

ABELE 2025

ABE LAWS, PROFESSIONAL STANDARDS & ETHICS

ENGR. JOHN HENRY L. TENORIO
Agricultural and Biosystems Engineer

johnhenrylucayontenorio@gmail.com

Key Laws Governing ABE Profession

- **Republic Act No. 3927 (1964) – *Philippine Agricultural Engineering Law*.** Established the regulation of the agricultural engineering profession in the Philippines.
- **Republic Act No. 8559 (1998) – *Philippine Agricultural Engineering Act of 1998*.** Created the Professional Regulatory Board of Agricultural Engineering; defined scope and duties of the profession.
- **Republic Act No. 10915 (2016) – *Philippine Agricultural and Biosystems Engineering Act of 2016*.** Modernized the profession, expanding it to include biosystems engineering; updated governance, standards, and enforcement.
- **Agricultural and Fisheries Modernization Act (AFMA) of 1997 – RA 8435.** Provided the modernization framework for agriculture and fisheries — relevant to ABE due to its infrastructural and mechanization components.
- **Government Procurement Reform Act – RA 9184 (2003).** Affects procurement of agri-fishery infrastructure, machinery, and services—impacts implementation of ABE projects.

Other Related Key Legislation

Though not specific to ABE, these laws intersect with its practice:

- ❑ National Building Code – PD 1096 (1977)
- ❑ Environmental Impact Statement Law – PD 1586 (1978)
- ❑ Comprehensive Agrarian Reform Law – RA 6657 (1988)
- ❑ Toxic Substances and Hazardous & Nuclear Waste Control Act – RA 6969 (1990)
- ❑ Consumer Act – RA 7394 (1992)
- ❑ Magna Carta for Small Farmers – RA 7607 (1992)
- ❑ Agricultural Tariffication Law – RA 8178 (1996)
- ❑ Philippine Fisheries Code – RA 8550 (1998)
- ❑ Clean Air Act – RA 8749 (1999)
- ❑ Ecological Solid Waste Management Act – RA 9003 (2000)
- ❑ Clean Water Act – RA 9275 (2004)
- ❑ Biofuels Act – RA 9367 (2006)
- ❑ Renewable Energy Act – RA 9513 (2008)
- ❑ Climate Change Act – RA 9729 (2009)
- ❑ Organic Agriculture Act – RA 10068 (2010)
- ❑ Agricultural and Fisheries Mechanization Law – RA 10601 (2013)

RA 10915 & IRR

What law is known as the Philippine Agricultural and Biosystems Engineering Act of 2016?

- A. RA 9513
- B. RA 10601
- C. RA 10915
- D. RA 9736

What law is known as the Philippine Agricultural and Biosystems Engineering Act of 2016?

- A. RA 9513
- B. RA 10601
- C. RA 10915**
- D. RA 9736

RA 3927 – "Philippine Agricultural Engineering Law."

RA 8559 – "Philippine Agricultural Engineering Act of 1998."

RA 10915 – "Philippine Agricultural and Biosystems
Engineering Act of 2016"

When did RA 10915 become law?

- a. July 21, 2016
- b. February 16, 2016
- c. May 23, 2016
- d. October 1, 2016

When did RA 10915 become law?

- a. July 21, 2016
- b. February 16, 2016
- c. May 23, 2016
- d. October 1, 2016

February 16, 2016 – RA 10915 was passed by the Senate of the Philippines as Senate Bill No. 2434

May 23, 2016 – adopted by the House of Representatives as an amendment to House Bill No. 6421

July 21, 2016 – Lapsed into law without the signature of the President

In what year was the Implementing Rules and Regulations (IRR) of the Philippine Agricultural and Biosystems Engineering Act of 2016 approved?

- a. 2016
- b. 2018
- c. 2020
- d. 2022

In what year was the Implementing Rules and Regulations (IRR) of the Philippine Agricultural and Biosystems Engineering Act of 2016 approved?

- a. 2016
- b. 2018
- c. 2020
- d. 2022

When did the IRR of the ABE Law take effect?

- A) July 8, 2022
- B) July 21, 2022
- C) September 6, 2022
- D) September 20, 2022

When did the IRR of the ABE Law take effect?

- A) July 8, 2022
- B) July 21, 2022
- C) September 6, 2022
- D) September 20, 2022

July 8, 2022 – IRR of ABE Law was signed

July 21, 2022 – Date of publication in Daily Tribune

September 20, 2022 – Date of effectivity of IRR

Who are the signatories of the IRR?

- A) Enad, Tado, Pilando
- B) Valdez, Tado, Rico
- C) Tapel, Tamondong, Vargas
- D) Pilando, Cueto, Enad

Who are the signatories of the IRR?

- A) Enad, Tado, Pilando
- B) Valdez, Tado, Rico
- C) Tapel, Tamondong, Vargas
- D) Pilando, Cueto, Enad

Signatories – Chairman Teofilo S. Pilando, Jr.,
Commissioners Jose Y. Cueto, Jr. and Erwin M. Enad

Witness – PRBABE Chair Ariodear Rico together with his
members, Hon. Sherwin Valdez and Hon. Caesar
Joventino Tado.

Agricultural and Biosystems Engineering refers to the application of _____ and designs to the processes and systems involved in the sustainable production, post production and processing of safe food, feed, fiber, timber and other agricultural and biological materials and the efficient utilization, conservation, and management of natural and renewable resources in order to enhance human health in harmony with the environment.

- A. Agriculture
- B. Engineering
- C. Science
- D. Engineering science

Agricultural and Biosystems Engineering refers to the application of _____ and designs to the processes and systems involved in the sustainable production, post production and processing of safe food, feed, fiber, timber and other agricultural and biological materials and the efficient utilization, conservation, and management of natural and renewable resources in order to enhance human health in harmony with the environment.

- A. Agriculture
- B. Engineering
- C. Science
- D. Engineering science

In ABE law, agricultural and biosystems consist of crops, forestry and other plants, poultry, livestock, fisheries and _____ resources and other animals, wildlife and other living things.

- A. Agriculture
- B. Aquaculture
- C. Farm
- D. Land

In ABE law, agricultural and biosystems consist of crops, forestry and other plants, poultry, livestock, fisheries and _____ resources and other animals, wildlife and other living things.

- A. Agriculture
- B. Aquaculture**
- C. Farm
- D. Land

Agricultural and Biosystems Engineer refers to a person who is registered and licensed to practice agricultural and biosystems engineering in the country and who holds a _____ and professional identification card from the Board of Agricultural and Biosystems Engineering and the PRC.

- A. Degree
- B. BSABE degree
- C. Experience
- D. Valid certificate of registration

Agricultural and Biosystems Engineer refers to a person who is registered and licensed to practice agricultural and biosystems engineering in the country and who holds a _____ and professional identification card from the Board of Agricultural and Biosystems Engineering and the PRC.

- A. Degree
- B. BSABE degree
- C. Experience
- D. Valid certificate of registration

Agricultural and Biosystems Automation and Instrumentation refers to the use and application of agricultural and biosystems _____.

- A. Circuits
- B. Instruments
- C. Sensors
- D. Integrated circuits

Agricultural and Biosystems Automation and Instrumentation refers to the use and application of agricultural and biosystems _____.

- A. Circuits
- B. Instruments
- C. Sensors
- D. Integrated circuits

Agricultural and Biosystems Resource Conservation and Management refers to measures of conservation and proper management of agricultural and _____ resources.

- A. Biological
- B. Zoological
- C. Farm
- D. Water

Agricultural and Biosystems Resource Conservation and Management refers to measures of conservation and proper management of agricultural and _____ resources.

- A. Biological
- B. Zoological
- C. Farm
- D. Water

A decorative pattern of light gray hexagons is visible at the top of the slide, spanning across the width of the text area.

In RA 10915, agricultural and _____ refers to local activity or series of activities to maintain or raise the quality or change the form or characteristics of agricultural, fishery, forestry and biological products/materials.

- A. Quality control
- B. Forestry
- C. Bio-processing
- D. Fishery

In RA 10915, agricultural and _____ refers to local activity or series of activities to maintain or raise the quality or change the form or characteristics of agricultural, fishery, forestry and biological products/materials.

- A. Quality control
- B. Forestry
- C. Bio-processing
- D. Fishery

Agricultural and _____ System refers to utilization of information systems, database, and other information management tools for agricultural use, biological systems modeling to understand the mutual response between life and the environment.

- A. Computer
- B. Geographic Information
- C. Modeling
- D. Bio-information

Agricultural and _____ System refers to utilization of information systems, database, and other information management tools for agricultural use, biological systems modeling to understand the mutual response between life and the environment.

- A. Computer
- B. Geographic Information
- C. Modeling
- D. Bio-information

Agricultural and Biosystems Power and Machinery refers to farm power and machinery for the production, harvesting, processing, storage, manufacture, preserving, transporting and _____ of agricultural and biological products/materials.

- A. Distribution
- B. Quality control
- C. Marketing
- D. Sales

Agricultural and Biosystems Power and Machinery refers to farm power and machinery for the production, harvesting, processing, storage, manufacture, preserving, transporting and _____ of agricultural and biological products/materials.

- A. Distribution
- B. Quality control
- C. Marketing
- D. Sales

Agricultural and Biosystems Buildings and Structures refer to buildings and structures for the production, harvesting, processing, storage, _____, preserving, transporting and distribution of agricultural and biological products/materials.

- A. Treatment
- B. Manufacture
- C. Quality control
- D. Sales

Agricultural and Biosystems Buildings and Structures refer to buildings and structures for the production, harvesting, processing, storage, _____, preserving, transporting and distribution of agricultural and biological products/materials.

A. Treatment

B. **Manufacture**

C. Quality control

D. Sales

Which of the following is NOT covered by the Agricultural and Biosystems Engineering Act?

- a. Examination, registration, and licensure of agricultural and biosystems engineers
- b. Development of agricultural and biosystems engineering curriculum in coordination with CHED and SUCs
- c. Establishment of agricultural cooperatives for rural development
- d. Integration of agricultural and biosystems engineers under a national Accredited Integrated Professional Organization (AIPO)

Which of the following is NOT covered by the Agricultural and Biosystems Engineering Act?

- a. Examination, registration, and licensure of agricultural and biosystems engineers
- b. Development of agricultural and biosystems engineering curriculum in coordination with CHED and SUCs
- c. Establishment of agricultural cooperatives for rural development
- d. Integration of agricultural and biosystems engineers under a national Accredited Integrated Professional Organization (AIPO)

The Agricultural and Biosystems Engineering Act covers:

1. **Licensure** – Exam, registration, and licensing of agricultural and biosystems engineers.
2. **Regulation** – Supervision and control of the profession's practice.
3. **Curriculum Development** – Coordination with CHED and SUCs for curriculum updates.
4. **Professional Growth** – Promotion of competence through CPD, career progression, and specialization.
5. **Professional Integration** – Uniting engineers under a national AIPO recognized by the PRC and the Board of Agricultural and Biosystems Engineering.

Which type of map is within the agricultural and biosystems engineers' scope to prepare?

- a) Political map of regions
- b) Farm suitability and land use maps
- c) Climate change hazard maps
- d) Marine navigation charts

Which type of map is within the agricultural and biosystems engineers' scope to prepare?

- a) Political map of regions
- b) Farm suitability and land use maps**
- c) Climate change hazard maps
- d) Marine navigation charts

Scope of Practice of Agricultural and Biosystems Engineering

1. Design & Planning – Prepare designs, plans, feasibility studies, and estimates for:

- Irrigation & drainage
- Soil & water conservation/management
- Agrometeorological systems
- Agricultural/biosystems power, machinery, buildings, and structures
- Renewable/bio-energy systems & farm electrification
- Agricultural/bio-processing, post-harvest facilities, waste management, bio-information systems, resource conservation, automation, and instrumentation

Scope of Practice of Agricultural and Biosystems Engineering

2. **Construction & Operations** – Supervise/manage construction, operation, and maintenance of the above systems and facilities.
3. **Valuation & Audit** – Conduct appraisal, inspection, monitoring, and technical audit of agricultural/biosystems machinery, equipment, structures, and projects.
4. **Project Development** – Provide planning, evaluation, consultancy, and management of agricultural/biosystems engineering projects.
5. **R&D & Training** – Engage in research, development, training, and extension work.
6. **Testing & Inspection** – Test and evaluate agricultural/biosystems machinery, facilities, and equipment.

Scope of Practice of Agricultural and Biosystems Engineering

7. **Manufacture & Sales** – Involve in manufacturing, distribution, installation, and sale of agricultural/biosystems machinery and equipment.
8. **Education** – Teach agricultural/biosystems engineering subjects in Philippine institutions.
9. **Land & Farm Planning** – Prepare and evaluate farm development plans, suitability maps, and land use maps/reports.
10. **Technical Supervision** – Train and supervise machinery technicians and operators.
11. **Employment** – Hold positions in government or private sector requiring agricultural/biosystems engineering expertise.
12. **Environmental Work** – Participate in environmental studies and monitoring for agricultural, fisheries, agro-industrial, and biosystems projects under the EIA system.

Who appoints the Chairperson and members of the Board of Agricultural and Biosystems Engineering?

- a) Commission on Higher Education (CHED)
- b) Professional Regulation Commission (PRC)
- c) President of the Philippines
- d) Accredited Integrated Professional Organization (AIPO)

Who appoints the Chairperson and members of the Board of Agricultural and Biosystems Engineering?

- a) Commission on Higher Education (CHED)
- b) Professional Regulation Commission (PRC)
- c) President of the Philippines
- d) Accredited Integrated Professional Organization (AIPO)

Appointment

- The AIPO submits a list of **five (5) nominees** for each Board position to the **PRC**.
 - The PRC ranks the nominees and submits **three (3) recommendees** for each position to the **President**.
- 

How many members, including the Chairperson, compose the Board of Agricultural and Biosystems Engineering?

- a) 2
- b) 3
- c) 4
- d) 5

How many members, including the Chairperson, compose the Board of Agricultural and Biosystems Engineering?

- a) 2
- b) 3**
- c) 4
- d) 5

How many members, including the Chairperson, compose the Board of Agricultural and Biosystems Engineering?

- a) 2
- b) 3**
- c) 4
- d) 5

Which organization submits the nominees for the Board positions to the Commission?

- a) Department of Agriculture
- b) Commission on Higher Education (CHED)
- c) Professional Regulation Commission (PRC)
- d) Accredited Integrated Professional Organization (AIPO)

Which organization submits the nominees for the Board positions to the Commission?

- a) Department of Agriculture
- b) Commission on Higher Education (CHED)
- c) Professional Regulation Commission (PRC)
- d) Accredited Integrated Professional Organization (AIPO)**

Powers and Duties of the Board

- a) Promulgate and adopt the rules and regulations necessary for carrying out the provisions of RA No. 10915;
- b) Supervise the registration, licensure and practice of Agricultural and Biosystems Engineering in the Philippines;
- c) Administer oaths to successful examinees entering the practice of Agricultural and Biosystems Engineering;
- d) Issue CORs to successful examinees;
- e) Issue, suspend or revoke the license for the practice of Agricultural and Biosystems Engineering profession;
- f) Adopt an official seal of the Board.

Maria is a 36-year-old Filipino citizen who graduated with a Bachelor's Degree in Agricultural Engineering from a recognized university. She has been actively practicing as an Agricultural and Biosystems Engineer for eight (8) years. Can Maria be appointed to the Board of Agricultural and Biosystems Engineering?

- a) Yes, because she is a citizen and graduated with the required degree.
- b) No, because she has not practiced for the required ten (10) years.
- c) Yes, because her age and education qualify her.
- d) No, because she is not a member of AIPO.

Maria is a 36-year-old Filipino citizen who graduated with a Bachelor's Degree in Agricultural Engineering from a recognized university. She has been actively practicing as an Agricultural and Biosystems Engineer for eight (8) years. Can Maria be appointed to the Board of Agricultural and Biosystems Engineering?

- a) Yes, because she is a citizen and graduated with the required degree.
- b) No, because she has not practiced for the required ten (10) years.**
- c) Yes, because her age and education qualify her.
- d) No, because she is not a member of AIPO.

John has been working as an Agricultural and Biosystems Engineer for twelve (12) years and is a member in good standing of the AIPO. However, he recently served as a part-time faculty member at a university that offers a course in Agricultural Engineering for one (1) year. Is John eligible for appointment to the Board?

- a) Yes, because he has sufficient years of experience.
- b) No, because he was a faculty member within three (3) years prior to the appointment.
- c) Yes, because he is a member of AIPO.
- d) No, because he must have a Master's Degree.

John has been working as an Agricultural and Biosystems Engineer for twelve (12) years and is a member in good standing of the AIPO. However, he recently served as a part-time faculty member at a university that offers a course in Agricultural Engineering for one (1) year. Is John eligible for appointment to the Board?

- a) Yes, because he has sufficient years of experience.
- b) No, because he was a faculty member within three (3) years prior to the appointment.**
- c) Yes, because he is a member of AIPO.
- d) No, because he must have a Master's Degree.

Liza has never been convicted of a crime and has been an active member of the AIPO for six (6) years. She is 40 years old and has a Bachelor's Degree in Agricultural and Biosystems Engineering. However, she has been associated with a review center offering licensure exam preparation classes for two (2) years. Can she be appointed to the Board?

- a) Yes, because she has the required degree and is of the right age.
- b) No, because she is associated with a review center.
- c) Yes, because her AIPO membership qualifies her.
- d) No, because she does not have enough experience.

Liza has never been convicted of a crime and has been an active member of the AIPO for six (6) years. She is 40 years old and has a Bachelor's Degree in Agricultural and Biosystems Engineering. However, she has been associated with a review center offering licensure exam preparation classes for two (2) years. Can she be appointed to the Board?

- a) Yes, because she has the required degree and is of the right age.
- b) No, because she is associated with a review center.**
- c) Yes, because her AIPO membership qualifies her.
- d) No, because she does not have enough experience.

Qualifications of Board Members:

Members must be Filipino citizens, at least 35 years old, hold an accredited degree in Agricultural/Biosystems Engineering, be a registered engineer with 10 years of experience, and have no recent ties to teaching or review centers. They must also be a member in good standing of the AIPO for 5 years and have no convictions for moral turpitude.

What is the term duration for the Chairperson of the Board?

- A) Two years
- B) Three years
- C) Four years
- D) Five years

What is the term duration for the Chairperson of the Board?

- A) Two years
- B) Three years**
- C) Four years
- D) Five years

If a member of the Board has served for one year and is reappointed, how long can they serve after their reappointment?

- A) One year
- B) Two years
- C) Three years
- D) Six years

If a member of the Board has served for one year and is reappointed, how long can they serve after their reappointment?

- A) One year
- B) Two years
- C) Three years
- D) Six years

What must Board members do before starting their duties?

- A) Attend a training session
- B) Take an oath of office
- C) Submit a report
- D) Complete a performance review

What must Board members do before starting their duties?

- A) Attend a training session
- B) Take an oath of office**
- C) Submit a report
- D) Complete a performance review

If a vacancy occurs due to the resignation of a Board member, how is the vacancy filled?

- A) The President appoints a new member immediately.
- B) The vacancy is filled for the unexpired portion of the term.
- C) The remaining members vote on a replacement.
- D) The position is left vacant until the term ends.

If a vacancy occurs due to the resignation of a Board member, how is the vacancy filled?

- A) The President appoints a new member immediately.
- B) The vacancy is filled for the unexpired portion of the term.**
- C) The remaining members vote on a replacement.
- D) The position is left vacant until the term ends.

A Board member was found guilty of gross neglect of duty.
What is the consequence?

- A) They will receive a warning.
- B) They can continue to serve but with a probation period.
- C) They will be removed from the Board.
- D) They will be given a chance to resign voluntarily.

A Board member was found guilty of gross neglect of duty.
What is the consequence?

- A) They will receive a warning.
- B) They can continue to serve but with a probation period.
- C) They will be removed from the Board.**
- D) They will be given a chance to resign voluntarily.

Term of Office

- Chairperson and members serve for **three years**.
- First terms are staggered:
 - Chairperson: 3 years
 - One member: 2 years
 - One member: 1 year
- May be reappointed for **one more three-year term** (maximum **six years total**).
- Must take an **oath of office** before starting duties.

Compensation

- Receive pay and benefits **equal to other Professional Regulatory Boards** as provided in the General Appropriations Act.

Vacancy and Removal

- Vacancies are filled **only for the unexpired term.**
- The President may remove members for:
 - Neglect of duty
 - Violations of the Act
 - Exam manipulation
 - Conviction of serious crimes
 - Unprofessional or immoral conduct
- Removal requires **due notice** and **opportunity to be heard.**

What is the primary requirement for all applicants seeking registration to practice agricultural and biosystems engineering?

- A) A recommendation from a licensed engineer
- B) A bachelor's degree in any engineering field
- C) Passing the licensure examination
- D) A letter of intent to practice engineering

What is the primary requirement for all applicants seeking registration to practice agricultural and biosystems engineering?

- A) A recommendation from a licensed engineer
- B) A bachelor's degree in any engineering field
- C) Passing the licensure examination**
- D) A letter of intent to practice engineering

Every applicant for the examination must be a citizen of the _____ or a foreign citizen whose country has a policy on _____ in the practice of the profession.

- A) Philippines; reciprocity
- B) United States; collaboration
- C) Japan; integration
- D) Canada; exchange

Every applicant for the examination must be a citizen of the _____ or a foreign citizen whose country has a policy on _____ in the practice of the profession.

- A) Philippines; reciprocity**
- B) United States; collaboration
- C) Japan; integration
- D) Canada; exchange

Under Washington Accord, an Agricultural and Biosystems Engineer who passed licensure examination in the Philippines can practice his/her profession in another Washington Accord member country.

- A. Yes
- B. No
- C. Indeterminate
- D. Insufficient data to determine

Under Washington Accord, an Agricultural and Biosystems Engineer who passed licensure examination in the Philippines can practice his/her profession in another Washington Accord member country.

- A. Yes
- B. No
- C. Indeterminate
- D. Insufficient data to determine

In Washington Accord, the contract of ABE services signed in the Philippines is valid in another Washington Accord member country.

- A. Yes
- B. No
- C. Indeterminate
- D. Insufficient data to determine

In Washington Accord, the contract of ABE services signed in the Philippines is valid in another Washington Accord member country.

- A. Yes
- B. No**
- C. Indeterminate
- D. Insufficient data to determine

The Washington Accord

- A multilateral agreement among bodies that accredit or recognize tertiary-level engineering degree programs in their respective countries or territories.
- Originally signed in 1989 by **six founding signatories** (Australia, Canada, Ireland, New Zealand, United Kingdom and United States)
- Aims to assist **mobility of professional engineers** through the development and recognition of good practice in engineering education.
- Currently has **18 full signatories** and **6 provisional members**
- Recognizes **substantial equivalency** of accredited programs among signatory bodies.
- Recommends that graduates of accredited programs from one signatory be recognized by all others as meeting academic requirements for engineering practice.

PTC as a Provisional Signatory to the Washington Accord

- **Philippine Technological Council (PTC)** is the only organization recognized by CHED and the Philippine engineering profession to represent the country in the Accord.
- Developed the **Certification and Accreditation System for Engineering Education (CASEE)** to assess and evaluate engineering programs since 2012.
- Admitted as a **provisional signatory** on June 19, 2013 during the IEA Meetings in Seoul, South Korea.
- Established accrediting organizations:
 - **Accreditation and Certification Board for Engineering and Technology (PTC ACBET)**
 - **Engineering Accreditation Commission (EAC)**
- Has accredited multiple engineering programs in various tertiary institutions in the Philippines.

To pass the board examination, a candidate must achieve a weighted general average of _____ percent, with no grades lower than _____ percent in any subject.

- A) 75; 50
- B) 70; 55
- C) 80; 60
- D) 65; 50

To pass the board examination, a candidate must achieve a weighted general average of _____ percent, with no grades lower than _____ percent in any subject.

- A) 75; 50
- B) 70; 55**
- C) 80; 60
- D) 65; 50

If an applicant fails the licensure examination three times, what must they complete before taking the exam again?

- A) A new degree program
- B) A refresher program at an accredited institution
- C) A personal interview with the Board
- D) A minimum of two years of work experience

If an applicant fails the licensure examination three times, what must they complete before taking the exam again?

- A) A new degree program
- B) A refresher program at an accredited institution**
- C) A personal interview with the Board
- D) A minimum of two years of work experience

Which of the following is NOT a ground for the refusal to register an applicant for agricultural and biosystems engineering?

- A) Conviction of a moral turpitude offense
- B) Failure to pay annual fees
- C) Being adjudged guilty of immoral conduct
- D) Completion of a non-accredited program

Which of the following is NOT a ground for the refusal to register an applicant for agricultural and biosystems engineering?

- A) Conviction of a moral turpitude offense
- B) Failure to pay annual fees
- C) Being adjudged guilty of immoral conduct
- D) Completion of a non-accredited program

The Board may revoke or suspend the Certificate of Registration (COR) for gross incompetence, negligence, or _____ in the conduct of the profession.

- A) Disinterest
- B) Ignorance
- C) Ignorance and lack of experience
- D) Lack of education

The Board may revoke or suspend the Certificate of Registration (COR) for gross incompetence, negligence, or _____ in the conduct of the profession.

- A) Disinterest
- B) Ignorance**
- C) Ignorance and lack of experience
- D) Lack of education

What must be included in the Certificate of Registration issued to successful candidates?

- A) A photo of the registrant
- B) The registrant's social security number
- C) The official seal of the Commission and Board
- D) A statement of experience

What must be included in the Certificate of Registration issued to successful candidates?

- A) A photo of the registrant
- B) The registrant's social security number
- C) The official seal of the Commission and Board**
- D) A statement of experience

Article III: Examination, Registration, and License

Section 14: Examination Required

Applicants must pass the licensure examination to register as agricultural and biosystems engineers.

Section 15: Qualifications

Applicants must be citizens (or eligible foreign citizens), graduates of relevant degrees recognized by CHED, and possess good moral character.

Section 16: Fraudulent Applications

The Board can suspend or revoke registration obtained through misrepresentation.

Section 17: Scope of Examination

The exam will cover core competencies in various subjects related to agricultural and biosystems engineering, with syllabi subject to updates.

Section 18: Exam Ratings

Candidates must achieve a weighted average of 70% and no grade below 55% to pass.

Section 19: Report of Ratings

The Board will submit candidate ratings to the Commission within ten days of the exam.

Section 20: Reexamination

Those failing three times must wait a year and complete a refresher program to retake the exam.

Section 21: Oath

Successful candidates must take an oath before practicing.

Section 22: Issuance of Certificates

Registered engineers receive a certificate of registration (COR) and a professional identification card upon payment and proof of CPD compliance. They may use "Engr." as a title.

Section 23: Refusal to Register

Registration can be denied based on criminal convictions, immoral conduct, mental unsoundness, or substance abuse.

Section 24: Revocation/Suspension

The Board can revoke or suspend CORs or TSPs for violations of the Act, fraud, incompetence, or unethical conduct.

Section 25: Reissuance and Replacement

Revoked CORs can be reinstated after two years without retaking the exam. Lost items may be replaced upon payment of fees.

In Section 17 of RA 10915, which one is not a scope of Land and Water Resources Engineering?

- A. Irrigation
- B. Soil and water
- C. Aquaculture
- D. Meteorology

In Section 17 of RA 10915, which one is not a scope of Land and Water Resources Engineering?

- A. Irrigation
- B. Soil and water
- C. Aquaculture
- D. Meteorology

In Section 36 or ABE law, the existing Philippine Agricultural Engineering Standards (PAES) shall be transformed into a Philippine Agricultural and Biosystems Engineering Standards and shall serve as Code of _____ Standards.

- A. AE
- B. ABE
- C. Technical
- D. Engineering

In Section 36 or ABE law, the existing Philippine Agricultural Engineering Standards (PAES) shall be transformed into a Philippine Agricultural and Biosystems Engineering Standards and shall serve as Code of _____ Standards.

- A. AE
- B. ABE
- C. Technical
- D. Engineering

What is the main provision of Section 26 regarding registered agricultural engineers under Republic Act No. 8559?

- a) They must take an additional exam.
- b) They are automatically registered as agricultural and biosystems engineers.
- c) They lose their registration.
- d) They must reapply for registration.

What is the main provision of Section 26 regarding registered agricultural engineers under Republic Act No. 8559?

- a) They must take an additional exam.
- b) They are automatically registered as agricultural and biosystems engineers.**
- c) They lose their registration.
- d) They must reapply for registration.

Upon registration, each agricultural and biosystems engineer shall obtain a _____ designed by the Board.

- a) diploma
- b) certification
- c) seal
- d) license

Upon registration, each agricultural and biosystems engineer shall obtain a _____ designed by the Board.

- a) diploma
- b) certification
- c) seal**
- d) license

If an agricultural and biosystems engineer's license has expired, what action is required before they can use their seal on plans?

- a) They can use it without restrictions.
- b) They must get a new seal.
- c) They must renew their license.
- d) They need to take a refresher course.

If an agricultural and biosystems engineer's license has expired, what action is required before they can use their seal on plans?

- a) They can use it without restrictions.
- b) They must get a new seal.
- c) They must renew their license.**
- d) They need to take a refresher course.

Which government department is responsible for implementing provisions related to the acceptance of plans and designs by agricultural and biosystems engineers?

- a) Department of Education
- b) Department of Agriculture
- c) Department of Public Works and Highways (DPWH)
- d) Department of Environment and Natural Resources

Which government department is responsible for implementing provisions related to the acceptance of plans and designs by agricultural and biosystems engineers?

- a) Department of Education
- b) Department of Agriculture
- c) Department of Public Works and Highways (DPWH)**
- d) Department of Environment and Natural Resources

No agricultural and biosystems engineer shall sign or affix their seal on documents made by another engineer unless it indicates the part of the work they actually _____.

- a) supervised
- b) completed
- c) evaluated
- d) planned

No agricultural and biosystems engineer shall sign or affix their seal on documents made by another engineer unless it indicates the part of the work they actually _____.

- a) supervised
- b) completed**
- c) evaluated
- d) planned

An agricultural and biosystems engineer has their seal on a project plan but did not supervise the entire project. What should they do?

- a) Sign the plan as is.
- b) Remove their seal from the document.
- c) Affix their seal and add a note about their involvement.
- d) Submit the plan without their seal.

An agricultural and biosystems engineer has their seal on a project plan but did not supervise the entire project. What should they do?

- a) Sign the plan as is.
- b) Remove their seal from the document.**
- c) Affix their seal and add a note about their involvement.
- d) Submit the plan without their seal.

Which of the following is NOT a ground for administrative or criminal action as per Article IV of RA 10915?

- a) Failure to sign plans.
- b) Unauthorized duplication of documents.
- c) Expired professional license.
- d) Incorrect engineering calculations.

Which of the following is NOT a ground for administrative or criminal action as per Article IV of RA 10915?

- a) Failure to sign plans.
- b) Unauthorized duplication of documents.
- c) Expired professional license.
- d) Incorrect engineering calculations.**

Any person who violates any of the provisions of RA 10915, upon conviction, shall be penalized by a fine of not less than P100,000 but not more than ____, or imprisonment of not less than 6 months but not more than 5 years, or both fine and imprisonment, at the court discretion.

- A. P200,000
- B. P300,000
- C. P400,000
- D. P500,000

Any person who violates any of the provisions of RA 10915, upon conviction, shall be penalized by a fine of not less than P100,000 but not more than ____, or imprisonment of not less than 6 months but not more than 5 years, or both fine and imprisonment, at the court discretion.

- A. P200,000
- B. P300,000
- C. P400,000
- D. P500,000

What is the period of consecutive years during which a registered agricultural and biosystems engineer must pay the annual registration fees to avoid revocation or suspension of their Certificate of Registration (COR)?

- A) 3 years
- B) 4 years
- C) 5 years
- D) 6 years

What is the period of consecutive years during which a registered agricultural and biosystems engineer must pay the annual registration fees to avoid revocation or suspension of their Certificate of Registration (COR)?

- A) 3 years
- B) 4 years
- C) 5 years**
- D) 6 years

Drawings and plans prepared by an engineer are considered _____ of service.

- a) assets
- b) instruments
- c) products
- d) specifications

Drawings and plans prepared by an engineer are considered _____ of service.

- a) assets
- b) instruments**
- c) products
- d) specifications

According to Section 28, an agricultural and biosystems engineer is required to indicate his/her professional license number and the duration of its _____ on documents related to their practice.

- a) certification
- b) validity
- c) expiration
- d) approval

According to Section 28, an agricultural and biosystems engineer is required to indicate his/her professional license number and the duration of its _____ on documents related to their practice.

- a) certification
- b) validity**
- c) expiration
- d) approval

What does Section 30 state about membership in the integrated and accredited association of agricultural and biosystems engineers?

- a) It is optional for registered engineers.
- b) Membership is automatic upon registration.
- c) Membership requires additional qualifications.
- d) Only engineers with ten years of experience can join.

What does Section 30 state about membership in the integrated and accredited association of agricultural and biosystems engineers?

- a) It is optional for registered engineers.
- b) Membership is automatic upon registration.**
- c) Membership requires additional qualifications.
- d) Only engineers with ten years of experience can join.

According to Section 31, a foreign agricultural and biosystems engineer can practice in the Philippines regardless of their home country's regulations.

- a. True
- b. False
- c. Depends on agreement
- d. Not enough information

According to Section 31, a foreign agricultural and biosystems engineer can practice in the Philippines regardless of their home country's regulations.

- a. True
- b. False**
- c. Depends on agreement
- d. Not enough information

Section 32 requires foreign agricultural and biosystems engineers to secure a _____ before assuming their duties in the Philippines.

- a) permanent license
- b) temporary/special permit
- c) certification
- d) professional tax receipt

Section 32 requires foreign agricultural and biosystems engineers to secure a _____ before assuming their duties in the Philippines.

- a) permanent license
- b) temporary/special permit**
- c) certification
- d) professional tax receipt

Section 28 requires engineers to include their professional tax receipt number on all relevant documents.

- a. True
- b. False
- c. Depends on agreement
- d. Not enough information

Section 28 requires engineers to include their professional tax receipt number on all relevant documents.

- a. True
- b. False
- c. Depends on agreement
- d. Not enough information

Section 30 allows for membership in multiple associations of agricultural and biosystems engineers simultaneously.

- a. True
- b. False
- c. Depends on agreement
- d. Not enough information

Section 30 allows for membership in multiple associations of agricultural and biosystems engineers simultaneously.

- a. True
- b. False
- c. Depends on agreement
- d. Not enough information

Which body must approve the application for a temporary/special permit for foreign agricultural and biosystems engineers according to Section 32?

- a) Department of Labor
- b) Securities and Exchange Commission
- c) The Board
- d) Local Government Unit (LGU)

Which body must approve the application for a temporary/special permit for foreign agricultural and biosystems engineers according to Section 32?

- a) Department of Labor
- b) Securities and Exchange Commission
- c) The Board**
- d) Local Government Unit (LGU)

Which of the following positions may NOT require a registered and licensed agricultural and biosystems engineer?

- A) Planning Officer
- B) Environmental Management Specialist
- C) Building Official
- D) Office Clerk

Which of the following positions may NOT require a registered and licensed agricultural and biosystems engineer?

- A) Planning Officer
- B) Environmental Management Specialist
- C) Building Official
- D) Office Clerk**

Only registered and licensed agricultural and biosystems engineers with a valid PRC license can be appointed to positions in government and private firms related to agricultural and biosystems engineering. Key positions include:

- 1) **Engineering Roles** – All levels of engineer positions in relevant bureaus of the Department of Agriculture (DA), Local Government Units (LGUs), and other government entities.
- 2) **Teaching Positions** – Instructors and professors in public and private educational institutions teaching agricultural and biosystems engineering subjects.
- 3) **Research Positions** – Science research specialists and assistants in government and private institutions focused on research, development, and training related to agricultural engineering.
- 4) **Executive Positions** – Heads, directors, or managers in various government agencies and private firms specializing in agricultural and biosystems engineering.
- 5) **Planning and Management Roles** – Positions involving project evaluation, development, environmental management, and technical audits within the engineering framework.

Personnel Required

(a) Government Agencies & Institutions

- All national government agencies, LGUs, and SUCs involved in implementing, regulating, funding, or undertaking:
 - Research & development
 - Training & extension
 - Testing, evaluation, inspection, and technical audit of:
 - ✓ Irrigation
 - ✓ Farm mechanization
 - ✓ Post-harvest & agro-processing facilities
 - ✓ Agricultural & biosystems infrastructures
 - ✓ Farm-to-market roads
 - ✓ Agro-meteorology
 - ✓ Forest mechanization programs
 - ✓ Environmental protection & conservation programs
- Must **employ the required number** of Agricultural and Biosystems Engineers
- Must **create various levels** of Agricultural and Biosystems Engineer positions

(b) Government-Supervised or Accredited Facilities/Projects

- Must have **at least one (1)** registered and licensed Agricultural and Biosystems Engineer
- Applies to:
 - ✓ Grain/agro-processing complexes
 - ✓ Slaughterhouses
 - ✓ Communal & national irrigation systems
 - ✓ Agricultural machinery & equipment service centers
 - ✓ Testing & evaluation centers

(c) Private Sector – Machinery & Facility Businesses

- Firms, companies, partnerships, cooperatives, or associations engaged in:
 - Installation, fabrication, manufacture, distribution, or sale of agricultural & biosystems machinery/equipment and facilities
 - Other agricultural & biosystems engineering processes
- Must hire or engage **at least one (1)** licensed Agricultural and Biosystems Engineer

(d) Contractors

- Contractors of irrigation, farm-to-market roads, and agricultural/biosystems structures & facilities
 - Must have **at least one (1)** registered and licensed Agricultural and Biosystems Engineer as part of sustaining technical staff
- 

What is the diameter of the inner circle on the Professional Regulatory Board of Agricultural and Biosystems Engineering seal?

- A) 30 mm
- B) 32 mm
- C) 34 mm
- D) 36 mm

What is the diameter of the inner circle on the Professional Regulatory Board of Agricultural and Biosystems Engineering seal?

- A) 30 mm
- B) 32 mm**
- C) 34 mm
- D) 36 mm

What is the size of the rectangular band across the middle part of the seal of the Agricultural and Biosystems Engineer?

- A) 3 mm
- B) 4 mm
- C) 5 mm
- D) 6 mm

What is the size of the rectangular band across the middle part of the seal of the Agricultural and Biosystems Engineer?

- A) 3 mm
- B) 4 mm
- C) 5 mm**
- D) 6 mm

What is the shape and diameter of the seal of the Professional Regulatory Board of Agricultural and Biosystems Engineering?

- A) Circle, 40 mm
- B) Hexagon, 45 mm
- C) Dodecagon, 42 mm
- D) Square, 50 mm

What is the shape and diameter of the seal of the Professional Regulatory Board of Agricultural and Biosystems Engineering?

- A) Circle, 40 mm
- B) Hexagon, 45 mm
- C) Dodecagon, 42 mm**
- D) Square, 50 mm

What do the 14 leaves on the seal of the Professional Regulatory Board of Agricultural and Biosystems Engineering represent?

- A) Regions in the Philippines
- B) Specializations of Agricultural and Biosystems Engineering
- C) Types of crops
- D) Agricultural products

What do the 14 leaves on the seal of the Professional Regulatory Board of Agricultural and Biosystems Engineering represent?

- A) Regions in the Philippines
- B) Specializations of Agricultural and Biosystems Engineering**
- C) Types of crops
- D) Agricultural products

Shape & Size

- Dodecagon (12-sided) shape
- 48 mm diameter
- Inner circle: 32 mm diameter

Outer Ring (Annular Space)

- Upper half (gold): "PROFESSIONAL REGULATORY BOARD OF AGRICULTURAL AND BIOSYSTEMS ENGINEERING"
- Lower half (gold): "PROFESSIONAL REGULATION COMMISSION"

Inner Circle (White Background)

- Representation of a globe
- Light blue droplet of water on the globe
- Year "1964" – enactment of RA No. 3927 (first Philippine Agricultural Engineering Law)
- Plant with seven (7) emerald green leaves on each side

Symbolism

- Earth, water droplet, and leaves – represent Agricultural and Biosystems Engineering
- 12 sides of the dodecagon – represent the 12 scopes of practice
- 14 leaves (7 per plant) – represent the specializations of Agricultural and Biosystems Engineering

Shape & Size

- Circular shape, **42 mm diameter**
- Dodecagon drawn **5 mm inward** from circumference to one of its sides
- Top and bottom sides of the dodecagon positioned **horizontally straight**

Rectangular Band

- **5 mm width**
- Drawn horizontally across the middle of the seal
- Endpoints rest on the dodecagon

Text Placement

Upper part (between circle and dodecagon):

- Name of the Agricultural and Biosystems Engineer in **all capital letters**
- Two dots before and after the last name

Lower part (between circle and dodecagon):

- Words **"AGRICULTURAL AND BIOSYSTEMS ENGINEER"** in clear, readable font

COR Number

- Printed inside the rectangular band
- Scaled to be clearly readable

Symbolism

- **12 sides of the dodecagon** represent the twelve (12) functional scopes of practice of Agricultural and Biosystems Engineers (Section 5, RA 10915)

Which of the following is a priority area for training under RA 10915?

- A) Soil conservation
- B) Farm mechanization
- C) Pest management
- D) Organic farming

Which of the following is a priority area for training under RA 10915?

- A) Soil conservation
- B) Farm mechanization**
- C) Pest management
- D) Organic farming

What does "Agricultural and Biosystems Automation and Instrumentation" refer to?

- A) Traditional farming methods
- B) Use of agricultural sensors and robotics
- C) Crop rotation practices
- D) Soil analysis techniques

What does "Agricultural and Biosystems Automation and Instrumentation" refer to?

- A) Traditional farming methods
- B) Use of agricultural sensors and robotics**
- C) Crop rotation practices
- D) Soil analysis techniques

Under the IRR, what is required for an agricultural and biosystems engineer to be listed in the National Registry?

- A) Completion of a training program
- B) Registration, licensure, and fulfillment of CPD requirements
- C) A minimum of 5 years of experience
- D) Recommendation from a licensed engineer

Under the IRR, what is required for an agricultural and biosystems engineer to be listed in the National Registry?

- A) Completion of a training program
- B) Registration, licensure, and fulfillment of CPD requirements**
- C) A minimum of 5 years of experience
- D) Recommendation from a licensed engineer

What is the primary focus of the engineering standards established under the IRR of RA 10915?

- A) Sustainability
- B) Safety, reliability, and efficiency
- C) Innovation
- D) Sustainability, Innovation, Efficiency

What is the primary focus of the engineering standards established under the IRR of RA 10915?

- A) Sustainability
- B) Safety, reliability, and efficiency**
- C) Innovation
- D) Sustainability, Innovation, Efficiency

How does the IRR address the need for updated engineering practices in agriculture?

- A) By promoting traditional techniques
- B) By mandating the adoption of modern technologies
- C) By requiring certification in old methods
- D) By limiting technological advancements

How does the IRR address the need for updated engineering practices in agriculture?

- A) By promoting traditional techniques
- B) By mandating the adoption of modern technologies**
- C) By requiring certification in old methods
- D) By limiting technological advancements

How does the IRR define "agricultural and biosystems engineering services"?

- A) Services that focus on environmental art
- B) Services that apply engineering principles to agriculture, food production, and environmental management
- C) Services limited to crop production, pre- and post-harvest process, renewable energy and impact assessment
- D) Services focused on livestock management

How does the IRR define "agricultural and biosystems engineering services"?

- A) Services that focus on environmental art
- B) Services that apply engineering principles to agriculture, food production, and environmental management
- C) Services limited to crop production, pre- and post-harvest process, renewable energy and impact assessment
- D) Services focused on livestock management

According to the IRR, what is the role of innovation in agricultural and biosystems engineering?

- A) To maintain existing practices
- B) To enhance productivity and sustainability in agriculture
- C) To reduce costs only
- D) To focus on aesthetics

According to the IRR, what is the role of innovation in agricultural and biosystems engineering?

- A) To maintain existing practices
- B) To enhance productivity and sustainability in agriculture**
- C) To reduce costs only
- D) To focus on aesthetics

What is required of an engineering consultancy firm before offering agricultural and biosystems engineering services under the IRR?

- A) A business license
- B) Accreditation by the Professional Regulatory Board of Agricultural and Biosystems Engineering
- C) Accreditation by the Professional Regulatory Commission
- D) A minimum of 10 employees

What is required of an engineering consultancy firm before offering agricultural and biosystems engineering services under the IRR?

- A) A business license
- B) Accreditation by the Professional Regulatory Board of Agricultural and Biosystems Engineering
- C) Accreditation by the Professional Regulatory Commission
- D) A minimum of 10 employees

Conditional approval will be given to an examinee of the Board examination for agricultural and biosystems engineers if they:

- A) Obtain a weighted general average rating of 60% or higher.
- B) Obtain a weighted general average rating of 70% or higher but below 55% in any given subject.
- C) Pass all subjects with no grades below 70%.
- D) Complete a review program without failing any subjects.

Conditional approval will be given to an examinee of the Board examination for agricultural and biosystems engineers if they:

- A) Obtain a weighted general average rating of 60% or higher.
- B) Obtain a weighted general average rating of 70% or higher but below 55% in any given subject.
- C) Pass all subjects with no grades below 70%.
- D) Complete a review program without failing any subjects.

How often must the Professional Identification Card be renewed according to the IRR?

- A) Every year
- B) Every 2 years
- C) Every 3 years
- D) Every 5 years

How often must the Professional Identification Card be renewed according to the IRR?

- A) Every year
- B) Every 2 years
- C) Every 3 years**
- D) Every 5 years

What does the term "Code" refer to in the Code of Ethics for Agricultural Engineers?

- a) Government policy on engineering
- b) Rules for PRC registration
- c) Code of Ethics and Professional Standards
- d) Agricultural Engineering curriculum

What does the term "Code" refer to in the Code of Ethics for Agricultural Engineers?

- a) Government policy on engineering
- b) Rules for PRC registration
- c) Code of Ethics and Professional Standards**
- d) Agricultural Engineering curriculum

The term refers to the system of rules and standards that uphold the competence and integrity of agricultural engineers.

- a) Ethics
- b) Professional standards
- c) Code
- d) Law

The term refers to the system of rules and standards that uphold the competence and integrity of agricultural engineers.

- a) Ethics
- b) Professional standards
- c) Code
- d) Law

Under which act is the Code of Ethics for Agricultural Engineers adopted?

- a) Republic Act No. 9266
- b) Republic Act No. 10121
- c) Republic Act No. 8559
- d) Republic Act No. 8371

Under which act is the Code of Ethics for Agricultural Engineers adopted?

- a) Republic Act No. 9266
- b) Republic Act No. 10121
- c) Republic Act No. 8559**
- d) Republic Act No. 8371

What is the duty of agricultural engineers toward clients and employers?

- a) make their position clear after undertaking an engagement
- b) Act as faithful agents and trustees
- c) Disclose any information concerning the business affairs
- d) Keeping the consequences that might arise if deviations from their agricultural engineering works

What is the duty of agricultural engineers toward clients and employers?

- a) make their position clear after undertaking an engagement
- b) Act as faithful agents and trustees
- c) Disclose any information concerning the business affairs
- d) Keeping the consequences that might arise if deviations from their agricultural engineering works

What should agricultural engineers avoid when advertising their work?

- a) Using social media
- b) Joining trade fairs
- c) Self-laudatory manner
- d) Sponsoring scholarships

What should agricultural engineers avoid when advertising their work?

- a) Using social media
- b) Joining trade fairs
- c) **Self-laudatory manner**
- d) Sponsoring scholarships

What is prohibited when expressing opinions on agricultural engineering topics in public?

- a) Sharing experiences
- b) Speaking without adequate knowledge
- c) Providing feedback
- d) Recommending solutions

What is prohibited when expressing opinions on agricultural engineering topics in public?

- a) Sharing experiences
- b) Speaking without adequate knowledge**
- c) Providing feedback
- d) Recommending solutions

What should engineers refrain from when dealing with fellow agricultural engineers?

- a) Attending seminars
- b) Underbidding fees
- c) Sharing information
- d) Networking opportunities

What should engineers refrain from when dealing with fellow agricultural engineers?

- a) Attending seminars
- b) Underbidding fees**
- c) Sharing information
- d) Networking opportunities

What is required when agricultural engineers sign and seal documents?

- a) Notarization by PRC
- b) Approval from local government
- c) Compliance with Board Resolution No. 7, Series of 2003
- d) Submission to PSAE

What is required when agricultural engineers sign and seal documents?

- a) Notarization by PRC
- b) Approval from local government
- c) Compliance with Board Resolution No. 7, Series of 2003**
- d) Submission to PSAE

PRC BOARD OF AGRICULTURAL ENGINEERING RESOLUTION NO. 07, S. 2003, October 22, 2003

This document outlines the rules and regulations for the **signing and sealing of plans, designs, reports, and other documents** by registered agricultural engineers, based on Republic Act (R.A.) 8559 or the **Philippine Agricultural Engineering Act of 1998**. Key points include:

Authority and Responsibilities of Registered Agricultural Engineers (RAEs)

- ✓ RAEs are authorized to prepare, sign, and seal plans, designs, specifications, reports, and other technical documents necessary for **agricultural, fishery, and forestry engineering projects**.
- ✓ The seal of a registered agricultural engineer must follow specific design requirements and represents the various functions of agricultural engineering (e.g., design, management, consulting, teaching).

What principle must engineers uphold regarding the public?

- a) Ignore public criticism
- b) Safeguard public health and safety
- c) Promote untested technologies
- d) Prioritize company profits

What principle must engineers uphold regarding the public?

- a) Ignore public criticism
- b) Safeguard public health and safety**
- c) Promote untested technologies
- d) Prioritize company profits

What is expected of agricultural engineers regarding continuous education?

- a) Participate in Continuing Professional Education (CPE)
- b) Study only during renewal periods
- c) Attend mandatory board meetings
- d) Limit learning to textbooks

What is expected of agricultural engineers regarding continuous education?

- a) **Participate in Continuing Professional Education (CPE)**
- b) Study only during renewal periods
- c) Attend mandatory board meetings
- d) Limit learning to textbooks

RA 10912

The ____ earned by the professional shall be required in the renewal of professional license.

- A. Degree
- B. BSAE degree
- C. BSABE degree
- D. CPD credit units

The ____ earned by the professional shall be required in the renewal of professional license.

- A. Degree
- B. BSAE degree
- C. BSABE degree
- D. CPD credit units

Republic Act No. 10912, otherwise known as the “Continuing Professional Development (CPD) Act of 2016”, is an act which requires CPD as the mandatory requirement for the renewal of Professional Identification Card.

Which of the following best defines a Continuing Professional Development Credit Unit?

- a) The cost of attending a CPD seminar
- b) The number of hours spent in training
- c) A measure of learning value transferable toward a qualification
- d) A certificate given after training

Which of the following best defines a Continuing Professional Development Credit Unit?

- a) The cost of attending a CPD seminar
- b) The number of hours spent in training
- c) A measure of learning value transferable toward a qualification
- d) A certificate given after training

Continuing Professional Development – The inculcation of advanced knowledge, skills, and ethical values after licensure for integration into practice, research, or lifelong learning.

Continuing Professional Development Credit Unit – A measure of learning value that can be transferred toward a qualification from various learning settings.

Continuing Professional Development Program – Accredited learning activities such as seminars, workshops, technical lectures, non-degree training, scientific meetings, tours, and visits.

Which of the following is NOT included as a type of learning covered under CPD?

- a) Informal learning
- b) Self-directed learning
- c) Online learning activities
- d) None of the above

Which of the following is NOT included as a type of learning covered under CPD?

- a) Informal learning
- b) Self-directed learning
- c) Online learning activities
- d) None of the above

Nature of CPD Programs

Covers structured and nonstructured learning with defined outcomes, including:

- **Formal learning** – Structured education in recognized institutions leading to diplomas/qualifications.
- **Nonformal learning** – Structured but flexible learning outside formal education.
- **Informal learning** – Daily life learning assessed for recognition/accreditation.
- **Self-directed learning** – Non-accredited learning (seminars, training, courses) that can earn CPD units.
- **Online learning activities** – Internet-based structured/unstructured learning.
- Professional work experience

Powers, Functions and Responsibilities of the CPD Council

- a) Ensure the adequate and appropriate provision of CPD Programs for their respective profession;
- b) Evaluate and act on applications for accreditation of CPD Providers and their CPD Programs;
- c) Monitor and evaluate the implementation of the CPD Programs;
- d) Assess and/or upgrade the criteria for accreditation of CPD Providers and their CPD Programs on a regular basis;
- e) Develop mechanisms for the validation, accreditation and recognition of self-directed learning, prior/informal learning, online learning, and other learning processes through professional work experience;
- f) Conduct researches, studies and benchmarking for international alignment of the CPD Programs;
- g) Issue operational guidelines, with the approval of the PRC and the PRB concerned; and
- h) Perform such other functions related or incidental to the implementation of the CPD.

RA 11203

An act liberalizing the importation, exportation and trading of rice, lifting for the purpose the quantitative import restriction on rice, and for other purposes.

- a. RA 10915
- b. RA 10912
- c. RA 11203
- d. RA 9003

An act liberalizing the importation, exportation and trading of rice, lifting for the purpose the quantitative import restriction on rice, and for other purposes.

- a. RA 10915
- b. RA 10912
- c. RA 11203
- d. RA 9003

Which term refers to the tariff rate commitments under the ASEAN Trade in Goods Agreement (ATIGA) for importations from ASEAN member States?

- a. Bound Rate
- b. ATIGA Rate
- c. Most Favoured Nation Rate
- d. In-Quota Tariff Rate

Which term refers to the tariff rate commitments under the ASEAN Trade in Goods Agreement (ATIGA) for importations from ASEAN member States?

- a. Bound Rate
- b. ATIGA Rate**
- c. Most Favoured Nation Rate
- d. In-Quota Tariff Rate

Which refers to replacing quantitative import restrictions with tariffs on agricultural products?

- a. Tariffication
- b. Tariff Equivalent
- c. MFN Rate
- d. Bound Rate

Which refers to replacing quantitative import restrictions with tariffs on agricultural products?

- a. Tariffication
- b. Tariff Equivalent
- c. MFN Rate
- d. Bound Rate

ASEAN Trade in Goods Agreement (ATIGA) Rate – Tariff rate commitments under the ASEAN Trade in Goods Agreement for imports from ASEAN member states.

Buffer Stock – Optimal rice inventory for emergencies and disaster relief.

Quantitative Import Restrictions – Non-tariff limits on import quantities, including quotas and licensing.

Tariff – Tax on imports to raise revenue and protect local industries.

Tariffication – Replacing import quotas/restrictions on agricultural products with tariffs.

Which government agency issues the Sanitary and
Phytosanitary Import Clearance (SPSIC) for rice?

- a) Department of Agriculture
- b) Bureau of Plant Industry
- c) Bureau of Customs
- d) National Food Authority

Which government agency issues the Sanitary and
Phytosanitary Import Clearance (SPSIC) for rice?

- a) Department of Agriculture
- b) Bureau of Plant Industry**
- c) Bureau of Customs
- d) National Food Authority

SECTION 4. Issuance of Sanitary and Phytosanitary Import Clearance for Rice for the Sole Purpose of Ensuring Food Safety

- All rice importers must secure a **Sanitary and Phytosanitary Import Clearance (SPSIC)** from the **Bureau of Plant Industry (BPI)** before importation, in accordance with existing laws, rules, and regulations.
- The clearance **shall not** impose import volume or timing restrictions.
- If the **Bureau of Plant Industry** fails to release the SPSIC or notify the importer of any error, deficiency, omission, or additional documentary requirement, the SPSIC is **automatically approved** within **seven (7) days** after submission of complete requirements.

Sec. 7. Powers of the President

- **General Authority** – The President may act with full delegated authority under the Customs Modernization and Tariff Act (CMTA) to protect farmers and consumers, subject to national interest.
- **Adjust Import Duty Rates** – May increase, reduce, revise, or adjust rice import duties (up to the bound rate under WTO and ATIGA), including changes in classification.
 - Can only be exercised when **Congress is not in session**.
 - Changes take effect **15 days after publication**.
- **Address Shortages or Emergencies** – In case of imminent or forecasted rice shortage (or similar urgent situations), the President may allow imports at a **lower applied tariff rate** for a limited time or volume.
 - Effective immediately.
 - Allowed only when **Congress is not in session**.

What is the out-quota tariff rate for rice imports from non-ASEAN WTO member states?

- A) 100%
- B) 150%
- C) 180%
- D) 10%

What is the out-quota tariff rate for rice imports from non-ASEAN WTO member states?

- A) 100%
- B) 150%
- C) 180%**
- D) 10%

How much annual appropriation is allocated to the Rice Competitiveness Enhancement Fund (Rice Fund)?

- A) ₱5 billion
- B) ₱10 billion
- C) ₱15 billion
- D) ₱20 billion

How much annual appropriation is allocated to the Rice Competitiveness Enhancement Fund (Rice Fund)?

- A) ₱5 billion
- B) ₱10 billion**
- C) ₱15 billion
- D) ₱20 billion

Who is responsible for conducting the mandatory review of the Rice Fund at the end of the sixth year?

- A) Department of Agriculture
- B) Technical Education and Skills Development Authority (TESDA)
- C) Congressional Oversight Committee on Agricultural and Fisheries Modernization (COCAFM)
- D) Philippine Rice Research Institute (PhilRice)

Who is responsible for conducting the mandatory review of the Rice Fund at the end of the sixth year?

- A) Department of Agriculture
- B) Technical Education and Skills Development Authority (TESDA)
- C) Congressional Oversight Committee on Agricultural and Fisheries Modernization (COCAFAM)
- D) Philippine Rice Research Institute (PhilRice)

What primary benchmark will COCAFM use to evaluate the effectiveness of the Rice Fund interventions?

- A) Increase or decrease in rice production
- B) Performance of agricultural banks
- C) Increase or decrease in farmers' incomes
- D) Farm mechanization progress

What primary benchmark will COCAFM use to evaluate the effectiveness of the Rice Fund interventions?

- A) Increase or decrease in rice production
- B) Performance of agricultural banks
- C) Increase or decrease in farmers' incomes**
- D) Farm mechanization progress

What percentage of the Rice Fund is allocated for rice farm machineries and equipment?

- A) 30%
- B) 40%
- C) 50%
- D) 10%

What percentage of the Rice Fund is allocated for rice farm machineries and equipment?

- A) 30%
- B) 40%
- C) 50%**
- D) 10%

Which agency is responsible for implementing the grant for rice farm machineries and equipment?

- A) TESDA
- B) PhilRice
- C) PHilMech
- D) Land Bank of the Philippines (LBP)

Which agency is responsible for implementing the grant for rice farm machineries and equipment?

- A) TESDA
- B) PhilRice
- C) PHilMech**
- D) Land Bank of the Philippines (LBP)

How much of the Rice Fund is allocated for rice seed development, propagation, and promotion?

- A) 10%
- B) 20%
- C) 30%
- D) 40%

How much of the Rice Fund is allocated for rice seed development, propagation, and promotion?

- A) 10%
- B) 20%
- C) 30%**
- D) 40%

RICE FUND ALLOCATION AND DISBURSEMENT

Rice Farm Machineries and Equipment (50%)

- Implemented by PHilMech as grants-in-kind to: Farmers associations, Registered rice cooperatives, Local government units (LGUs)
- Includes equipment like tillers, tractors, threshers, planters, harvesters, irrigation pumps, solar irrigation systems, and dryers.
- PHilMech to prioritize procuring from accredited local manufacturers to support local industry.

Rice Seed Development, Propagation, and Promotion (30%)

- Managed by PhilRice for:
 - Developing and promoting inbred rice seeds
 - Organizing farmers into seed growers associations or cooperatives.

Expanded Rice Credit Assistance (10%)

- Credit facilities with minimal interest and collateral provided to farmers and cooperatives.
- Managed equally by Land Bank of the Philippines (LBP) and Development Bank of the Philippines (DBP).

Rice Extension Services (10%)

- Delivered by PHilMech, PhilRice, ATI, and TESDA to provide:
 - Training on rice production, farm mechanization, and seed production
 - Modern farming techniques and technology transfer through farm schools.
- Allocation:
 - 70% to TESDA
 - 10% each to ATI, PhilRice, and PHilMech.

Which institution is tasked with rice seed development, propagation, and promotion?

- A) ATI
- B) PhilRice
- C) PHilMech
- D) TESDA

Which institution is tasked with rice seed development, propagation, and promotion?

- A) ATI
- B) PhilRice**
- C) PHilMech
- D) TESDA

What percentage of the Rice Fund is allocated for credit assistance to rice farmers?

- A) 5%
- B) 10%
- C) 15%
- D) 20%

What percentage of the Rice Fund is allocated for credit assistance to rice farmers?

- A) 5%
- B) 10%**
- C) 15%
- D) 20%

Which banks will manage the credit assistance program under the Rice Fund?

- A) Land Bank of the Philippines and DBP
- B) Bangko Sentral ng Pilipinas and Land Bank
- C) DBP and Philippine National Bank
- D) Land Bank of the Philippines and BDO

Which banks will manage the credit assistance program under the Rice Fund?

- A) Land Bank of the Philippines and DBP**
- B) Bangko Sentral ng Pilipinas and Land Bank
- C) DBP and Philippine National Bank
- D) Land Bank of the Philippines and BDO

What share of the Rice Fund is allocated for extension services?

- A) 20%
- B) 30%
- C) 10%
- D) 50%

What share of the Rice Fund is allocated for extension services?

- A) 20%
- B) 30%
- C) 10%**
- D) 50%

Which institutions are involved in providing extension services under the Rice Fund?

- A) PhilRice, PHilMech, TESDA, ATI
- B) LBP, DBP, ATI, TESDA
- C) PHilMech, IRRI, ATI, PhilRice
- D) PhilRice, State Colleges/Universities, TESDA, BSP

Which institutions are involved in providing extension services under the Rice Fund?

- A) PhilRice, PHilMech, TESDA, ATI
- B) LBP, DBP, ATI, TESDA
- C) PHilMech, IRRI, ATI, PhilRice
- D) PhilRice, State Colleges/Universities, TESDA, BSP

RA 10601

RA 10601 is known as the “Agricultural and Fisheries
Mechanization (AFMech) Law”

Which of the following is considered agricultural and fisheries machinery?

- a) Tractors and their attachments
- b) Milling machines
- c) Cold storage facilities
- d) All of the above

Which of the following is considered agricultural and fisheries machinery?

- a) Tractors and their attachments
- b) Milling machines
- c) Cold storage facilities
- d) All of the above

Which activity is part of agro-industrial processing?

- a) Grading and sorting products
- b) Canning and packaging
- c) Slaughtering and freezing
- d) All of the above

Which activity is part of agro-industrial processing?

- a) Grading and sorting products
- b) Canning and packaging
- c) Slaughtering and freezing
- d) All of the above

RA 10601 TERMS

Agricultural and Fisheries Machinery – Equipment used for production, harvesting, processing, storage, manufacture, preservation, transport, and distribution of agricultural and fisheries products.

Agricultural and Fisheries Mechanization – Development, manufacture, and application of appropriate, location-specific, and cost-effective machinery powered by human, animal, mechanical, electrical, renewable, or other nonconventional energy sources.

Agro-Industrial Processing – Activities to maintain, improve, or change the quality, form, or characteristics of agricultural, fisheries, and forestry products.

Fishing Boat – Boat, ship, or watercraft of 3 gross tons or less used for fishing or assisting in fishing activities.

According to RA 10601, what is one of the primary objectives of the National Agri-fishery Mechanization Program?

- A) To promote the importation of agricultural machinery
- B) To unify efforts in the research, design, and development of agricultural and fisheries machinery
- C) To provide subsidies exclusively to foreign manufacturers
- D) To restrict the use of mechanization in agriculture

According to RA 10601, what is one of the primary objectives of the National Agri-fishery Mechanization Program?

- A) To promote the importation of agricultural machinery
- B) To unify efforts in the research, design, and development of agricultural and fisheries machinery
- C) To provide subsidies exclusively to foreign manufacturers
- D) To restrict the use of mechanization in agriculture

Who is responsible for the overall implementation of the National Agri-fishery Mechanization Program?

- A) The Secretary of Agriculture
- B) The President of the Philippines
- C) The Undersecretary designated by the Secretary of Agriculture
- D) Local Government Units (LGUs)

Who is responsible for the overall implementation of the National Agri-fishery Mechanization Program?

- A) The Secretary of Agriculture
- B) The President of the Philippines
- C) The Undersecretary designated by the Secretary of Agriculture
- D) Local Government Units (LGUs)

What type of institutions is the Agricultural and Fisheries Mechanization RDE Network composed of?

- A) Only government agencies
- B) Only private sector companies
- C) Research and educational institutions, LGUs, NGOs, and machinery associations
- D) International organizations

What type of institutions is the Agricultural and Fisheries Mechanization RDE Network composed of?

- A) Only government agencies
- B) Only private sector companies
- C) Research and educational institutions, LGUs, NGOs, and machinery associations
- D) International organizations

Who chairs the Agricultural and Fisheries Mechanization RDE Network?

- A) The Secretary of Agriculture
- B) The Director of PHilMech
- C) The President of the Philippines
- D) The Director of the Department of Labor and Employment

Who chairs the Agricultural and Fisheries Mechanization RDE Network?

- A) The Secretary of Agriculture
- B) The Director of PHilMech**
- C) The President of the Philippines
- D) The Director of the Department of Labor and Employment

What services are provided by the Agri-fisheries Machinery and Equipment Service Centers?

- A) Importing agricultural machinery
- B) Repair and troubleshooting services of agricultural machinery
- C) Exclusive sales of machinery
- D) Land leasing for farming

What services are provided by the Agri-fisheries Machinery and Equipment Service Centers?

- A) Importing agricultural machinery
- B) Repair and troubleshooting services of agricultural machinery
- C) Exclusive sales of machinery
- D) Land leasing for farming

How are agricultural and fisheries machinery assemblers and manufacturers classified?

- A) By their sales volume
- B) Into small, medium, and large categories
- C) Based on their geographical location
- D) By the number of employees

How are agricultural and fisheries machinery assemblers and manufacturers classified?

- A) By their sales volume
- B) Into small, medium, and large categories**
- C) Based on their geographical location
- D) By the number of employees

Local Assembly, Manufacture, Supply, and After-Sales Service Accdg to AFMEch Law

Section 15: Local Assembling and Manufacturing

The Department of Agriculture (DA) will promote local production of agricultural and fisheries machinery through partnerships and joint ventures. This includes conducting feasibility studies and R&D for local assembly of engines and equipment.

Section 16: Incentives for Local Manufacturers and Assemblers

Local ventures in manufacturing agri-fisheries machinery are eligible for loans and incentives under the Agricultural Competitiveness Enhancement Fund (ACEF) if they are registered enterprises in preferred investment areas.

Section 17: After-Sales Service

All machinery assemblers, manufacturers, and suppliers must provide after-sales service and warranty, which will be monitored by local agriculture offices and the Bureau of Agricultural and Fisheries Engineering (BAFE).

Testing and Evaluation, Registration, Standardization, and Accreditation

Section 18: Testing and Evaluation

Agricultural machinery must undergo testing by the Agricultural Machinery Testing and Evaluation Center (AMTEC) to meet national quality and performance standards before market release. Regular evaluations will ensure consistent quality, with BAFE maintaining a certification registry.

Section 19: Registration of Ownership

Owners of agricultural machinery must register their equipment with local government agriculture offices, which will maintain registries accessible online. National guidelines for registration will be established by the DA.

Section 20: Registration of Manufacturers

Manufacturers and importers must register with BAFE within six months of the Act's enactment, provide product certification within three years, and submit lists of their equipment within one year.

Section 21: Standards Development and Enforcement

The DA will develop standards for agricultural machinery in coordination with various agencies, ensuring compliance with international standards. Local government units (LGUs) will enforce these standards in manufacturing and distribution.

In RA 10601, the Bureau of Agriculture and Fisheries Product Standards (BAFPS) was renamed to:

- a) Bureau of Agriculture and Fisheries Management
- b) Bureau of Agriculture and Fisheries Standards
- c) Bureau of Agricultural Machinery Standards
- d) Bureau of Farming and Fishery Equipment

In RA 10601, the Bureau of Agriculture and Fisheries Product Standards (BAFPS) was renamed to:

- a) Bureau of Agriculture and Fisheries Management
- b) Bureau of Agriculture and Fisheries Standards**
- c) Bureau of Agricultural Machinery Standards
- d) Bureau of Farming and Fishery Equipment

Bureau of Agriculture and Fisheries Standards (BAFS)

- [Formerly Bureau of Agriculture and Fisheries Product Standards (BAFPS)]
- Develops standards for agriculture and fishery machinery, tools, and equipment in coordination with accredited testing centers and other stakeholders.
- Authorized to create a **new section** under the Standards Development Division for machinery regulations.

Agricultural Machinery Testing and Evaluation Center (AMTEC)

- Institutionalized under the College of Engineering and Agro-Industrial Technology (CEAT) at the University of the Philippines Los Baños (UPLB).
- Designated as the **premier and reference testing center** in the country.
- Must closely coordinate with **BAFS** and **BAFE** for functional integration.
- Provides **technical assistance** in establishing testing centers nationwide.

Philippine Center for Postharvest Development and Mechanization (PHILMech)

- coordinate, plan and execute agricultural and fishery mechanization and postharvest RDE programs and projects of the DA.

Under Republic Act No. 10601, what is the primary role of Local Government Units (LGUs) regarding agricultural and fisheries machinery and equipment?

- A. Conduct research, regulate, and collect fees for agricultural and fisheries machinery and equipment
- B. Undertake applied research, extension, dispersal, management, and regulation, including collection of fees
- C. Formulate national standards and accredit agricultural and fisheries machinery testing centers
- D. Provide technical assistance and coordinate with BAFS for machinery quality and safety standards

Under Republic Act No. 10601, what is the primary role of Local Government Units (LGUs) regarding agricultural and fisheries machinery and equipment?

- A. Conduct research, regulate, and collect fees for agricultural and fisheries machinery and equipment
- B. Undertake applied research, extension, dispersal, management, and regulation, including collection of fees
- C. Formulate national standards and accredit agricultural and fisheries machinery testing centers
- D. Provide technical assistance and coordinate with BAFS for machinery quality and safety standards

Under Republic Act No. 10601, what is the penalty for any person who violates its provisions?

- a) Fine of ₱500 to ₱5,000 or imprisonment of 1 month to 6 months
- b) Fine of ₱1,000 to ₱10,000 or imprisonment of 2 months to 1 year, or both, at the court's discretion
- c) Fine of ₱5,000 to ₱15,000 or imprisonment of 6 months to 2 years
- d) Fine of ₱1,000 to ₱10,000 and imprisonment of exactly 1 year

Under Republic Act No. 10601, what is the penalty for any person who violates its provisions?

- a) Fine of ₱500 to ₱5,000 or imprisonment of 1 month to 6 months
- b) Fine of ₱1,000 to ₱10,000 or imprisonment of 2 months to 1 year, or both, at the court's discretion
- c) Fine of ₱5,000 to ₱15,000 or imprisonment of 6 months to 2 years
- d) Fine of ₱1,000 to ₱10,000 and imprisonment of exactly 1 year

RA 8435

RA 8435 is also known as “Agriculture and Fisheries Modernization Act of 1997.”

What is the minimum cluster size for contiguous farming projects as promoted by the DA?

- a) 20 hectares
- b) 30 hectares
- c) 50 hectares
- d) 100 hectares

What is the minimum cluster size for contiguous farming projects as promoted by the DA?

- a) 20 hectares
- b) 30 hectares
- c) 50 hectares**
- d) 100 hectares

What is one of the goals of contiguous farming projects?

- a) Increase individual farm sizes
- b) Promote farmland clustering
- c) Decrease agricultural productivity
- d) Limit farmers' cooperation

What is one of the goals of contiguous farming projects?

- a) Increase individual farm sizes
- b) Promote farmland clustering**
- c) Decrease agricultural productivity
- d) Limit farmers' cooperation

An act prescribing urgent related measures to modernize the agriculture and fisheries sectors of the country in order to enhance their profitability, and prepare said sectors for the challenges of the globalization through an adequate, focused and rational delivery of necessary support services, appropriating funds therefor and for other purposes

- a) RA 10601
- b) RA 8435
- c) RA 11901
- d) RA 9275

An act prescribing urgent related measures to modernize the agriculture and fisheries sectors of the country in order to enhance their profitability, and prepare said sectors for the challenges of the globalization through an adequate, focused and rational delivery of necessary support services, appropriating funds therefor and for other purposes

- a) RA 10601
- b) RA 8435
- c) RA 11901
- d) RA 9275

Defined as a barangay at a minimum or a cluster of contiguous barangays with a critical mass of farmers or farm workers focused on agrarian development, land tenure improvement, and support service delivery.

- A) Cluster farmer group
- B) Agrarian reform community
- C) Agrarian farmer community
- D) Group of Clustered Farmers

Defined as a barangay at a minimum or a cluster of contiguous barangays with a critical mass of farmers or farm workers focused on agrarian development, land tenure improvement, and support service delivery.

- A) Cluster farmer group
- B) Agrarian reform community
- C) Agrarian farmer community
- D) Group of Clustered Farmers

Which of the following qualifies as a "Small and Medium Enterprise" (SME) under the given definitions?

- a) A cooperative with total assets of P1,200,000
- b) A partnership with total assets of P20,000,000
- c) A single proprietorship with land worth P5,000,000
- d) A corporation with total assets of P900,000

Which of the following qualifies as a "Small and Medium Enterprise" (SME) under the given definitions?

- a) A cooperative with total assets of P1,200,000
- b) A partnership with total assets of P20,000,000**
- c) A single proprietorship with land worth P5,000,000
- d) A corporation with total assets of P900,000

"Small and Medium Enterprise (SME)" refers to any business activity or enterprise engaged in industry, agribusiness and/or services, whether single proprietorship, cooperative, partnership or corporation whose total assets, inclusive of those arising from loans but exclusive of the land on which the particular business entity's office, plan and equipment are situated, must have value falling under the following categories:

Micro – not more than P 1,500,000

Small – P 1,500,001 to P 15,000,000

Medium – P15,000,001 to P 60,000,000

What is the purpose of identifying Strategic Agriculture and Fisheries Development Zones (SAFDZ)?

- a) To convert agricultural lands into residential areas
- b) To ensure efficient and sustainable use of lands for production
- c) To promote tourism in rural areas
- d) To establish new cities for urban development

What is the purpose of identifying Strategic Agriculture and Fisheries Development Zones (SAFDZ)?

- a) To convert agricultural lands into residential areas
- b) To ensure efficient and sustainable use of lands for production
- c) To promote tourism in rural areas
- d) To establish new cities for urban development

Strategic Agriculture and Fisheries Development Zones (SAFDZ)

- ensure that lands are efficiently and sustainably utilized for food and non-food production and agro-industrialization.
- the identification of SAFDZ involves collaboration between the Department of Agriculture, local government units, appropriate government agencies, concerned NGOs, and organized farmers' and fisherfolk's groups.

What is the primary focus of the Agro-Industry Modernization Credit and Financing Program (AMCFP)?

- a) To fund only large agricultural corporations
- b) To provide credit assistance to various agricultural activities
- c) To eliminate all existing credit programs
- d) To restrict funding to urban projects

What is the primary focus of the Agro-Industry Modernization Credit and Financing Program (AMCFP)?

- a) To fund only large agricultural corporations
- b) To provide credit assistance to various agricultural activities
- c) To eliminate all existing credit programs
- d) To restrict funding to urban projects

What must the interest rates be determined by according to Section 20 of AFMA Law?

- a) Government regulation
- b) Market forces
- c) Non-profit organizations
- d) International standards

What must the interest rates be determined by according to Section 20 of AFMA Law?

- a) Government regulation
- b) Market forces**
- c) Non-profit organizations
- d) International standards

What is one of the key components of the AMCFP?

- a) Funding for urban infrastructure projects
- b) Acquisition of farm and fishery equipment and machinery
- c) Support for non-agricultural industries
- d) Loan guarantees for large corporations

What is one of the key components of the AMCFP?

- a) Funding for urban infrastructure projects
- b) Acquisition of farm and fishery equipment and machinery
- c) Support for non-agricultural industries
- d) Loan guarantees for large corporations

What is the funding allocation for the Agriculture and Fisheries Credit Guarantee Fund?

- a) At least 5% of the total AMCFP funding
- b) At least 10% of the total AMCFP funding
- c) No specific allocation mentioned
- d) 50% of the total AMCFP funding

What is the funding allocation for the Agriculture and Fisheries Credit Guarantee Fund?

- a) At least 5% of the total AMCFP funding
- b) At least 10% of the total AMCFP funding**
- c) No specific allocation mentioned
- d) 50% of the total AMCFP funding

An act creating the coconut farmers and industry trust fund, providing for its management and utilization, reconstituting for the purpose the philippine coconut authority board, and for other purposes.

- a) RA 10912
- b) RA 11524
- c) No specific allocation mentioned
- d) 50% of the total AMCFP funding

An act creating the coconut farmers and industry trust fund, providing for its management and utilization, reconstituting for the purpose the philippine coconut authority board, and for other purposes.

- a) RA 10912
- b) RA 11524**
- c) No specific allocation mentioned
- d) 50% of the total AMCFP funding

RA 11524

RA 11524 is also known as "Coconut Farmers and Industry Trust Fund Act" or Coco Levy Law (February 26, 2021)

Which of the following is NOT a qualification to be called a coconut farmer under the Coco Levy Law?

- a) An owner of a coconut farm that is more than five (5) hectares
- b) A leaseholder with not more than five (5) hectares
- c) A farm worker engaged in the harvesting of nuts and processing of copra
- d) An owner who tills the land of a coconut farm that is not more than five (5) hectares

Which of the following is NOT a qualification to be called a coconut farmer under the Coco Levy Law?

a) An owner of a coconut farm that is more than five (5) hectares

b) A leaseholder with not more than five (5) hectares

c) A farm worker engaged in the harvesting of nuts and processing of copra

d) An owner who tills the land of a coconut farm that is not more than five (5) hectares

A **Coconut Farmer** is defined in RA 11524 as follows:

1. An owner of a coconut farm not exceeding five (5) hectares who either:
 - Tills the land themselves (owner-cultivation), or
 - Does not till the land but has control and supervision over its cultivation.
2. A leaseholder or tenant with a coconut farm not exceeding five (5) hectares who tills or supervises the cultivation.
3. A farm worker or laborer, whether seasonal or itinerant, whose primary livelihood involves harvesting coconuts and processing copra.

Who is responsible for preparing the Coconut Farmers and Industry Development Plan?

- A) Department of Agriculture
- B) Philippine Coconut Authority (PCA)
- C) Department of Trade and Industry (DTI)
- D) Land Bank of the Philippines

Who is responsible for preparing the Coconut Farmers and Industry Development Plan?

- A) Department of Agriculture
- B) Philippine Coconut Authority (PCA)**
- C) Department of Trade and Industry (DTI)
- D) Land Bank of the Philippines

What is the primary purpose of the Coconut Farmers and Industry Development Plan?

- A) To establish a coconut industry monopoly
- B) To alleviate poverty and promote development in the coconut industry
- C) To restrict coconut farming to large corporations
- D) To ban the importation of coconut products

What is the primary purpose of the Coconut Farmers and Industry Development Plan?

- A) To establish a coconut industry monopoly
- B) To alleviate poverty and promote development in the coconut industry
- C) To restrict coconut farming to large corporations
- D) To ban the importation of coconut products

What percentage of the Trust Fund allocation is designated for the development of hybrid coconut seed farms?

- A) 10%
- B) 15%
- C) 20%
- D) 25%

What percentage of the Trust Fund allocation is designated for the development of hybrid coconut seed farms?

- A) 10%
- B) 15%
- C) 20%
- D) 25%

What percentage of funding is allocated for health and medical programs for farmers and their families?

- A) 4%
- B) 8%
- C) 10%
- D) 12%

What percentage of funding is allocated for health and medical programs for farmers and their families?

- A) 4%
- B) 8%
- C) 10%**
- D) 12%

RA 11524 FUND ALLOCATION

1. **Development of hybrid coconut seed farms and nursery: 20%**
 - Implemented by PCA (15%) and DOST-PCAARRD (5% for research)
2. **Training for farmers and families: 8%**
 - Training on coconut production, processing technologies, and sustainable farming through TESDA and ATI (shared equally)
3. **Research, marketing, and promotion: 5%**
 - Implemented by the Bureau of Micro, Small and Medium Enterprise Development under DTI
4. **Crop Insurance: 4%**
 - Implemented by the Philippine Crop Insurance Corporation (PCIC)
5. **Shared facilities for processing: 10%**
 - Implemented by PhilMech, benefiting coconut farmers cooperatives and LGUs

6. Farm improvements through diversification/intercropping: 10%

- Implemented by NDA, High Value Crops Development Program, and Bureau of Animal Industry (shared equally)

7. Credit programs: 10%

- Through DBP and LBP (shared equally)

8. Infrastructure development: 10%

- Implemented by DPWH in coconut-producing LGUs, prioritizing coconut coir solutions

9 Scholarship program for farmers and families: 8%

- Implemented by CHED

10. Health and medical program for farmers and families: 10%

- Establishing a special unit within the agency

What is the function of the Coconut Farmers Registry as stated in the Plan?

- A) To promote coconut exports
- B) To identify beneficiaries of the programs
- C) To regulate coconut prices
- D) To manage registration of coconut farms

What is the function of the Coconut Farmers Registry as stated in the Plan?

- A) To promote coconut exports
- B) To identify beneficiaries of the programs**
- C) To regulate coconut prices
- D) To manage registration of coconut farms

Which agency is tasked with implementing crop insurance for coconut farmers according to the funding allocation?

- A) PCC
- B) PCIC
- C) PCA
- D) PCI

Which agency is tasked with implementing crop insurance for coconut farmers according to the funding allocation?

- A) PCC
- B) PCIC**
- C) PCA
- D) PCI

How much is allocated to the Philippine Coconut Authority (PCA) for the formulation of the Coconut Farmers and Industry Development Plan?

- A) Three million pesos (₱3,000,000,000)
- B) Five million pesos (₱5,000,000,000)
- C) Five billion pesos (₱5,000,000,000)
- D) Ten million pesos (₱10,000,000,000)

How much is allocated to the Philippine Coconut Authority (PCA) for the formulation of the Coconut Farmers and Industry Development Plan?

- A) Three million pesos (₱3,000,000,000)
- B) Five million pesos (₱5,000,000,000)
- C) Five billion pesos (₱5,000,000,000)**
- D) Ten million pesos (₱10,000,000,000)

What is RA 9513?

- a. Renewable Energy Act of 2007
 - b. Renewable Energy Act of 2008
 - c. Renewable Energy Act of 2009
 - d. Renewable Energy Act of 2010
- 

What is RA 9513?

- a. Renewable Energy Act of 2007
 - b. Renewable Energy Act of 2008**
 - c. Renewable Energy Act of 2009
 - d. Renewable Energy Act of 2010
- 

RA 9513

RA 9513 is the “Renewable Energy Act of 2008”
(December 16, 2008)

In Republic Act No. 9513, what does the term "*co-generation systems*" refer to?

- a) Facilities that produce electrical and/or mechanical energy and store it for future industrial use
- b) Facilities that produce electrical and/or mechanical energy and useful thermal energy through the sequential use of energy
- c) Facilities that produce only electrical energy for industrial and commercial purposes
- d) Facilities that produce electrical and/or mechanical energy and useful thermal energy separately without sequential use

In Republic Act No. 9513, what does the term "*co-generation systems*" refer to?

- a) Facilities that produce electrical and/or mechanical energy and store it for future industrial use
- b) Facilities that produce electrical and/or mechanical energy and useful thermal energy through the sequential use of energy
- c) Facilities that produce only electrical energy for industrial and commercial purposes
- d) Facilities that produce electrical and/or mechanical energy and useful thermal energy separately without sequential use

In Republic Act No. 9513, which term refers to a power or energy generation facility that uses two or more types of technologies utilizing both conventional and/or renewable fuel sources, with at least 10 megawatts or 10% of annual energy output coming from the renewable energy component?

- a) Cogeneration Systems
- b) Hybrid Systems
- c) Renewable Energy Systems
- d) Integrated Power Systems

In Republic Act No. 9513, which term refers to a power or energy generation facility that uses two or more types of technologies utilizing both conventional and/or renewable fuel sources, with at least 10 megawatts or 10% of annual energy output coming from the renewable energy component?

- a) Cogeneration Systems
- b) Hybrid Systems
- c) Renewable Energy Systems
- d) Integrated Power Systems

Which term refers to the mechanism that allows end-users to choose renewable energy to meet their energy needs?

- a) Green Energy Option
- b) Renewable Energy Choice Program
- c) Clean Energy Mechanism
- d) Sustainable Power Selection

Which term refers to the mechanism that allows end-users to choose renewable energy to meet their energy needs?

- a) Green Energy Option
- b) Renewable Energy Choice Program
- c) Clean Energy Mechanism
- d) Sustainable Power Selection

RA 9513 Terms

1. Renewable Energy Resources

- **Biomass Resources** – Organic, biodegradable material from plants, animals, microorganisms (excluding corn, soya, rice; includes sugarcane, coconut, residues, waste).
- **Geothermal Resources** – Steam, hot water, brines, and heat from geothermal formations.
- **Hydropower Resources** – Water sources suitable for hydropower projects.
- **Renewable Energy Resources** – Naturally replenished sources (biomass, solar, wind, geothermal, ocean, hydro).
- **Solar Energy** – Energy from the sun's radiation.
- **Wind Energy** – Energy from moving air.

RA 9513 Terms

2. Renewable Energy Systems / Technologies

- **Biomass Energy Systems** – Convert biomass into heat, steam, power, or electricity.
- **Geothermal Energy Systems** – Convert geothermal heat into useful power.
- **Hydroelectric Power Systems** – Produce electricity from moving water.
- **Ocean Energy Systems** – Use currents, waves, or temperature gradients to produce power.
- **Solar Energy Systems** – Convert solar energy into heat or electricity.
- **Wind Energy Systems** – Convert wind energy into mechanical or electrical power.
- **Hybrid Systems** – Use two or more generation technologies with at least 10 MW or 10% renewable share.
- **Co-generation Systems** – Produce electricity/mechanical energy and useful thermal energy in sequence.
- **Micro-scale Project** – Renewable project $\leq$ 100 kW.
- **Renewable Energy Systems** – General term for systems converting renewable resources to energy.

RA 9513 Terms

3. Policies and Mechanisms

- **Green Energy Option** – Lets consumers choose renewable energy.
- **Net Metering** – Two-way grid connection for distributed generation, charging only net usage.
- **Renewable Portfolio Standards** – Requires suppliers to get a set percentage from renewables.
- **Missionary Electrification** – Power supply for unviable areas.
- **Rural Electrification** – Extending electricity to rural areas.
- **Government Share** – Portion due to government from renewable energy use.

According to RA 9513 or Renewable Energy Act of 2016, what is the government's share on existing and new renewable energy (RE) development projects, excluding indigenous geothermal energy?

- A) 0.5% of gross income
- B) 1% of gross income
- C) 1.5% of gross income
- D) 2% of gross income

According to RA 9513 or Renewable Energy Act of 2016, what is the government's share on existing and new renewable energy (RE) development projects, excluding indigenous geothermal energy?

- A) 0.5% of gross income
- B) 1% of gross income**
- C) 1.5% of gross income
- D) 2% of gross income

What is the value-added tax (VAT) rate applied to the sale of fuel or power generated from renewable energy sources, as stated in the National Internal Revenue Code?

- A) 5%
- B) 10%
- C) 0%
- D) 15%

What is the value-added tax (VAT) rate applied to the sale of fuel or power generated from renewable energy sources, as stated in the National Internal Revenue Code?

- A) 5%
- B) 10%
- C) 0%**
- D) 15%

What percentage of the universal charge for power needed to service missionary areas is a renewable energy developer entitled to as a cash generation-based incentive per kilowatt hour generated?

- A) 25%
- B) 50%
- C) 75%
- D) 100%

What percentage of the universal charge for power needed to service missionary areas is a renewable energy developer entitled to as a cash generation-based incentive per kilowatt hour generated?

- A) 25%
- B) 50%**
- C) 75%
- D) 100%

The Renewable Energy Trust Fund (RETF) is established specifically to promote the development and greater utilization of renewable energy. Who administers the RETF?

- A) The Department of Environment and Natural Resources (DENR)
- B) The Department of Energy (DOE)
- C) The Department of Agriculture (DA)
- D) President of the Philippines

The Renewable Energy Trust Fund (RETF) is established specifically to promote the development and greater utilization of renewable energy. Who administers the RETF?

A) The Department of Environment and Natural Resources (DENR)

B) The Department of Energy (DOE)

C) The Department of Agriculture (DA)

D) President of the Philippines

The RETF will be funded from the following sources:

1. **Emission Fees** – Proceeds from emission fees collected from generating facilities (Philippine Clean Air Act)
2. **Philippine Charity Sweepstakes Office** – 1.5% of net annual income
3. **Philippine Amusement and Gaming Corporation** – 1.5% of net annual income
4. **Philippine National Oil Company** – 1.5% of net annual dividends to the National Treasury
5. **Contributions and Donations** – Tax-deductible contributions, grants, and donations

The RETF will be funded from the following sources:

6. Indigenous Non-Renewable Energy Resources – 1.5% of government share from their development and use

7. RETF Revenue – Any revenue generated from the utilization of the fund

8. Fines and Penalties – Proceeds from fines and penalties imposed under this Act

The RETF will be funded from the following sources:

6. Indigenous Non-Renewable Energy Resources – 1.5% of government share from their development and use

7. RETF Revenue – Any revenue generated from the utilization of the fund

8. Fines and Penalties – Proceeds from fines and penalties imposed under this Act

An act providing for an ecological solid waste management program, creating the necessary institutional mechanisms and incentives, declaring certain acts prohibited and providing penalties, appropriating funds therefor, and for other purposes.

a. RA 3927

b. RA 9003

c. RA 10068

d. RA 8749

An act providing for an ecological solid waste management program, creating the necessary institutional mechanisms and incentives, declaring certain acts prohibited and providing penalties, appropriating funds therefor, and for other purposes.

a. RA 3927

b. RA 9003

c. RA 10068

d. RA 8749

RA 9003

RA 9003 is the “Ecological Solid Waste Management Act of 2000”. (July 24, 2000)

What does “leachate” refer to?

- a) Clean water collected from a landfill drainage system
- b) Contaminated liquid formed when water percolates through decomposing solid waste
- c) Treated wastewater from waste processing plants
- d) Liquid runoff from washing recyclable materials

What does “leachate” refer to?

- a) Clean water collected from a landfill drainage system
- b) Contaminated liquid formed when water percolates through decomposing solid waste
- c) Treated wastewater from waste processing plants
- d) Liquid runoff from washing recyclable materials

It refers to a facility that includes a solid waste transfer or sorting station, drop-off center, composting facility, and recycling facility.

- a) Sanitary Landfill
- b) Materials Recovery Facility
- c) Waste Transfer Station
- d) Recycling Center

It refers to a facility that includes a solid waste transfer or sorting station, drop-off center, composting facility, and recycling facility.

- a) Sanitary Landfill
- b) Materials Recovery Facility**
- c) Waste Transfer Station
- d) Recycling Center

Under the Ecological Solid Waste Management Act, what is the primary role of Local Government Units (LGUs)?

- a) Implement and enforce the Act, with barangays collecting biodegradable, compostable, and reusable wastes, and municipalities/cities collecting non-recyclable and hazardous wastes
- b) Implement and enforce the Act, with barangays collecting biodegradable, compostable, and reusable wastes, and municipalities/cities collecting non-recyclable and special wastes
- c) Implement and enforce the Act, with barangays collecting non-recyclable wastes, and municipalities/cities collecting biodegradable and reusable wastes
- d) Implement and enforce the Act, with barangays collecting all waste types, and municipalities/cities handling only waste disposal sites

Under the Ecological Solid Waste Management Act, what is the primary role of Local Government Units (LGUs)?

- a) Implement and enforce the Act, with barangays collecting biodegradable, compostable, and reusable wastes, and municipalities/cities collecting non-recyclable and hazardous wastes
- b) Implement and enforce the Act, with barangays collecting biodegradable, compostable, and reusable wastes, and municipalities/cities collecting non-recyclable and special wastes
- c) Implement and enforce the Act, with barangays collecting non-recyclable wastes, and municipalities/cities collecting biodegradable and reusable wastes
- d) Implement and enforce the Act, with barangays collecting all waste types, and municipalities/cities handling only waste disposal sites

It is a board established in every province, chaired by the governor, responsible for solid waste management planning at the provincial level.

- a) Provincial Solid Waste Management Board
- b) Provincial Ecological Waste Management Board
- c) Provincial Solid Waste Regulation Board
- d) Provincial Environmental and Waste Management Board

It is a board established in every province, chaired by the governor, responsible for solid waste management planning at the provincial level.

- a) Provincial Solid Waste Management Board
- b) Provincial Ecological Waste Management Board
- c) Provincial Solid Waste Regulation Board
- d) Provincial Environmental and Waste Management Board

What is the primary role of Agricultural and Biosystems Engineers in implementing solid waste management programs under RA 9003?

- a) Designing and developing systems for collection, treatment, and disposal of agricultural and organic waste.
- b) Providing technical support and training to communities on composting and waste segregation.
- c) Conducting research and promoting sustainable waste management technologies for agricultural waste.
- d) Assisting local government units in preparing and implementing solid waste management plans.

What is the primary role of Agricultural and Biosystems Engineers in implementing solid waste management programs under RA 9003?

- a) Designing and developing systems for collection, treatment, and disposal of agricultural and organic waste.
- b) Providing technical support and training to communities on composting and waste segregation.
- c) Conducting research and promoting sustainable waste management technologies for agricultural waste.
- d) Assisting local government units in preparing and implementing solid waste management plans.

Role of Agricultural and Biosystems Engineers under RA 9003

Design and Development of Waste Management Systems

Agricultural and biosystems engineers can design and develop appropriate technologies and systems for the collection, segregation, treatment, and disposal of solid waste—especially organic and biodegradable waste typical in agricultural settings.

Implementation of Composting and Bioconversion

They help develop and manage composting facilities or bioconversion processes that transform agricultural waste into useful products like organic fertilizers, bioenergy, or soil conditioners.

Promotion of Environmentally Sustainable Practices

They promote and apply environmentally sound engineering practices in agricultural operations to reduce waste generation and enhance resource recovery.

Technical Assistance and Training

Agricultural and biosystems engineers provide technical assistance and capacity-building to farmers, local government units (LGUs), and communities on proper solid waste management methods aligned with RA 9003.

Research and Development

They conduct research on innovative and cost-effective waste management technologies suitable for agricultural and rural areas.

Support in the Preparation of Solid Waste Management Plans

They contribute technical expertise during the development and implementation of solid waste management plans at the barangay, municipal, and provincial levels.

Monitoring and Evaluation

They assist in monitoring and evaluating the performance and effectiveness of solid waste management programs, especially those involving agricultural waste streams.

RA 10068

RA 10068 is the "Organic Agriculture Act of 2010"
(July 27, 2009)

Which body is created to serve as the policy-making authority, provide direction, and oversee the implementation of the National Organic Agricultural Program under the Organic Agriculture Act?

- a) National Organic Agricultural Council (NOAC)
- b) National Organic Agricultural Board (NOAB)
- c) Department of Organic Agriculture (DOA)
- d) Organic Farming Advisory Committee (OFAC)

Which body is created to serve as the policy-making authority, provide direction, and oversee the implementation of the National Organic Agricultural Program under the Organic Agriculture Act?

- a) National Organic Agricultural Council (NOAC)
- b) National Organic Agricultural Board (NOAB)**
- c) Department of Organic Agriculture (DOA)
- d) Organic Farming Advisory Committee (OFAC)

National Organic Agricultural Program

- Establishes a comprehensive organic agricultural program.
- Promotes and commercializes organic farming practices.
- Encourages cultivation and adoption of developed or developing production and processing methods.
- Supports continuing research and upgrading of organic farming methods.
- Focuses on capacity building for farmers.
- Educates consumers about organic agriculture.
- Extends assistance to:
 - ✓ Local government units (LGUs)
 - ✓ Peoples' organizations (POs)
 - ✓ Nongovernment organizations (NGOs)
 - ✓ Other stakeholders, including individuals and groups practicing or promoting organic methods.
- Supports those willing to engage in pertinent activities related to organic agriculture.
- Includes documentation and evaluation of the program.

National Organic Agricultural Board (NOAB)

- Created to carry out the policy and program of the Act.
 - Serves as the policy-making body for the National Organic Agricultural Program.
 - Provides direction and general guidelines for program implementation.
 - Is attached to the Department of Agriculture (DA).
- 

What is a primary role of the Bureau of Agriculture and Fisheries Product Standards (BAFPS) under the Organic Agriculture Act?

- a) Approve organic agriculture programs and projects developed by local government units.
- b) Implement organic agriculture programs and projects approved by the NOAB.
- c) Fund and manage all organic agriculture research activities nationwide.
- d) Enforce penalties on non-compliant organic farmers and organizations.

What is a primary role of the Bureau of Agriculture and Fisheries Product Standards (BAFPS) under the Organic Agriculture Act?

- a) Approve organic agriculture programs and projects developed by local government units.
- b) Implement organic agriculture programs and projects approved by the NOAB.
- c) Fund and manage all organic agriculture research activities nationwide.
- d) Enforce penalties on non-compliant organic farmers and organizations.

Functions, Duties, and Responsibilities of the BAFPS under the Act

- Implement organic agriculture programs and projects approved by the NOAB.
- Update the NOAB on the status of programs, projects, and activities for the development and promotion of organic agriculture.
- Create effective networking with various stakeholders involved in organic production.
- Perform other functions, duties, and responsibilities necessary to implement the Act as directed by the NOAB.

Functions, Duties, and Responsibilities of the BAFPS under the Act

- Implement organic agriculture programs and projects approved by the NOAB.
- Update the NOAB on the status of programs, projects, and activities for the development and promotion of organic agriculture.
- Create effective networking with various stakeholders involved in organic production.
- Perform other functions, duties, and responsibilities necessary to implement the Act as directed by the NOAB.

This memorandum institutionalize agricultural engineering position in the LGus.

- A) Joint Memorandum Circular No. 2, s. 2020

Joint Memorandum Circular No. 2, s. 2020 (DA-DBM-CSC-DILG)

Implementing Guidelines on the Strengthening and Establishment of the Agricultural and Biosystems Engineering Groups of the Local Government Units (LGUs)

Legal Bases

1. RA 7160 – Local Government Code
2. RA 8435 – Agriculture and Fisheries Modernization Act of 1997 (AFMA Law)
3. Executive Order 66, series of 1999 (Food Security)
4. RA 10601 – Agricultural and Fisheries Mechanization Law (AFMech Law of 2013)
5. RA 10915 – Philippine Agricultural and Biosystems Engineering Act of 2016

RA 7160 – Local Government Code

- Local Government Units (LGUs) must be self-reliant, continue performing their current duties, and take on functions devolved from national agencies.
- They may also exercise other necessary or related powers to provide basic services and facilities effectively.

Basic Services by LGU Level

- **Municipality:** Agricultural and fishery extension/research, inter-barangay irrigation, water/soil conservation, and municipal-funded infrastructure (e.g., communal irrigation, small water impounding projects, fish ports).
- **Province:** Agricultural extension/research, provincial-funded infrastructure (including irrigation systems).
- **City:** All services and facilities of both municipalities and provinces.
- Each LGU designs and implements its own organizational structure and staffing pattern based on service needs and financial capacity, following CSC standards and guidelines.

RA 8435 (AFMA), Sec. 46

The Department of Agriculture and LGUs must strengthen their agricultural engineering groups to provide technical and engineering support for agricultural infrastructure projects.

EO 66 (1999), Sec. 8

Provincial and city governments must allocate budget in their local development plans for their Food Security Action Plans, including establishing an agricultural engineering unit to support extension services.

RA 10601 (AFMech Law of 2013), Sec. 29

- Agricultural engineering units in provincial, city, and municipal agriculture offices (as provided in EO 86 and RA 8435) **are institutionalized and strengthened.**
- **LGUs in 1st–3rd income classes** implementing agri-fisheries engineering projects must hire at least one agricultural engineer at each level.
- **LGUs in 4th–6th income classes** unable to establish such units due to financial constraints will be supported by the DA's regional agricultural engineering divisions, which may set up local operation units.

RA 10915 (PABEA of 2016), Sec. 34

- National agencies, LGUs, and SUCs involved in agri-biosystems engineering work (e.g., irrigation, mechanization, post-harvest, infrastructure, environmental projects) **must hire the necessary number of Agricultural and Biosystems Engineers (ABEs) and create corresponding positions.**
- Staffing must ensure **no understaffing or overloading**, with ratios that maintain quality service without overworking engineers.

ABE Unit Placement & Responsibilities

- The Agricultural and Biosystems Engineering (ABE) Unit shall be under the Office of the Governor, City Mayor, or Municipal Mayor.
- It is responsible for:
 1. Preparing engineering plans, designs, and specifications.
 2. Managing programs and projects.
 3. Overseeing standards, regulation, and enforcement related to agricultural and biosystems engineering.

Position Creation for 1st–3rd Income Class LGUs (RA 10601, Sec. 29)

- If the ABE Unit does not yet exist, LGUs in the 1st to 3rd income classes must create appropriate engineering positions to head the unit.

LGU	Head of the ABE Unit
Provinces	Engineer IV, SG-22
Special Cities (Manila and Quezon City)	Engineer V, SG-24
Highly Urbanized Cities	Engineer IV, SG-22
Component Cities	Engineer IV, SG-22
Municipality within Metro Manila	Engineer IV, SG-22
Municipalities outside Metro Manila- 1 st to 3 rd Class Municipalities	Engineer III, SG-19
Municipalities outside Metro Manila - 4 th to 6 th Class Municipalities	Engineer II, SG-16

Position Title	Salary Grade (SG)
Engineering Assistant	SG-8
Engineer I	SG-12
Engineer II	SG-16
Engineer III	SG-19
Engineer IV	SG-22
Engineer V	SG-24

This Memorandum Circular outlines the 2022 Guidelines and Standards for the Establishment of Organizational Structures and Staffing Patterns in Local Government Units.

CSC MEMORANDUM CIRCULARNO. 12, SERIES 2022

Mandatory appointment of Agricultural and Biosystems Engineers (ABEs) in provinces, cities, and municipalities,

LGUs Where ABE Positions Are Now **MANDATORY**:

- ❑ **Provinces** – Provincial Agricultural and Biosystems Engineer
- ❑ **Cities** – City Agricultural and Biosystems Engineer
- ❑ **Municipalities** – Municipal Agricultural and Biosystems Engineer
(*Mandatory in ALL municipalities*)

Legal Basis:

- Section 4, MC No. 22, s. 2022
- Section 34, R.A. No. 10915 – “Philippine Agricultural and Biosystems Engineering Act of 2016”

The National Building Code (P.D. 1096), classified agricultural buildings under Group J – Accessory, Division _____?

- A) Division 1
- B) Division 2
- C) Division 3
- D) Division 4

The National Building Code (P.D. 1096), classified agricultural buildings under Group J – Accessory, Division _____?

- A) Division 1
- B) Division 2
- C) Division 3
- D) Division 4

Group J – Accessory Group J Occupancies shall include:

- **Division 1** – Private garage, carports, sheds and agricultural buildings.
- **Division 2** – Fences over 1.80 meters high, tanks and towers.

Act that is known as “The Agriculture, Fisheries and Rural Development Financing Enhancement Act of 2022.”

- A) RA 8293
- B) RA 11901
- C) RA 11361
- D) RA 10848

Act that is known as "The Agriculture, Fisheries and Rural Development Financing Enhancement Act of 2022."

- A) RA 8293
- B) RA 11901**
- C) RA 11361
- D) RA 10848

"The Agriculture, Fisheries and Rural Development Financing Enhancement Act of 2022." or RA 11901(July 28, 2022)

- The State's policy aims to foster inclusive economic growth by ensuring equal access to opportunities, particularly in rural areas. It promotes rural development by enhancing access to financial services for agricultural and fisheries households, thereby improving productivity and welfare.

Key initiatives include:

- ✓ LBP and DBP will offer affordable deposit products and low-interest loans to encourage savings and credit.
- ✓ Financial institutions will apply minimum interest rates for loans from government banks.
- ✓ Investment in digital banking solutions will improve accessibility in remote areas.
- ✓ Capacity-building programs will enhance the skills of farmers and fisherfolk, enabling profitable agricultural ventures and access to financing.

What is the minimum percentage of total loanable funds that all banking institutions, except newly-established banks for five years, must allocate to agricultural and fisheries financing?

- A) 10%
- B) 20%
- C) 25%
- D) 30%

What is the minimum percentage of total loanable funds that all banking institutions, except newly-established banks for five years, must allocate to agricultural and fisheries financing?

- A) 10%
- B) 20%
- C) 25%**
- D) 30%

What percentage of penalties collected by the BSP for violations of this Act is allocated for agricultural- and fishery-related capacity-building programs?

- A) 5%
- B) 10%
- C) 20%
- D) 25%

What percentage of penalties collected by the BSP for violations of this Act is allocated for agricultural- and fishery-related capacity-building programs?

- A) 5%
- B) 10%
- C) 20%**
- D) 25%

Based on RA 11901, what will the Special Fund primarily consist of?

- A) Donations from private individuals
- B) Profits from government banks
- C) Penalties from banks for noncompliance with agri-
agra credit requirements
- D) Government grants for rural development

Based on RA 11901, what will the Special Fund primarily consist of?

- A) Donations from private individuals
- B) Profits from government banks
- C) Penalties from banks for noncompliance with agri-
agra credit requirements
- D) Government grants for rural development

The Special Fund will be allocated as follows:

- **35%** to the Department of Agrarian Reform (DAR) for titling and parcelization of landholdings under collective Certificates of Land Ownership Awards (CLOA).
- **65%** for a credit facility with minimal interest rates and collateral requirements, equally managed by the Landbank of the Philippines (LBP) and the Development Bank of the Philippines (DBP).
