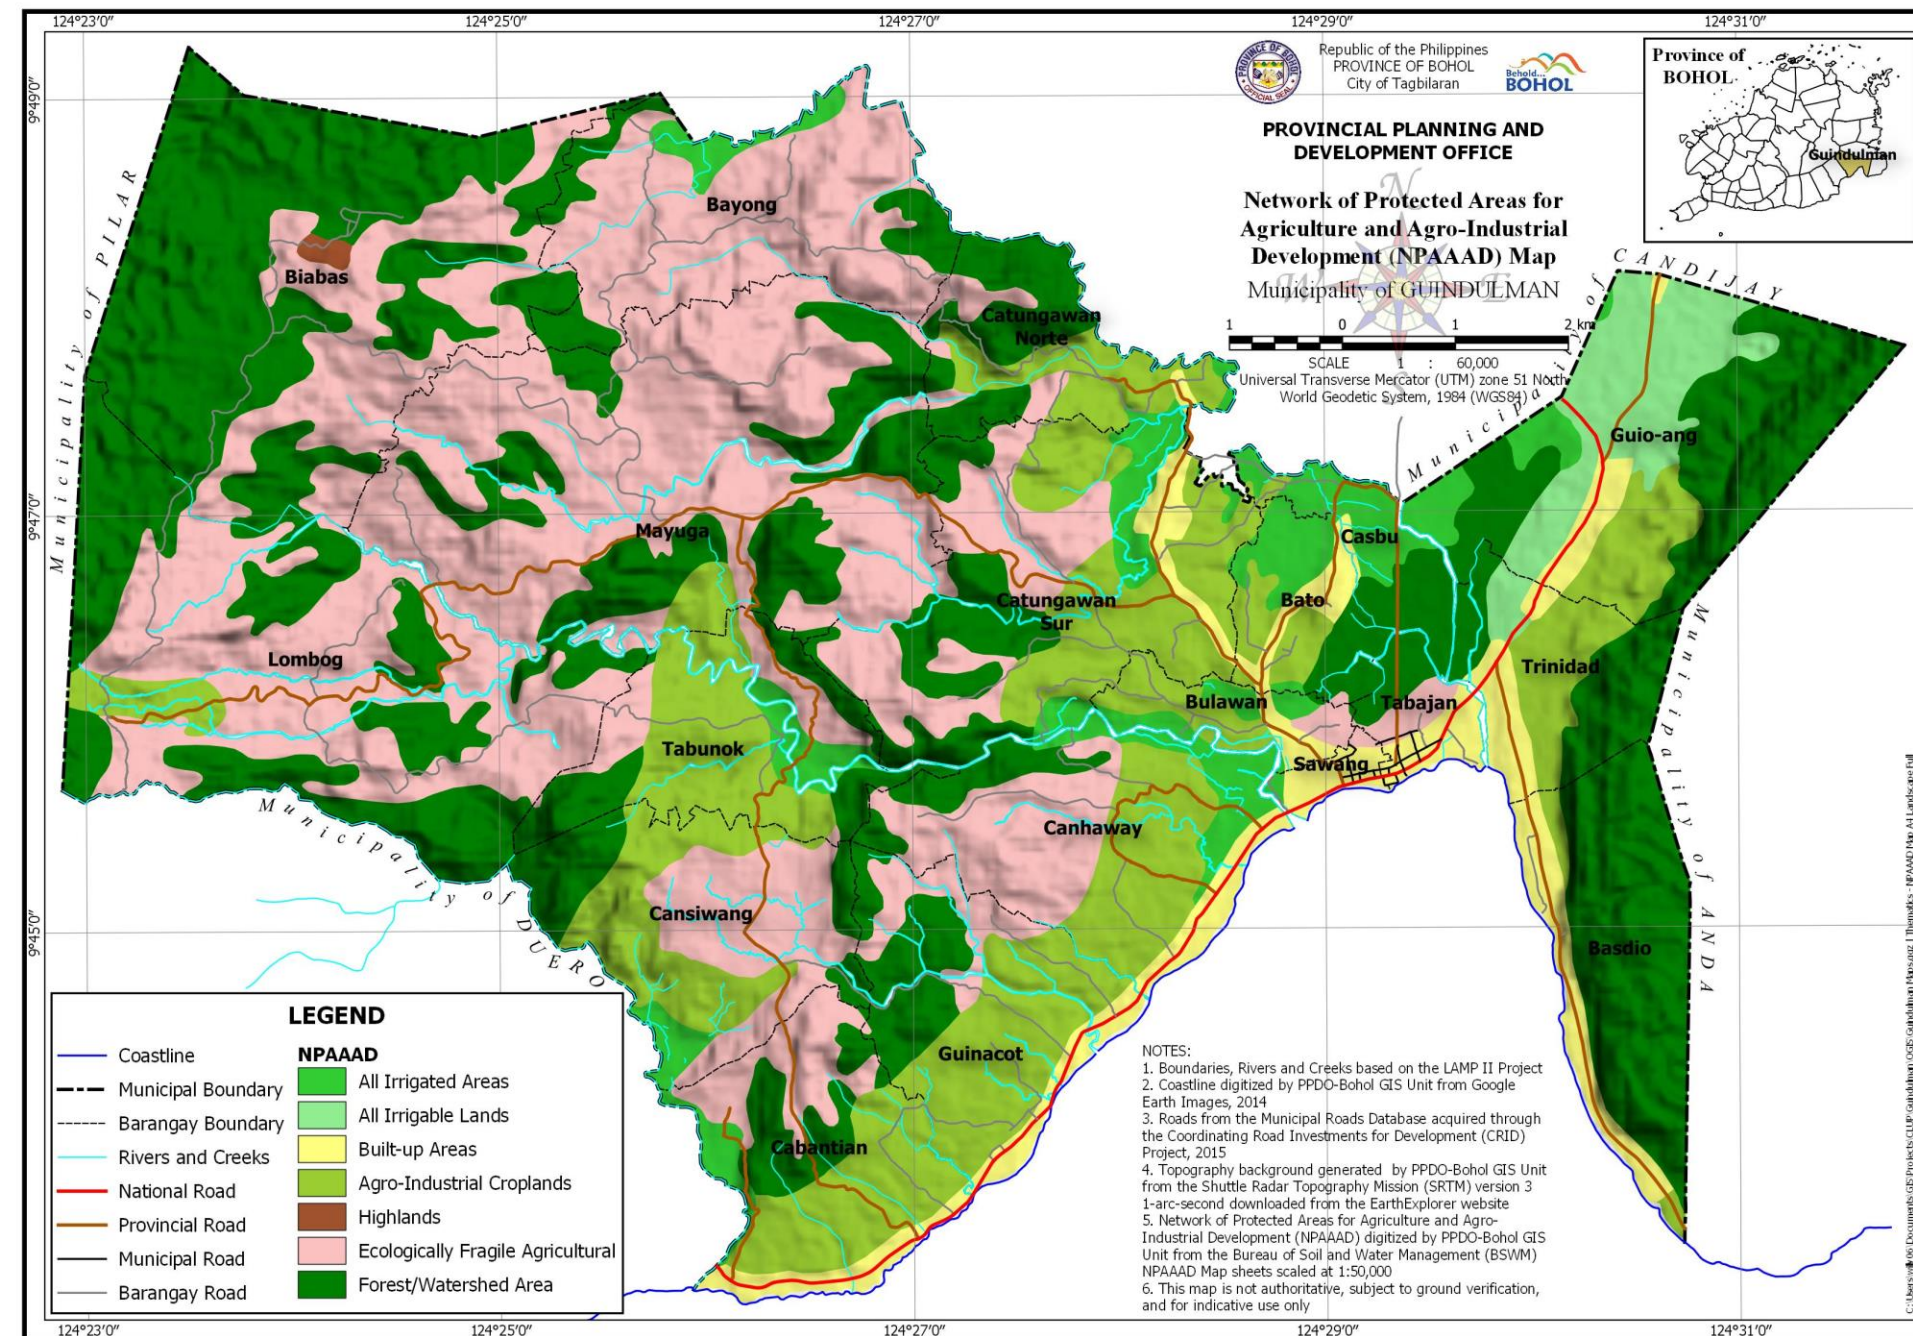

Production and Marketing Support Services

- Identification of SAFDZ within NPAAAD
- Formulation of Agriculture and Fisheries Modernization Plan

For further readings: National Agriculture and Fisheries Modernization and Industrialization Plan 2021-2030 <https://faolex.fao.org/docs/pdf/phi214298.pdf>

- Providing access to credit program
Agricultural Credit Policy Council (ACPC)
- Development of Irrigation System
- Development of National Information Network
- Development of Infrastructures

Agriculture and Fisheries Modernization Law of 1997

Agriculture and Fisheries Modernization Law of 1997

Scope of AFMA <https://ap.fftcc.org.tw/article/514>

Human Resource Development

- Establishment of NAFES
- Development of Continuing Agriculture and Fisheries Education Program

Research and Development

- Consolidation of National Research and Development System in Agriculture and Fisheries

The budget for agriculture and fisheries research and development shall be at least 1% of the Gross Value Added (GVA). At least 20% shall be spent in support of basic research and not more than 80% shall be used for applied research and technology development, of which at least 10% shall be used for technology packaging and transfer activities

Rural Non-Farm Employment

- Institutionalization of Basic Needs Program

Agriculture and Fisheries Modernization Law of 1997

Scope of AFMA <https://ap.fttc.org.tw/article/514>

Trade and Fiscal Incentives

- Priority access to credit
- Promotion of Cooperative-based marketing system
- Granting of Tariff exemption to agribusiness enterprises for importation of inputs, & machineries

General Provisions

Budget appropriations (Php20B (1999) and Php17B in the next six years)
(<https://ap.fttc.org.tw/article/514>)

Agriculture and Fisheries Mechanization Law of 2013

“An act promoting agricultural and fisheries mechanization development in the country.”

Republic Act No. 10601

Date Approved: **June 5, 2013**

Effectivity Date: **June 28, 2013**

Implementing Rules and Regulations: **Department of Agriculture Circular Number 1 Series of 2013** (December 20, 2013)

Agricultural and Fisheries Mechanization refers to the development, adoption, assembly, manufacture and application of appropriate, location specific and cost-effective agricultural and fisheries machinery using human, animal, mechanical, electrical, renewable and other nonconventional sources of energy for agricultural production and postharvest/postproduction operations consistent with agronomic conditions and for efficient and economic farm and fishery management towards modernization of agriculture and fisheries

Agriculture and Fisheries Mechanization Law of 2013

National Agri-Fishery Mechanization Program

- NAFMP serves a guide in the national planning, programming, budgeting, implementation, monitoring, and regulation of Agricultural and Fisheries Mechanization programs and projects
- NAFMP **preparation is spearheaded by BAFE**
- Approved last April 7, 2017

Department of Agriculture Memorandum Order No. 5 series of 2021 (January 11, 2021)

Administrative Order No. 03 Series of 2020

https://un-csam.org/sites/default/files/2020-11/10.%20PPT_Philippines.pdf

Agriculture and Fisheries Mechanization Law of 2013

National Agri-Fishery Mechanization Program

Objectives:

- Promotes and support through provision of research grants, credit...
- Unify, lead, and support efforts...in RDD of AFM
- Establish quality, safety, and performance standards for AFM
- Support the establishment of quality, safety and performance testing centers...
- Establish Guidelines for the registration of ownership of AFM
- Promote the adoption of certified AFM...

Agriculture and Fisheries Mechanization Law of 2013

National Agri-Fishery Mechanization Program

Implementing Institutions

- **Agricultural and Fisheries Mechanization Committee (AFMeC)**

- Provide consultative and feedback mechanism to serve as basis in defining and formulating the goals and scope of AF mechanization programs

- **Bureau of Agricultural and Fisheries Engineering (BAFE)**

- Monitor the implementation of the NAFMP
- Plan, implement, and evaluate the development of agricultural mechanization and infrastructure in the agriculture sector

Agriculture and Fisheries Mechanization Law of 2013

National Agri-Fishery Mechanization Program

Implementing Institutions

- **Philippine Center for Postharvest Development and Mechanization (PHILMech)**

- Lead overall RDE in AF Mechanization

- **Bureau of Agriculture and Fisheries Standards (BAFS)**

- Develop standards for AF machinery

- **Agricultural Machinery Testing and Evaluation Centers (AMTEC)**

- Premier and Reference Testing Center

- Assist BAFS

- Provide assistance in the establishment of other testing centers

Agriculture and Fisheries Mechanization Law of 2013

National Agri-Fishery Mechanization Program

Implementing Institutions

- **Local Government Units (LGU)**

- Undertake applied research, Extension, dispersal, management and regulation of AFM **(under the Local Government Code of 1991)**
- Create Agricultural Engineering Division – *planning, coordinating, regulating and implementing bodies on AFE/M programs and projects*

Agriculture and Fisheries Mechanization Law of 2013

Prohibited Acts under AFMech

- Selling, mortgaging, and leasing AF machinery w/o being registered with the BAFE
- Selling of AF machinery without warranty or after-sales service
- Claiming ownership to an AF that has not been properly registered in his/her name
- Operating a testing center without proper accreditation

Agriculture and Fisheries Mechanization Law of 2013

AFMech Related Issuances

Department Circular No. 05 Series of 2017

National Guidelines on testing and evaluation of AF Machinery

Date Approved: May 16, 2017

Objectives: Provide government offices and private sectors with a framework for implementing the testing and evaluation of AF machineries

Scope:

- (1) Policies and mechanism in the conduct of the testing and evaluation of AF machinery;
- (2) institutional arrangements, accreditation of Test Engineers, establishment of certification of registry and provision of capacity building activities

Agriculture and Fisheries Mechanization Law of 2013

AFMech Related Issuances

Department of Circular No.10 Series of 2018

Amendment to Department Circular No. 5 s. 2017

Date Approved: April 10, 2018

Objectives:

- (1) Provide and implement an accreditation scheme for AF Machinery Testing Centers;
- (2) Set out criteria, minimum requirements and standards for AF machinery testing centers;
- (3) Encourage private sectors and HEIs involvement in the testing of AFM

Agriculture and Fisheries Mechanization Law of 2013

Agriculture and Fisheries Mechanization Law of 2013

AFMech Related Issuances

Government Procurement Policy Board (GPPB)

Resolution NO. 37-2017

Issuance of a circular mandating all procuring entities to observe the National Guidelines on Testing and Evaluation of AF Machinery

Date Approved: November 7, 2017

Agriculture and Fisheries Mechanization Law of 2013

AFMech Related Issuances

- DA/DBM/CSC/DILG Joint Memorandum Circular No. 02 series of 2020

Implementing Guidelines on the strengthening and establishment of the agricultural and biosystems engineering groups of the local government units

Date Effective: October 3, 2020

Agricultural Tariffication Law

“An act replacing quantitative import restrictions on agricultural products, except rice, with tariffs, creating the agricultural competitiveness enhancement fund, and for other purposes”

- Republic Act No. 8178
- Date Approved: March 28, 1996
- Basis: WTO Uruguay Round Agreement (Agreement on Agriculture) in 1995
- Important Points:
 - (a) repealing RA NO. 1296, 2712, 1297, PO 1483
 - (b) Rice is exempted from tariffication (until 2005);
 - (c) Creation of ACEF

Rice Tariffication Law

“An Act Liberalizing the Importation, Exportation and Trading of Rice, Lifting for the Purpose the Quantitative Import Restriction on Rice, and For Other Purposes”

- Republic Act No. 11203
- Date Approved: February 14, 2019
- Effectivity Date: March 5, 2019
- Implementing Rules and Regulations: DA/NEDA/DBM Joint Memorandum Circular NO. 01-2019 Series of 2019 (December 20, 2013)

Rice Tariffication Law

Some Key Points

- Allows the private sector to freely import rice subject to a tariff
- Removes the regulatory and import licensing functions of the National Food Authority (NFA)
- Creates the Rice Competitiveness Enhancement Fund (RCEF) or Rice Fund with a P10 billion annual appropriation for the next six years
- Mechanization: 50%; Seed Development: 30%; Credit: 10%; Extension Services: 10%

https://www.philrice.gov.ph/wp-content/uploads/2019/09/RCEF_FAQ02-RiceTariff.pdf

Rice Tariffication Law

RCEF Mechanization Program

- Aims to increase the yield, income and ability of farmers *to keep pace with neighboring countries* through appropriate machinery that can be used from rice production to post-harvest.

- Components:

Rice Processing System - consists of machinery used for drying rice and milling rice

<https://rcef.philmech.gov.ph/?page=aboutRcef&action=riceProcessingSystem>

Crop Establishment System - use of crop establishment technologies in their rice fields with potential to speed up field operations, lower production costs, and increase yields compared to manual operations

<https://rcef.philmech.gov.ph/?page=aboutRcef&action=cropEstablishmentSystem>

Rice Tariffication Law

RCEF Mechanization Program

- Memorandum: Implementing Guidelines of the mechanization program under the RCEF

<https://rcef.da.gov.ph/wp-content/uploads/2021/05/RCEF-Mechanization-Implementing-Guidelines.pdf>

Priority Technologies:

- Precise and Effective Technologies for reduction of Production Cost (*Land Preparation & Crop Establishment Technologies*)
- Appropriate and Efficient Postproduction Technologies for the reduction of postproduction Losses and Maintaining Grain Quality (*Harvesting & Threshing and Postharvest Technologies*)

Comprehensive Agrarian Reform Law of 1988

“An act instituting a comprehensive agrarian reform program to promote social justice and industrialization, providing the mechanism for its implementation, and for other purposes”

- Republic Act No. 6657
- Date Approved: June 10, 1988
- Effectivity Date: June 15, 1988

Comprehensive Agrarian Reform Program Extension with Reform (CARPER) LAW

“An act strengthening the comprehensive agrarian reform program (carp), extending the acquisition and distribution of all agricultural lands, instituting necessary reforms, amending for the purpose certain provisions of Republic Act No. 6657, otherwise, known as the comprehensive agrarian reform law of 1988, as amended, and appropriating funds therefore”

- Republic Act No. 9700
- Date Approved: August 7, 2009

Sugarcane Industry Development Act of 2015

“An act promoting and supporting the competitiveness of the sugarcane industry and for other purposes”

Republic Act No. 10659

- Date Approved: March 27, 2015
- Implementing Rules and Regulations: Department Circular No. 7 Series of 2015 (August 4, 2015)

Renewable Energy Act of 2008

“An act promoting the development, utilization and commercialization of renewable energy resources and for other purposes”

- Republic Act No. 9513
- Date Approved: December 16, 2008
- Implementing Rules and Regulations: DC2009-05-008 (Department of Energy)
- Accelerate the exploration and development of renewable energy resources to achieve energy self-reliance, through the adoption of sustainable energy development strategies

Ecological Solid Waste Management Act of 2000

“An act providing for an ecological solid waste management program, creating the necessary institutional mechanisms and incentives, declaring certain acts prohibited and providing penalties, appropriating funds therefore, and for other purposes”

- Republic Act No. 9003
- Date Approved: January 26, 2001
- Implementing Rules and Regulations: DENR Administrative Order NO. 2001-34 (December 20, 2001)
- Provides the necessary policy framework, institutional mechanisms and mandate to the local government units (LGUs) to achieve 25% waste reduction through establishing an integrated solid waste management plan based on 3Rs (reduce, reuse and recycling).

Climate Change Act of 2009

“An act mainstreaming climate change into government policy formulations, establishing the framework strategy and program on climate change, creating for this purpose the climate change commission, and for other purposes”

- Republic Act No. 9729
- Date Approved: October 23, 2009
- Implementing Rules and Regulations: Administrative Order No. 2010-01 (Climate Change Commission) (January 10, 2010)
- Integrate disaster risk reduction measures into climate change adaptation plans, development and poverty reduction programs

Biofuel Act of 2006

“An act to direct the use of biofuels, establishing for this purpose the biofuel program, appropriating funds therefor, and for other purposes”

- Republic Act No. 9367
- Date Approved: January 12, 2007
- Implementing Rules and Regulations: DC 2007-05-006 (Department of Energy) (May 17, 2007)
- Introduces mandatory use of biofuels in the fuel mix, as follows: a minimum 5% of bioethanol in the gasoline mix sold and distributed within 2 years; a minimum of 10% within 4 years is required.

RA 10912

Republic Act No. 10912, otherwise known as the “Continuing Professional Development (CPD) Act of 2016”, is an act which requires CPD as the mandatory requirement for the renewal of Professional Identification Card of all registered and licensed professionals under the regulation of the PRC.

The CPD Act **lapsed into Law** on July 21, 2016 and it took effect on August 16, 2016.

All are fundamental canons stated in the code of ethics of engineers except:

- a. Hold paramount the safety, health, and welfare of the public.
- b. Perform services only in areas of their competence.
- c. Issue public statements only in an objective and truthful manner.
- d. Acknowledge their errors and shall not distort or alter the facts.
